To whom it may concern,

LivLab build modular homes and we want to bring one to 1515 Mountain Rd. NW. After reviewing the ID0 interactive map with the platted parcels layer on It looks like the lot is divided into two parcels. When this layer is turned off and the County accessors parcels is turned on the line dividing the property disappears. I was told to file a sketch plat to determine if there would be issues with this and how to go about changing it.

Furthermore, I'd like to know if the square footage for this house being 550 square feet will be an issue. This is basically an inlaw quarters for my client who also owns 1523 Mountain rd next door.

Thanks for your attention to my questions.

Sincerely,

Christopher Blaz
