Re: Private Street Name Change – Oxbow North Subdivision; Unit 1
DRB Project #1002092, Zone atlas F-11

The purpose of this memo is to inform you that a street name change within the Oxbow North Subdivision is being requested. Oxbow North Subdivision is located at the SE Corner of Coors Boulevard and Namaste Road NW (just north of St. Pius X High School). The owner of all the lots adjacent to this street has requested to change Hodgkin Lane NW (Private Street) to Hodgin Lane NW (Private Street).

The final plat that was recorded for Oxbow North misspelled the street name from what was approved with the preliminary plat. The final plat that was recorded on February 13, 2003 (Document # 2003024311; Book 2003C; Page 31) mistakenly added a "k" to Hodgin Lane NW.

Please provide any comments to me in writing on this request by September 7, 2004.

ITEM # 6

PROJECT # 1002092 APPLICATION # 04-01159

RE: Oxbow North, Unit 2/final plat

Planning could not locate the approved perimeter wall design. Please provide a copy. Part of SPBP package

The Subdivision Ordinance requires the current zoning appear on the preliminary and final plat.

This language must be included in the Free Consent & Dedication on the plat: "Said owners warrant that they hold complete & indefeasible title in fee simple to the land subdivided".

Are there any changes between the approved preliminary plat and the final plat?

Planning must file this plat. AGIS dxf approval is required before Planning signs the final plat.

October 27, 2003

Dr. Frank Ikle
#5 Tennis Court NW
Albuquerque, NM 87120

Dear Dr. Ikle:

I am in receipt of your letters dated September 2, 2003 and October 9, 2003 which raise questions relating to the perimeter wall along the eastside of Coors Boulevard between Namaste and St. Joseph NW. The subject project is commonly known as Oxbow North at Oxbow Subdivision (Project # 1002092).

You are correct in that there have been numerous complaints about the wall; moreover, I understand and share many of your concerns. But let me respond more specifically to the issues you have raised:

Wall height: The wall varies in height from 6 feet to 9 feet 6 inches on the southeastern portion where the land slopes up and a retaining wall is necessary. An 8 foot high wall is permissive at the property line. The Development Review Board (DRB) approved the additional wall height to allow for soil retention on the east side of the wall.

View Shed: The subject property is within Segment 2 of the *Coors Corridor Plan*. Segment 2 is not subject to the view shed or view plane regulations that control Segments 3 and 4. (You will note that La Luz is within Segment 3.) While there are general policies in the *Coors Corridor Plan* which indicate that significant views beyond the corridor should be preserved, there are no regulations to this effect.

Setback Requirements: There are no requirements for rear-yard walls to be setback from the public right-of-way. Further, please be aware that houses up to 26 feet in height will soon be built just beyond (15 feet) the wall.

Landscaping: As indicated on the approved site plan, the developer will be landscaping the area between the wall and Coors Boulevard. An 8-foot-wide sidewalk (slightly meandering) with approximately 5 feet of total landscape planter width (to be located along the sidewalk) is planned. 8 (4'/SDWK/4')

Notwithstanding the allowances for the subject wall as constructed, the Planning Department is taking steps to prevent similar perimeter walls from being developed in the future. In fact, Planning Director Victor Chavez has directed department staff to develop enforceable standards for subdivision perimeter walls. Sheran Matson, Development Review Board (DRB) Chairperson, is developing specific requirements for major subdivision wall design submittals to be included as part of the preliminary plat and site plan application process. Approval of such submittals by Ms. Matson will be required prior to plat and site plan approval by the DRB. You may wish to contact Ms. Matson by phone at 924-3880. In addition to this effort, Manjeet Tangri, urban designer with the Advance Planning Division, is leading an effort to prepare perimeter wall regulations for inclusion in the *Zoning Code*. You may wish to contact Ms. Tangri by phone at 924-3356 to discuss any ideas or concerns that you have regarding this topic.

While the wall that raised your concerns has been approved, the Planning Department is committed to the development of regulations and procedures that prevent similar situations from occurring in the future.

Sincerely,

Bob Paulsen, AICP
Manager, Development Review Division

PIUS X HIGH SCHOOL containing approximately 40 acre(s).(F-11)

AMAFCA

No objection to requested actions. On construction plans, the storm drain outfall should be equipped with a water quality manhole or similar type treatment.

