HYDROLOGY G19/D11 1 PLAN

G 19/D 11

1 PLAN

January 22, 1981

To Whom This May Concern:

JOB: 3507 Wyoming Boulevard NE.
Tract B
Dellwood addition

As indicated on the plans, the flow of water in service access flows south to approximately 50' north of proposed addition and drains to the west and south of proposed addition.

To the best of my ability I do not believe the addition would obstruct any existing flow of water created in the access easement.

Thank you,

Robert Walters
