RE: Water and Sanitary Sewer Availability Statement #210916

Project Name: Westpointe 40 Spec #1

Project Address: NA

Legal Description: Portion of tract 9 Avalon Subdivision Unit 5

UPC: Portion of 100905719339420401

Zone Atlas Map: K-09

Dear Mr. Carrica:

Project Description: The subject site is located along Daytona Road north of the corner of Bluewater Road and Daytona Road within the City of Albuquerque. The proposed development consists of approximately 9.7 acres and the property is currently zoned NR-BP for non-residential use, business park. The property lies within the Pressure Zone 2W in the Atrisco Trunk. The request for availability indicates plans to subdivide and develop the site for a commercial hazard storage site.

Existing Conditions: Water infrastructure in the area consists of the following:

- Ten-inch cast iron well collector line (project #09-010-63, abandoned left as is) along Daytona Road.
- Ten-inch cast iron well collector line (project #09-010-63, abandoned left as is) along the northern property line of the site.
- 12-inch PVC distribution line (project associated with statement #210915) along Daytona Road.
- 12-inch cast iron distribution line (project # 09-001-71) along the northern property line of the site.
 - 12-inch cast iron distribution line (project #26-6397.71-18) connected to the 12-inch cast iron line, along the northern property line of the site.

Sanitary sewer infrastructure in the area consists of the following:

- Eight-inch PVC sanitary sewer collector (project associated with statement #210915) along Daytona Road.

Water Service: New metered water service to the property can be provided contingent upon a developer funded project to extend a 12-inch distribution main from the 12-inch extension along Daytona Road. It shall extend such that it will loop into the 12-inch cast iron distribution line, to support adequate fire protection. Upon completion of the infrastructure construction, the development may receive service via routine connection to the proposed 12-inch distribution main along Daytona Road. The engineer is responsible for determining pressure losses and sizing of the service line(s) downstream of the public water line to serve the proposed development.

Service is also contingent upon compliance with the Fire Marshal's instantaneous fire flow requirements. Water service will not be sold without adequate fire protection. Water service will only be sold in conjunction with sanitary sewer service. Each legally platted property shall have individual, independent water services. No property shall share a water service with any other property.

Existing service lines and fire lines that will not be utilized are to be removed by shutting the valve near the distribution main. For fire lines, the line shall be capped near the public valve and valve access shall be grouted and collar removed.

Non-Potable Water Service: Currently, there is no non-potable infrastructure available to serve the subject property.

Sanitary Sewer Service: New sanitary sewer service to the property can be provided contingent upon a developer funded project to extend an eight-inch main from the eight-inch extension along Daytona Road. It shall extend such that the site's frontage is covered and will terminate at a manhole. No property shall share a private sewer service with any other property. The engineer is responsible for sizing the service line(s) upstream of the public sanitary sewer line to serve the proposed development.

Fire Protection: From the Fire Marshal's requirements, the instantaneous fire flow requirements for the project are 4,000 gallons-per-minute. Four fire hydrants are required. There are three new hydrants proposed with this project, one of which will be public. As modeled using InfoWater™ computer software, the fire flow cannot be met. Analysis was performed by simulating the required fire flow at the proposed hydrant and the connection point of the proposed fire line.

In order to provide the required fire flow, infrastructure improvements are required. These improvements consist of looping the proposed waterline with the 12-inch cast iron along the northern property line of the site.

Any changes to the proposed connection points shall be coordinated through Utility Development. All new required hydrants as well as their exact locations must be determined through the City of Albuquerque Fire Marshal's Office and verified through the Utility Development Office prior to sale of service.

The engineer is responsible for determining pressure losses and sizing of the fire line(s) downstream of the public water line to serve the proposed fire hydrants and/or fire suppression system.

Cross Connection Prevention: Per the Cross Connection Ordinance, all new non-residential premises must have a reduced pressure principle backflow prevention assembly approved by the Water Authority installed at each domestic service connection at a location accessible to the Water Authority. No tees, branches or possible connection fittings or openings are allowed between the reduced principle backflow prevention assembly and the service connection unless protected by a backflow prevention assembly. These requirements also apply to all remodeled non-residential premises when the work area of the building undergoing repairs, alterations or rehabilitation, as defined in the International Existing Building Code, exceeds 50 percent of the aggregate area of the building regardless of the costs of repairs, alteration or rehabilitation.