COG

The Long Range Roadway System designates Coors Boulevard as a limited access principal arterial. The Long Range Bikeway System designates a bike lane on Coors. To facilitate bicycle access to the bike lane, it should be ensured that the pedestrian access easement on the southwest corner will accommodate bicycles.

Transit — No adverse comments.

Zoning Enforcement — Reviewed, no comment.

Neighborhood Coor. — Letters sent to La Luz Del Sol (R), Ladera Heights (R) and Taylor Ranch (R) Neighborhood Assns.

APS

This request will affect Susie Rayos Marmon Elementary School, John Adams Middle School, and West Mesa High School.

APS

The above elementary school is currently enrolled beyond its designed capacity and is projected to substantially increase further in population. The High School is operating close to capacity. The APS facilities in the area have recently, and continue to be expanded and upgraded. In the fall of 1998, the district opened a new elementary school (Painted Sky) and a middle school (Jimmy Carter) opened in the fall of 2000. All planned additions to existing educational facilities are contingent upon taxpayer approval. This region's growth has outpaced the district's ability to construct new schools. As schools become overcrowded, boundary changes, alternative schedules, transportation to less crowded schools, and/or combinations of the above strategies may be employed to relieve schools with large numbers of students.

Police Department

A review of following case(s) indicates the following problems or crimes may occur or that the following concerns may need to be evaluated or addressed on this site or in this area. These comments do not indicate that a thorough CPTED evaluation has been done, or that other criminal activities may not occur. No adverse comments.

Fire Department

Fire Department needs a 20 foot minimum width and access through entry gates. Fire Department is not approving street widths less than 32 feet at this time. Per Ray Sanchez, AFD. All required fire hydrants shall be installed and made serviceable prior to and during construction of subdivision.

PNM Gas — Approves.

PNM Electric

No objection to subdivision. Reserve a utility easement in easterly extension of Namaste Road, NW. Contact PNM for location of utility easements.

Comcast — No comments received.

QWEST — No comments received.

Environmental Health — Site is not within 1000 feet of a landfill. No comment.

M.R.G.C.D. — No comments received.

Open Space Division

The subject parcel is contiguous on the eastern boundary with Major Public Open Space. Future public access to the San Antonio Oxbow -- a significant, extraordinary segment of the Rio Grande Valley State Park -- is contingent on careful and thoughtful planning, design, and development. This application appears unchanged from an earlier submittal with regards to public access, parking, drainage, and related issues.

Open Space Division recommends DEFERRAL of this application until these unsettled issues can be further discussed, coordinated, and resolved.

City Engineer

An approved drainage report is required for Preliminary Plat and Site Plan approval. No objection to sidewalk waiver.

Transportation Development

Vacation of road easement still to be determined. Comments on Infrastructure List. Cannot defer sidewalk at entrance road. Sidewalk waiver to be determined.

Parks & Recreation

No Objection to vacation requests, or sidewalk deferrals or waivers.

This request will be subject to the following requirements of the City Park Dedication and Development Ordinance:

Prior to sign-off on the final plat, a fee in-lieu of and equal to the value of the required park land dedication for 169 new residential lots will be required. The fee will be based on an estimate of land value to be provided by the City Real Property office. Alternatively, the applicant may submit current appraisal information mutually acceptable to the applicant and the City.

The park development requirement will be met via the payment of a fee prior to issuance of building permit for each new dwelling unit.

The Trails & Bikeways Facility Plan does not propose a trail in this location.

Utilities Development

1. If an emergency access easement was required previously, why is it not needed now? 2. To Vacate existing Namaste ROW, grading plan must include the replacement private access drive and abandonment of existing roadway. 3. Vacation of Oxbow Drive needs further discussion. 4. Need cross section information to justify replacing 50' easement with a 25' easement. 5. On Lot 21, it does not seem practical to have 3 retaining walls over water and storm drain lines. 6. Need to provide a cross section of Namaste Road to show that there is adequate ROW to add sewer, water, and storm drain lines. 7. Minor comments on Infrastructure List. 8. Need to discuss Sidewalk Waiver request. Both sides of streets should have sidewalks.

