RE: WASHINGTON MIDDLE SCHOOL DRAINAGE REPORT (K-13-D5)

Dear Mr. Mortensen:

The referenced drainage report is approved and the building plans will be released as is, if the owner agrees to have his engineer certify the referenced project upon completion. This is recommended in lieu of requiring more construction detail and any further review by this office. This arrangement also lends some coordination between the design and the construction.

Please advise this office of the owner's decision.

Sincerely,

Fred J. Aguirre

Re: Washington Middle School
Drainage Report

Dear Fred:

Transmitted herewith is the additional grading information which you requested for the subject project. This information should enable you to complete your review of the drainage plan.

If you have any further questions or comments concerning the subject project, do not hesitate to call.

Sincerely,

TOM MANN & ASSOCIATES, INC.

Re: Washington Middle School

Dear Brian:

Transmitted herewith are two (2) prints of the grading and drainage plans for the subject project. Because the construction sets have already been submitted for review, it may be feasible to forward these to Mr. Fred Aguirre so that he can review the plans for concept as well as construction detail. In fact, this would insure that the Drainage Plan B would be reviewed in the same time frame as the construction set. In addition, Mr. Aguirre is already familiar with the project.

If you have any questions or comments concerning this submittal and request, do not hesitate to call.

Sincerely,

TOM MANN & ASSOCIATES, INC.