All non-residential irrigation water systems connected to the public water system shall have a pressure vacuum breaker, spill-resistant pressure vacuum breaker or a reduced

pressure principle backflow prevention assembly installed after the service connection. Such devices shall be approved by the Water Authority. No tees, branches or possible connection fittings or openings are allowed between the containment backflow prevention assembly and the service connection.

All non-residential customers connected via piping to an alternative water source or an auxiliary water supply and the public water system shall install a containment reduced pressure principle backflow prevention assembly approved by the Water Authority after the potable service connection.

All new services to private fire protection systems shall be equipped with a containment reduced pressure principal backflow prevention assembly approved by the Water Authority and Fire Marshal having jurisdiction installed after the service connection. No tees, branches or possible connection fittings or openings are allowed between the containment backflow prevention assembly and the service connection. A double check valve assembly approved by the Water Authority and Fire Marshal having jurisdiction may be installed instead of a reduced pressure backflow prevention assembly provided the private fire protection system meets or exceed ANSI/NSF Standard 60 61 throughout the entire private fire protection system, the fire sprinkler drain discharges into atmosphere, and there are no reservoirs, fire department connections nor connections from auxiliary water supplies.

The Water Authority requests that all backflow (containment) devices be located above ground just outside the easement or roadway right-of-way. Contact Cross Connection at 289-3454 for more information.

Pretreatment: If the development is for industrial use, and if either of the following apply, then contact the Industrial Pretreatment Engineer at (505) 289-3439 or pretreatment@abcwua.org:

- 1) The industry falls under one or more EPA categories found in Title 40 Code of Federal Regulations Parts 400-699, or
- 2) The industry plans to discharge more than 25,000 gallons of wastewater per day.

Coordination with Pretreatment shall take place early in the planning stages and design.

Easements: Exclusive public water and sanitary sewer easements are required for all public lines that are to be constructed outside of any dedicated rights-of-way. A minimum width easement of 20 feet is required for a single utility and 25 feet for water and sewer both within the same easement. Easements for standard sized water meters need to be five feet by five feet and include the length of the water service if located on private property. For larger meters that require a meter vault, a 35 feet by 35 feet easement is required. Actual easement widths may vary depending on the depth of the lines to be installed. Acceptable easements must be documented prior to approval of service.

Pro Rata: As described in this statement, the extension of public water and sanitary sewer lines may be eligible for partial reimbursement through the Pro Rata process as detailed in the Water Authority Water and Wastewater System Expansion Ordinance.

Pro Rata: Pro Rata is not owed and the property can utilize the services available upon completion of the requirements of this statement to connect to water and sanitary sewer.

Design and Construction: Design and construction of all required improvements will be at the developer/property owner's expense. Improvements must be coordinated through the City of Albuquerque via the Work Order process. Designs must be performed by a licensed, New Mexico registered, professional engineer. Construction must be performed by a licensed and bonded public utility contractor.

Utility Expansion Charge (UEC): In addition to installation and construction costs, any new metered water services will be subject to both water and sanitary sewer Utility Expansion Charges (UEC) payable at the time of service application. All charges and rates collected will be based on the ordinances and policies in effect at the time service is actually requested and authorized. Per the Rate Ordinance, each customer classification on the same premise requires a separate meter.

Contact Customer Service at (505) 842-9287 (option 3) for more information regarding account fees.

Water Use: All new commercial developments shall be subject to the requirements for water usage and water conservation requirements as defined by the Water Authority, particularly the Water Waste Reduction Ordinance. Where available, outdoor water usage shall utilize reclaimed water.

Closure: This availability statement provides a commitment from the Water Authority to provide services to the development, as long as identified conditions are met. It will remain in effect for a period of one year from the date of issue and applies only to the development identified herein. Its validity is, in part, contingent upon the continuing accuracy of the information supplied by the developer. Changes in the proposed development may require reevaluation of availability and should be brought to the attention of the Utility Development Section of the Water Authority as soon as possible.