Planning Department

1. No objection to the temporary deferral of sidewalk construction. Defer to Transportation Development.

2. No objection to the request for sidewalk waiver. Defer to Transportation Development.

3. No objection to the vacation of public right-of-way or public easements. Defer to those agencies having an interest in the vacations. NOTE: City Real Property must sign all final plat that include the vacation of public right-of-way or the dedication of parkland.

4. No objection to the preliminary plat or site development plan for subdivision.

5. Regarding the site development plan for building permit, it appears only one of the conceptual exterior elevations has addressed the "garagescape" of the proposed development. Garages should be de-emphasized by staggering the building setbacks, recessing the garages or locating the garages to the rear of the building. In addition, garage sidewalls that face a street should appear as habitable space through the use of windows or other design elements.

IT IS REQUIRED THAT THE APPLICANT AND/OR AGENT BE PRESENT AT THE HEARING

Following is a summary of PUBLIC/PRIVATE Infrastructure required to be constructed or financially guaranteed for the above development. This Listing is not necessarily a complete listing. During the SIA process and/or in the review of the construction drawings, if the DRC Chair determines that appurtenant items and/or unforeseen items have not been included in the infrastructure listing, the DRC Chair may include those items in the listing and related financial guarantee. Likewise, if the DRC Chair determines that appurtenant or non-essential items can be deleted from the listing, those items may be deleted as well as the related portions of the financial guarantees. All such revisions require approval by the DRC Chair, the User Department and agent/owner. If such approvals are obtained, these revisions to the listing will be incorporated administratively. In addition, any unforeseen items which arise during construction which which are necessary to complete the project and which normally are the Subdivider's responsibility will be required as a condition of project acceptance and close out by the City.

Re: PRELIMINARY PLAT EXTENSION DRB# 1002092
Oxbow North (a replat of Tract B-1 Archdiocese of Santa Fe)

Dear Sheran:

Submitted herewith are the completed Development Review Board Applications and 6 copies of the approved Preliminary Plat, along with the approved Infrastructure List and Notification of Decision from the Development Review Board (DRB) in connection with the above referenced project.

We are at this time requesting an extension to the preliminary plat, which was approved by the DRB on October 2, 2002 (appeal period ending October 17, 2002). We have recorded the final plats for Units 1 and 3 which have shown the vacation actions that were approved with the original preliminary plat approval. I would anticipate recording the final plat for the remaining unit (Unit 2 of Oxbow North) within the next couple of years.

Please place this item on the DRB Agenda for hearing on October 1, 2003. If you have any questions or require further information, please call me.

Sincerely,
Bohannan Huston, Inc.

Following is a summary of PUBLIC/PRIVATE Infrastructure required to be constructed or financially guaranteed for the above development. This Listing is not necessarily a complete listing. During the SIA process and/or in the review of the construction drawings, if the DRC Chair determines that appurtenant items and/or unforeseen items have not been included in the infrastructure listing, the DRC Chair may include those items in the listing and related financial guarantee. Likewise, if the DRC Chair determines that appurtenant or non-essential items can be deleted from the listing, those items may be deleted as well as the related portions of the financial guarantees. All such revisions require approval by the DRC Chair, the User Department and agent/owner. If such approvals are obtained, these revisions to the listing will be incorporated administratively. In addition, any unforeseen items which arise during construction which which are necessary to complete the project and which normally are the Subdivider's responsibility will be required as a condition of project acceptance and close out by the City.

Re: Oxbow Bluff Subdivision

Ladies and Gentlemen:

In the Design Guidelines which were contained on Sheet 8 of 8 of the Site Plan for Subdivision Approval submitted by Altura West Ltd. Co. and approved by the EPC in regard to the Oxbow Bluff Subdivision, there were certain approved colors. The current Design Guidelines allow for other colors which are specifically approved by the Architectural Control Committee.

It recently came to my attention that John Lowe, who is building a house for John Waymire on Lot 15 of the Oxbow Bluff Subdivision applied for a building permit. A color which is very close to the colors contained in the Design Guidelines was approved by the Architectural Control Committee. Mr. Lowe told me that you need a letter in your file indicating that certain other colors may be approved by the Architectural Control Committee.

This will confirm that the Oxbow Bluff Architectural Control Committee may approve colors which are different than those which are specifically set forth on Sheet 8 of 8. In the event the Architectural Control Committee does so, specific written authorization will be given to the owner of the property or his/her agent.

