

**BP-2023-34420 Minor Amendment Justification Letter – Revision 1**

7/15/2024

To Whom It May Concern:

Please consider approving BP-2023-34420 related modifications as a Minor Amendment to the approved site plan. This project is tenant improvement of an existing office building located at 14820 Central Av SE, Albuquerque, NM. The building occupancy of this facility, Group B, remains unchanged and the minor proposed changes are being pursued to meet the owner's Laboratory-Testing and Research needs. Access to the site remains unchanged and the user's intent is to keep this building and site in their current state with two minor exceptions:

1. Rooftop Installation - Rooftop deck with removable FRP railing will be added above a portion of the existing roof. At its highest elevation this deck will be approximately 18" above the existing parapet and its purpose is to house three removable research antennas. The structural frame of this deck will be comprised of steel framing members and its finishes will match the existing roofing color.
2. Addition of a Fence - Telescope trailer yard with approximately 160 linear feet of 8' security fencing will be added to the southern end of the existing parking lot. The only purpose of this fencing is to provide security around the parked research equipment.

We would appreciate your quick review of this request and are prepared to answer any questions that you may have.

Sincerely,

Srdan (Serge) Kalajdzic, Principal Architect