Please feel free to contact Mr. Kristopher Cadena in our Utility Development Section at (505) 289-3301 or email at kcadena@abcwua.org if you have questions regarding the information presented herein or need additional information.

Sincerely,

Mark S. Sanchez

Dear Chair Wolfley:

The purpose of this letter is to request approval of a Site Plan – DRB for an approximately 9.7-acre site located at the east side of 94th Street NW north of Bluewater Road. The property is the northern portion of the tract legally described as Tract 9 of the Avalon Subdivision Unit 5, which contains a total of 16.1 acres. A replat will be processed concurrently with this site plan request to subdivide the existing tract and create the parcel for this development. A second Site Plan – DRB request is being made for the remaining southern portion of the property as well. This request is for approval of an approximately 150,000 square foot building that is anticipated to be occupied by warehouse and wholesaling and distribution uses. Because the property is over 5 acres and the development contains more than 50,000 square feet of building, it meets the applicability thresholds for review by the Development Review Board (DRB).

Industrial real estate in the Albuquerque market is at all time low vacancy rates, and development of this project will fill a need for new and expanding companies entering the market or looking for more space than currently available to them. Further, the growth in E-Commerce continues to drive the need for quality, new warehousing and distribution space.

LAND USE AND ZONING

The site is located on the west side of Albuquerque south of Interstate 40 between Unser Boulevard and 98th Street. The Avalon neighborhood is located to the south and east of the subject site along Bluewater Road. A multi-family residential development is located immediately to the east. Other surrounding properties, and the subject site itself, are zoned NR-BP: Non-residential Business Park, which allows the proposed uses permissively.

Figure 2. Zoning

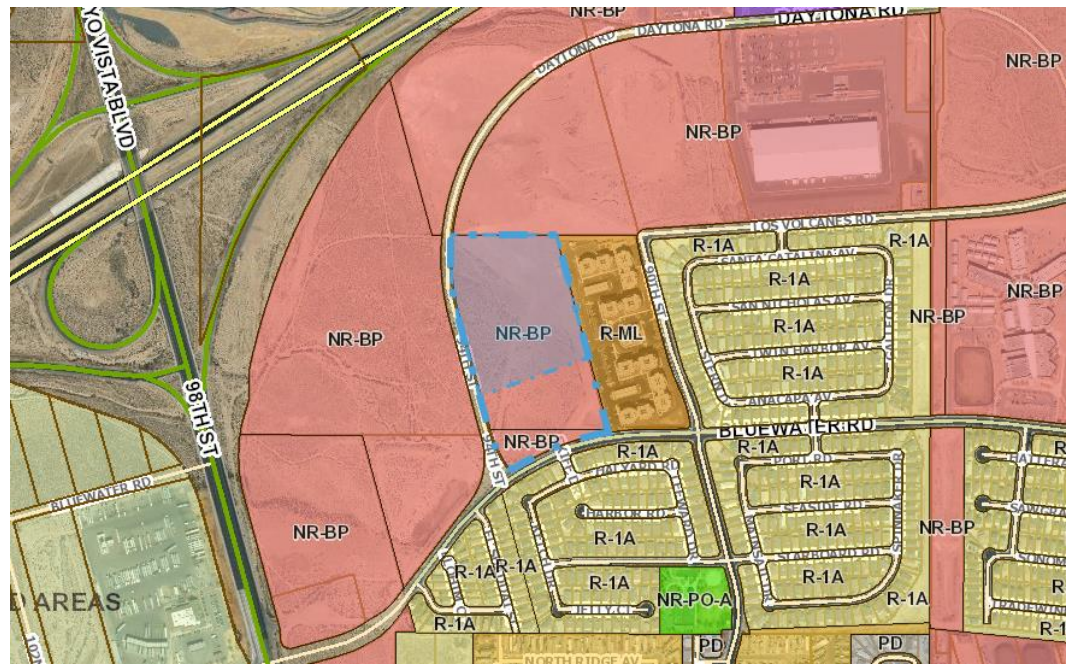

Figure 3. Land Use

REQUEST

As mentioned earlier, the request is for approval of a Site Plan – DRB for development of an approximately 150,000 square foot light industrial building along with necessary parking, landscaping, drainage, and truck maneuvering areas. Proposed loading areas and truck parking is at the rear (east) side of the building as required by the IDO to locate these functions away from the adjacent streets.