If you have any questions, please don't hesitate to call me at 346-9109. Thank you for your cooperation.

Yours very truly,

Re: Guesthouse provisions in Oxbow Bluff

Per your request I have reviewed whether or not guesthouses are permitted within the Oxbow Bluff subdivision. My understanding is that a set of plans for a residence and out building was rejected because the out building appeared to be a guesthouse. It is my opinion that guesthouses are permissive based upon the following:

1. Zoning: The property is zoned SU-3. The SU-3 Zone (Section 14-16-2-24) "allows a variety of uses controlled by a plan which tailors development to an Urban Center; these include centers of employment, institutional uses, commerce, and high density dwelling." This zone requires a Sector Plan.

   Clearly the SU-3 zoning does not restrict guesthouses.

2. Sector Plan: The University of Albuquerque Sector Plan governs the development of Oxbow Bluff. The sector plan states "Parcel F shall be developed 1 to 3 du/ac."

   Clearly the Sector Plan does not restrict guesthouses.

3. Site Plan: The Oxbow Bluff development is further regulated by the Site Development Plan. The introductory section of the Site Plan's Design Guidelines (Sheet 8), paragraph 2 (see attached) provides for guesthouses.

   The Site Plan acknowledges guesthouses as a part of the Design Guidelines.

Based upon the reasons outlined above, it is my opinion that guesthouses are permitted within the Oxbow Bluff subdivision. Feel free to call me at 764-9801 if you have any questions or comments.

To Whom It May Concern:
We are requesting the building envelope of 4115 Silvery Minnow (Lot 10-P1), in Oxbow Bluff be altered from the existing site plan. The Oxbow Home Owners Association is designing a walk path that will pass directly behind our property. Therefore, we are concerned that people will be able to peek into or potentially access our property. In addition, we are planning to have a swimming pool in our backyard. Also, the slope of our lot requires that we have retaining walls. The Oxbow Bluff Home Owners Association requires that we build all of the walls inside the building envelope. For all of these reasons, for the safety of the public walking, and ourselves we are requesting the ratification of our proposed building envelope. If you have any questions or concerns, feel free to contact me at 922-1076.

Thank you,
Carol-Lynn Harvey

RE: Preliminary/Final Plat Approval- Proposed Tract A Oxbow Bluff Subdivision
DRB Project# 1002092

Dear Sheran:

Enclosed for review and approval by the Development Review Board (DRB) are copies of the following information:

- Development Review Applications
- Six (6) copies of each of the Preliminary/ Final Plat
- Zone Atlas Map

The purpose of this preliminary / final plat is to meet the conditions of the vacation action that was approved at the February 5, 2003 Development Review Board Meeting. On February 5, 2003, the DRB approved the vacation of the public right of ways within the Oxbow Bluff Subdivision. I have enclosed a copy of the Official Notice from that meeting. The conditions listed in the Official Notice are as follows:

- Public Water, Sanitary Sewer and Storm Drain Easements shall be retained.
- Final dispositions shall be through the City Real Estate Office.
- The vacated property shall be shown on a replat approved by the DRB and the approved replat shall be filed for record with the Bernalillo County Clerk's Office within one year.
- Affected utility companies shall acknowledge the vacation by signatures on the replat.

Note 4 on the enclosed preliminary/ final plat has provided a blanket public sanitary sewer, water and subsurface storm drain easement over Tract A (the vacated right-of-way) to the City of Albuquerque. I have provided signature blocks on the plat for those utility companies affected by the vacation approval.

Please note that there is an existing **Tract A Oxbow** Subdivision (as shown on the Zone Atlas Page F-11), however, I will be creating **Tract A** of the **Oxbow Bluff** Subdivision (which currently does not exist). Please place this item on the DRB Agenda to be heard on May 21, 2003. If you have any questions or require additional information, please contact me.

Sincerely,

Kevin Patton, P.E.

SIGN POSTING REQUIREMENTS

POSTING SIGNS ANNOUNCING PUBLIC HEARINGS

All persons making application to the City under the requirements and procedures established by the City Zoning Code or subdivision Ordinance are responsible for the posting and maintaining of one or more signs on the property which the application describes. Vacations of public rights-of-way (if the way has been in use) also require signs. Waterproofed signs will be provided at the time of application. If the application is mailed, you must still stop at the Planning Division to pick up the sign.

