GENERAL NOTES:

1. New Mexico Standard Specifications for Public Works Construction, 1979 Edition, will be referred to hereon as the "Standard Specification".
2. All work detailed on these plans to be performed under contract shall, except as otherwise stated or provided for hereon, be constructed in accordance with "Contract Documents for City-Wide Utilities and Cash Paving No.31 and the Standard Specifications'.
3. Where a water line passes beneath or less than 3' above an existing sewer line, the sewer line shall be encased in concrete 6" thick for at least 10' on each side of the water line, or the sewer line shall be replaced with ductile iron pipe with mechanical joints for 10' each side of the water line. This shall apply where a parallel water line is less than 10' horizontally and less than 2' above the sewer.
4. Backfill compaction shall be according to specified street use.
5. Two working days prior to any excavation, contractor must contact Line Locating Service, 765-1234, for location of existing utilities.
6. Prior to construction, the contractor shall excavate and verify the horizontal and vertical locations of all obstructions. Should a conflict exist, the contractor shall notify the engineer or surveyor so that the conflict can be resolved with a minimum amount of delay.
7. Stations shown are centerline stations.