INTEGRATED DEVELOPMENT ORDINANCE (IDO) CRITERIA:

Because the proposed development meets the thresholds for review and approval by the DRB, it must meet the requirements in IDO Section 6-6(l)(3) Review and Decision Criteria. Responses to Section 6-6(l)(3) are outlined below.

6-6(l)(3)(a) The Site Plan complies with all applicable provisions of this IDO, the DPM, other adopted City regulations, and any conditions specifically applied to development of the property in a prior permit or approval affecting the property.

Applicant Response: The proposed uses of the property are permissive in the NR-BP zone district. There are no Overlay zones, Small Area regulations, or proximity to Major Public Open space that add additional restrictions or procedural requirements to the proposed project above the Development Standards of the IDO. The proposed building meets the dimensional standards of the applicable Table 5-1-3.

This application includes a sensitive lands analysis and archaeological certificate confirming that the proposed development meets the requirements of the IDO in these respects. The site is not in a location applicable to the cumulative impacts analysis.

The development meets the minimum parking requirements of the IDO, as well as includes the necessary pedestrian connection to the adjacent public right-of-way.

A significant amount of landscaping is being provided along the Daytona Road extension (94th Street) in accordance with the IDO and to improve the visual appearance to passersby. In addition, due to the abutting multi-family residential use to the east, special edge buffer landscaping is required and provided along the rear edge of the property. This buffer includes numerous trees, including many evergreens, that will create a visual screen between the properties in addition to an existing 8-foot-tall wall that was installed on the multi-family property.

Lastly, regarding building design, the request meets the minimum standards of IDO Section 5-11(E)(2)(a). Because the site is not located in a special area, no additional requirements apply beyond the general standards.

6-6(I)(3)(b) The City's existing infrastructure and public improvements, including but not limited to its street, trail, drainage, and sidewalk systems, have adequate capacity to serve the proposed development, and any burdens on those systems have been mitigated to the maximum extent practicable.

Applicant Response: There is existing infrastructure to serve the proposed development, including the recent extension of Bluewater Road to 98th Street. This development includes the installation of additional infrastructure along its frontages, including public sidewalks and construction of Daytona Road (94th Street) heading north where it will connect with the existing portion of Daytona as a bypass around the Avalon neighborhood. This design is intentional and was encouraged by the Avalon neighborhood during initial discussions with them when the land was originally replatted in 2014. As part of a larger development area, the site is included in a traffic study that has been reviewed and approved by the City of Albuquerque, which includes specific requirements and mitigation measures that ensure the surrounding road network has the necessary capacity and functions with the proposed uses and development.

In addition to the transportation infrastructure, this development will obtain approval of a conceptual grading and drainage plan and water and sewer availability that will ensure drainage and utility infrastructure can handle the proposed development. If any expansion, extension, or other change to these infrastructure systems are required because of this development, the developer will be required to complete those expansions as a condition of development, thus mitigating the impacts to the maximum extent practicable.

6-6(I)(3)(c) If the subject property is within an approved Master Development Plan, the Site Plan shall meet any relevant standards in the Master Development Plan in addition to any standards applicable in the zone district the subject property is in.

Applicant Response: The subject property is not located within an approved Master Development Plan area. Per IDO Section 2-5(B)(3)(e), as a property less than 20 acres, the subject site can be subdivided, and development approved through a Site Plan per the applicability and procedures of the relevant section of the IDO. As described earlier, due to the size of the proposed project, Site Plan – DRB is the applicable approval process, and the current request satisfies the requirements of the NR-BP zone district.

CONCLUSION

Based upon the information provided above and supporting documents, we respectfully request the DRB's review and approval of the proposed Site Plan. Please do not hesitate to contact me if you have any questions or need any additional information.