The applicant is responsible for ensuring that the signs remain posted throughout the 15-day period prior to public hearing. Failure to maintain the signs during this entire period may be cause for deferral or denial of the application. Replacement signs for those lost or damaged are available from the Planning Division at a charge of $3.00 each.

1. LOCATION

   A. The sign shall be conspicuously located. It shall be located within twenty feet of the public sidewalk (or edge of public street). Staff may indicate a specific location.
   B. The face of the sign shall be parallel to the street, and the bottom of the sign shall be two to seven feet from the ground.
   C. No barrier shall prevent a person from coming within five feet of the sign in order to read it.

2. NUMBER

   A. One sign shall be posted on each paved street frontage. Signs maybe required on unpaved street frontages.
   B. If the land does not abut a public street, then in addition to a sign placed on the property a sign shall be placed on and at the edge of the public right-of-way of the nearest paved City street. Such a sign must direct readers toward the subject property by an arrow and an indication of distance.

3. PHYSICAL POSTING

   A. A heavy stake with two crossbars or a full plywood backing works best to keep the sign in place, especially during high winds.
   B. Large headed nails or staple are best for attaching signs to a post or backing; the sign tears out less easily.

4. TIME

   Signs must be posted from JAN 21 2003 To FEB 5 2003.

5. REMOVAL

   A. The sign is not to be removed before the initial hearing on the request.
   B. The sign should be removed within five (5) days after the initial hearing.

I have read this sheet and discussed it with the Planning Division staff. I understand (A) my obligation to keep the sign(s) posted for fifteen (15) days and (B) where the sign(s) are to be located. I am being given a copy of this sheet.

INFRASTRUCTURE LIST

EXHIBIT "A"
TO SUBDIVISION IMPROVEMENTS AGREEMENT
DEVELOPMENT REVIEW BOARD (D.R.B.) REQUIRED INFRASTRUCTURE LIST

OXBOW NORTH SUBDVISION
(TRACT B-1, ARCHDIOCESE OF SANTA FE)
Preliminary Plat

Following is a summary of PUBLIC/PRIVATE Infrastructure required to be constructed or financially guaranteed for the above development. This Listing is not necessarily a complete listing. During the SIA process and/or in the review of the construction drawings, if the DRC Chair determines that appurtenant items and/or unforeseen items have not been included in the infrastructure listing, the DRC Chair may include those items in the listing and related financial guarantee. Likewise, if the DRC Chair determines that appurtenant or non-essential items can be deleted from the listing, those items may be deleted as well as the related portions of the financial guarantees. All such revisions require approval by the DRC Chair, the User Department and agent/owner. If such approvals are obtained, these revisions to the listing will be incorporated administratively. In addition, any unforeseen items which arise during construction which which are necessary to complete the project and which normally are the Subdivider's responsibility will be required as a condition of project acceptance and close out by the City.

SIGN POSTING REQUIREMENTS

POSTING SIGNS ANNOUNCING PUBLIC HEARINGS

All persons making application to the City under the requirements and procedures established by the City Zoning Code or subdivision Ordinance are responsible for the posting and maintaining of one or more signs on the property which the application describes. Vacations of public rights-of-way (if the way has been in use) also require signs. Waterproofed signs will be provided at the time of application. If the application is mailed, you must still stop at the Planning Division to pick up the sign.

The applicant is responsible for ensuring that the signs remain posted throughout the 15-day period prior to public hearing. Failure to maintain the signs during this entire period may be cause for deferral or denial of the application. Replacement signs for those lost or damaged are available from the Planning Division at a charge of $3.00 each.

1. LOCATION

   A. The sign shall be conspicuously located. It shall be located within twenty feet of the public sidewalk (or edge of public street). Staff may indicate a specific location.
   B. The face of the sign shall be parallel to the street, and the bottom of the sign shall be two to seven feet from the ground.
   C. No barrier shall prevent a person from coming within five feet of the sign in order to read it.

2. NUMBER

   A. One sign shall be posted on each paved street frontage. Signs maybe required on unpaved street frontages.
   B. If the land does not abut a public street, then in addition to a sign placed on the property a sign shall be placed on and at the edge of the public right-of-way of the nearest paved City street. Such a sign must direct readers toward the subject property by an arrow and an indication of distance.

