Re: Vagabond Hotel PALA #8228
University Blvd. & Claremont Ave.

Dear Fred:

As we discussed over the phone on Thursday, I am sending you a preliminary blue line print of our proposed grading and drainage scheme. I've also indicated how the required retention pond volumes were determined and the method of disposing of the accumulated runoff.

It appears that the site does not receive any offsite flows, nor is it flood-prone. The major grading problem seems to be driveway slopes.

Please review this sketch and I'll call you to discuss any comments and/or suggestions you might have. Thank you.

Sincerely,

Peter A. Johnson
