Subject: RE: Landfill Buffer Zone

If you can send me the landscaping that would be great. I would rather not have very much landscape watering along San Mateo due to the potential for landfill material there. I will approve the berm removal, but would like to include the landscaping review at the same time.

Thanks,
Paul

Subject: Landfill Buffer Zone

Paul,

Thanks for speaking with me this afternoon. Attached is a PDF showing the Honeywell building and site with the landfills overlaid. On pages 2 and 3 I tried to illustrate how we'd like to lower the existing berm and add new windows along that north side. We will also be adding landscaping along San Mateo. We are not building anything new or adding on to the building. This is really an interior renovation with some exterior improvements. Let me know your thoughts on this and if you feel we need an assessment done or if air quality monitoring will be sufficient during construction.

Thanks,

Jeremy Shelton, AIA, CSI, LEED AP