3. PHYSICAL POSTING

   A. A heavy stake with two crossbars or a full plywood backing works best to keep the sign in place, especially during high winds.
   B. Large headed nails or staple are best for attaching signs to a post or backing; the sign tears out less easily.

4. TIME

   Signs must be posted from SEPT 10 2002 To SEPT 25 2002.

5. REMOVAL

   A. The sign is not to be removed before the initial hearing on the request.
   B. The sign should be removed within five (5) days after the initial hearing.

I have read this sheet and discussed it with the Planning Division staff. I understand (A) my obligation to keep the sign(s) posted for fifteen (15) days and (B) where the sign(s) are to be located. I am being given a copy of this sheet.

Dear Janet:

The purpose of this letter is to provide you with a copy of the revised grading plan for the above referenced subdivision. I have revised the grading plan to reduce the amount of retaining walls originally proposed.

The above submittal is scheduled to be heard at DRB on Wednesday September 25, 2002. We expect to defer this action on this project one week so as to allow additional review time for the drainage report. Please incorporate the revised grading plan into our submittal package.

If you have any questions, please give me a call at 823-1000.

DESIGN GUIDELINES FOR OXBOW NORTH

The following are guidelines for homes built in the Oxbow North subdivision ("Oxbow North Guidelines"). The construction of homes in the Oxbow North will be subject to the review of the Oxbow North Architectural Control Committee (the "ACC") as described below. Builder will construct all homes within Oxbow North in compliance with these Guidelines.

A. Architecture Styles

All homes must be Pueblo Revival, Pitched Roof Pueblo, Territorial, Contemporary Pueblo, or Old World Style. Below are described characteristics of the different styles. While these characteristics are typical, it is not the intent of these guidelines to prohibit a certain amount of individual expression and creativity as long as the overall look of the house contains the characteristics of one of the styles listed below and adheres to the Guidelines. The ACC retains the right to approve or deny any aspects of the design on a case-by-case basis without limitation.

1. Pueblo Revival Style - Pueblo style is walled architecture recalling the low adobe, flat roofed dwellings of the northern New Mexico Pueblo Indians. Characterized by the "Pueblo Revival" buildings of historic Santa Fe, Pueblo style incorporates recessed set doors and windows, dramatically recessed portals or patios, walled entry courtyards and/or portals, and,radius corners and edges. The Pueblo style traditionally uses flat roofs and relies extensively on post and beam or beamy wall construction. Interesting massing and soft edged smooth stucco are distinctive features of this style.
2. Pitched Roof Pueblo Style - A more contemporary pueblo style that incorporates a pitched roof is allowed. For use of the pitched roof style, however, the house must incorporate pueblo style elements so that the house will blend with the southwestern theme of the subdivision. The pitch ratio for this combination will be no greater than 5:12.
3 Territorial Style - Territorial houses are characterized by simple, if not symmetrical, massing, low sloped roofs, brick parapet caps, stucco walls, square corners, and pedimented window and door hood trim. Portals and courtyards are used to complete plan geometries and to add classical touches to simple massing. The history of massory dictates that the window and doors be deep set, but not as dramatically as the Pueblo style. The Territorial style, while closely related to the Pueblo style, is straighter, more formal, more finished and lends itself to modern construction techniques. Roofs must be flat. An entry portal is common and a hallmark of the style. Brick shall be used as parapet caps in chimney forms.
4 Contemporary Pueblo Style - Contemporary interpretations of the Pueblo style incorporating large areas of glass and innovative massing can be designed, with skill, to be in harmony with more traditional residences. Pitched roof forms will not be allowed in this style. Courtyard walls extending geometries of residence are part of this style. The percentage of glass area to wall area, without prior approval of the ACC, shall not exceed 30% in this style.

5 Old World Style - Features typically associated with Old World Style Architecture include rock or stone Facades and/or Accents, Arched and /or Vaulted elements, Courtyards, Barrel vaulted tile (not flat), Roof pitches which do not exceed 5.12, and a combination of flat and pitched roof components. Some or all of these features may be incorporated into an Old World Style House.

6. Any pitched roof must be non-reflective concrete or slate tile or non-reflective coated and of a color that blends with or closely matches the color of the soffit, facia and house. Additional colors may be approved by the ACC on an individual basis.

