RE: ALL AMERICAN WAREHOUSE FILE NO. L20 - D4

Dear Sir:

The referenced site was field inspected and found to be at variance with the approved drainage plan on file with this office. Also, this plan did not take into account the existing addition provided on-site.

In view of this situation, this office must require an updated drainage plan prepared by a New Mexico registered engineer showing the as-built conditions on-site with the proposed improvements to bring the site into compliance with the Drainage Ordinance.

If you have any further questions regarding the above plan, please feel free to contact me.

Very truly yours,

Fred J. Aguirre, P.E.
Civil Engineer
