Following is a summary of PUBLIC/PRIVATE infrastructure required to be constructed or financially guaranteed for the above development. This listing is not necessarily a complete listing. During the RFA process and/or in the review of the construction drawings, if the DRC Chair determines that equipment items and/or underpin items have not been included in the infrastructure listing, the DRC Chair may include these items in the listing and related financial guarantees. Likewise, if the DRC Chair determines that equipment or non-essential items can be deleted from the listing, these items may be deleted as well as the related portions of the financial guarantees. All such revisions require approval by the DRC Chair, the User Department and adjacent owners. If such approvals are obtained, these revisions to the listing will be incorporated administratively. In addition, any unforeseen items which arise during construction which are necessary to complete the project and which initially are the Subdivider's responsibility will be required as a condition of project acceptance and clear out by the City.
