 DRB Project No. _____ 1008444

Following is a summary of PUBLIC/PRIVATE infrastructure required to be constructed or financially guaranteed for the above development. The listing is not necessarily a complete listing. During the SIA process and/or in the review of the construction drawings, if the DRIC Chair determines the equipment items are not included on the list, the Chair may require the applicant to provide a list of additional items to be included in the final SIA report. The items listed are those approved by the DRIC Chair. The User Department and applicant. If such approvals are obtained, these revisions to the listing will be incorporated administratively. In addition, any unlisted items which arise during construction which which are necessary to complete the project and which normally are the Subdivider's responsibility will be required as a condition of project acceptance and close out by the City.
