RE: CARLISLE PLAZA CONCEPTUAL GRADING AND DRAINAGE PLAN

Dear Chuck:

I have reviewed the referenced plan and I concur with your assessment that the site should be allowed free discharge. Therefore, the plan is approved and will serve as the development guidelines for any construction. Please advise your client that a drainage plan, showing compliance with the master plan, will be required for each structure prior to release of a building permit.

Very truly yours,

Brian G. Burnett
Civil Engineer/Hydrology