B. Building Massing

For all of the architectural styles listed above, building massing is critical, especially for the street elevations. Building masses should be offset from the adjacent masses by an appropriate dimension to the size of the building and approved by the ACC. The front and rear (if adjacent to a street) elevations must contain at least two building masses, of which two of the building masses must have at least a 1 foot vertical/horizontal offset. Deviations from the 1-foot minimum massing requirements in the Design Guidelines may be approved on an individual basis. A building mass is defined as a volume of space that usually appears as a rectilinear form, consisting of a roof and at least three (3) walls.

C. Garages

1. Each home must have a garage for not more than three and not less than two cars and have a driveway sufficient to park two vehicles, so that a minimum of four parking spaces is provided.
2. Garage doors shall be offset from the surface of the front façade by a minimum of eight inches (8")

D. Windows

All exterior windows and frames of windows must be a white or tan color.

E. Setbacks

An effort shall be made to have a variety of front yard setbacks and to develop a randomness to the different setbacks. The minimum setbacks are as follows:

1. Front yard setback
a. No house shall be constructed within ten feet (10') from the front property line of a lot.
b. The garage shall be constructed to ensure that a twenty-foot (20') minimum parking area exists in front of the garage.
2. Side yard setback - no house shall be constructed within five feet (5') from the side property line of a lot.
3. Rear yard setback - no house shall be constructed within fifteen feet (15') from the rear property line of a lot.

F. Minimum Square Footage

Each home must have at least 1,550 square feet of fully enclosed heating area, exclusive of garages and open porches and patios.

G. Materials and Pre-Approved Building Colors

1 All homes must be finished with synthetic stucco. Subject to ACC approval, the only colored stucco finishes that will be allowed on homes are the following:

Sto Flex Adobe Brown (#1104)
Sto Flex Sandia (#1616)
Sto Flex Pueblo (#1005)
Sto Flex Suede (#1006)
Sto Flex Santa Fe Mocha (#1003)
Sto Flex Tomeon for High Desert (#1501A)
USG Oxbow Bluff (Building Specialties)

If a brand of synthetic stucco is used other than Sto or USG, the color must match one of the above colors. Additional colors may be approved by the ACC on an individual basis.
2. Stone and/or tile may be used as an accent feature.

H. Building Height

The maximum height allowed for any homes constructed in Oxbow North is twenty-six feet (26'). This height limitation is as defined in the city of Albuquerque Comprehensive zoning code.

1 The maximum area of the second story of a house shall be no more than seventy-five percent (75%) of the area of the first floor. The first floor area is calculated inclusive of the garage area and porch area. The second story area is calculated exclusive of roof decks and porches. For example, if the first floor has an area of 2,000 s.f., the area of the second story is limited to a maximum of 1,500 s.f.
2 Floor Area Ratio is the ratio of the heated floor area (including multiple stories) of the structures to the lot. In order to ensure that houses are in appropriate proportion to their lot, a Floor Area Ratio of .75 shall not be exceeded.

I. Landscaping

1. Approval Process. Plans for front yard landscaping must be submitted for approval prior to the start of construction of landscaping to the ACC and must be compatible with the overall subdivision streetscape and must conform to and meet or exceed the minimum standards as approved.
2. Timing of Installation. All front yard landscaping, and all side yard landscaping (if the home is on a corner), must be completed by the builder no later than two months after completion of construction of the home, but in any event no later than the date of occupancy of the home.

J. Site Lighting

1 Site lighting shall not have a total off-site luminance greater than 1000 foot lambarts; however, it shall not have an off-site luminance greater than 200 foot lambarts measured from the property line of any private property in a residential zone.
2. The mounting height of luminaires in vehicular and/or storage areas shall be no higher than 20 feet.

K. Mechanical Equipment

1. Air conditioning/heating equipment may be installed on flat-roofed structures but must be screened from view by parapets that are an integral part of the house. No air conditioning/heating equipment shall be installed on houses with a pitched roof profile. Equipment that is ground-mounted shall be located within the side or rear yard and screened from the front and sides.
2. Any roof-mounted equipment shall be screened with materials architectually compatible to the house in terms of material, color and design. Ground mounted equipment shall be screened with materials architectually compatible to the house in terms of material, color, design, and/or landscaping. Top of screen walls are to be the same height or higher than the equipment being screened.

L. Fireplaces

Fireplaces and/or stoves shall be limited to gas logs and Environmental Protection Agency approved wood-burning devices. No ordinary wood-burning fireplaces shall be installed in any residential dwelling.

M. Walls

1. Subdivision Walls. The perimeter subdivision wall shall be concrete masonry unit (CMU) with stucco finish and will be installed and paid for by the Developer. The wall height shall be no more than eight feet (8') and no less than four feet (4') as measured from the street side of the wall.
2. Site Walls
a. Each house must have a rear wall and two sidewalls. All rear walls shall extend the entire length of the rear property line. All sidewalls shall extend from the rear of the lot to at least within 6' of the front of the garage.
b. Interior residential lot line walls shall be CMU and no more than eight feet (8') in height. Wall planes facing out to streets shall have a stucco finish of a color to match the house to which it is adjacent. The inside of the wall shall be painted to match Sto Flex Pueblo (#1005).
c. All walls that are located on the common property line between adjoining lots shall be party walls that may not be removed by either property owner of the adjoining lots. All walls must be constructed from the elevation specified by the subdivision engineer and indicated on the grading plan of the Oxbow North Subdivision. The cost of installation and maintenance of such party retaining walls shall be split equally between property owners of the adjoining lots.
d. No wall or fence may be erected on a lot that is closer to the street than the front of the dwelling on the lot, except for courtyard walls.

Re: Oxbow North: D.R.B. Number 1002092

Dear Janet:

The purpose of this letter is to provide you with additional information relative to the issue of garage door orientation and visibility on residential structures proposed to be built at the Oxbow North subdivision. As you are aware, this subdivision is located on property zoned SU-3, requiring review and approval of a Site Development Plan package by the D.R.B. This package was submitted to you for review and included design guidelines restricting home construction to specific styles, heights, colors, setbacks, etc. These deign guidelines were written to be similar to other Oxbow Community developments, including the Oxbow Village, Park, and Enclave subdivisions. In each of these developments, the front yard setback is specified to be 10', except in front of garages, where the setback is increased to 20' to accommodate off-street vehicle parking. Many of the homes that will be built at Oxbow North will take advantage of the 10' front yard setback for heated living space and/or front yard patios or porches. Because of this, garages will be set back from the front façade of the home 10'. In many cases, abutting homes will be designed similarly. This intentional design element will result in garage doors being hidden as one looks down a street of homes. As a pedestrian or driver moves through the development, he or she will view only a few garage doors at any single location, while others will be similarly hidden by the protruding patio, porch, or heated living space. To further de-emphasize the garage door, most units will be designed with this element recessed into a thickened wall. All garage doors will be painted to blend with the color of the exterior finish of the unit. Additionally, the lot width at Oxbow North is wider than typical subdivisions. Each lot is a minimum of 65' wide. Accordingly, each home will be 55' wide. The garage area of the residence will consume a smaller percentage of the façade than a typical, smaller house. There will also be more distance between the garage areas and this distance will be filled with other components of the house.

The success of these deign restrictions can be seen at the Oxbow Communities discussed above. While Oxbow North lot dimensions differ, the architectural style and design restrictions will be similar. As discussed above, we believe the added width of the lots will actually improve on an already successful design element. We invite you to visit these projects to witness the success of these guidelines first-hand. Should you have additional comments of questions, do not hesitate to call.

Sincerely,

Paul M. Wymer

Re: Namaste Road

Dear Jim:

Thank you for providing me with copies of the submission regarding vacation of Namaste Road in connection with the further development of the Oxbow Subdivision. I met with Mrs. Poole on September 25, 2002, and she asked me to convey to you that she opposes the proposal to vacate the eastern portion of Namaste Road. I understand based on previous communications from you and Kevin Patton of Bohannan Huston that you would not proceed with this request for that vacation if Mrs. Poole indicated her opposition. This letter is to advise you of that opposition and to confirm that you have told me that you will withdraw that portion of the development plan from your further plans and the approval process. I am providing Kevin Patton a copy of this letter so that he is also aware of Mrs. Poole's position. Thank you both for your efforts in keeping Mrs. Poole and me informed.

Sincerely,

Donald R. Fenstermacher