Sincerely,

Michael J. Vos, AICP
Senior Planner

Subdivide property and develop ~150,000 sf industrial/warehouse/distribution building on north portion and ~60,000 sf building on south portion.

QUESTIONS OR CONCERNS (Please be specific so that our staff can do the appropriate research)

Applicant is proposing two separate site plans, one for each building, as the lots may be sold separately in the future.

Any concerns with this, assuming the existing lot will be platted to match proposed site plan boundaries?

If light manufacturing is not an initial tenant in proposed building(s) and a 20-foot buffer is provided next to the adjacent multi-family residential as required by the IDO, and a manufacturing use wants to come in later, would the buffer need to be expanded at that time to accommodate the 25-foot industrial buffer? If the buffer is not able to be provided/expanded to the 25-foot width, would it preclude/prohibit the future change of use to manufacturing (variance option notwithstanding)?

Any other concerns from staff?

Dear Neighbors,

This email is notification that Titan Development and Consensus Planning are preparing two applications for Site Plans to be reviewed and approved by the Development Review Board (DRB) for the property located at the northeast corner of Bluewater Road and 94th Street NW located west of the Village at Avalon Apartment Community.

The property is currently one parcel, Tract 9 of the Avalon Subdivision, containing approximately 16.1 acres. A subdivision of land will be prepared to split the property into two lots for development of two light industrial/distribution buildings, each on its own site plan. A conceptual plan showing both buildings is included in the attached information packet.

The site plan for the southern lot will be for an approximately 60,000 square foot building with potential for future expansion, and the northern lot is anticipated to be developed with an approximately 150,000 square foot building. The buildings will each be ±44 feet tall. Each site plan will include the required truck loading areas, car parking, landscaping, and buffering, as required by the City's Integrated Development Ordinance (IDO).

As part of the IDO requirements, we are providing you an opportunity to discuss the project prior to submittal. Should you have any questions or if you would like to request a meeting regarding this pending application, please do not hesitate to email me at vos@consensusplanning.com or contact us by phone at 505-764-9801. Per City requirements, you have 15 days or until October 2, 2021 to request a meeting. Representatives of Titan Development are also copied on this email, so feel free to reply all with any requests for additional information.

SIGN POSTING AGREEMENT

REQUIREMENTS

POSTING SIGNS ANNOUNCING PUBLIC HEARINGS

All persons making application to the City under the requirements and procedures established by the Integrated Development Ordinance are responsible for the posting and maintaining of one or more signs on the property which is subject to the application, as shown in Table 6-1-1. Vacations of public rights-of-way (if the way has been in use) also require signs. Waterproof signs are provided at the time of application for a \$10 fee per sign. If the application is mailed, you must still stop at the Development Services Front Counter to pick up the sign(s).

The applicant is responsible for ensuring that the signs remain posted throughout the 15-day period prior to any public meeting or hearing. Failure to maintain the signs during this entire period may be cause for deferral or denial of the application. Replacement signs for those lost or damaged are available from the Development Services Front Counter.

1. LOCATION

- A. The sign shall be conspicuously located. It shall be located within twenty feet of the public sidewalk (or edge of public street). Staff may indicate a specific location.
- B. The face of the sign shall be parallel to the street, and the bottom of the sign shall be at least two feet from the ground.
- C. No barrier shall prevent a person from coming within five feet of the sign to read it.

2. NUMBER

- A. One sign shall be posted on each paved street frontage. Signs may be required on unpaved street frontages.
- B. If the land does not abut a public street, then, in addition to a sign placed on the property, a sign shall be placed on and at the edge of the public right-of-way of the nearest paved City street. Such a sign must direct readers toward the subject property by an arrow and an indication of distance.

3. PHYSICAL POSTING

- A. A heavy stake with two crossbars or a full plywood backing works best to keep the sign in place, especially during high winds.
- B. Large headed nails or staples are best for attaching signs to a post or backing; the sign tears out less easily.

4. TIME

Signs must be posted from _____ To _____

5. REMOVAL

- A. The sign is not to be removed before the initial hearing on the request.
- B. The sign should be removed within five (5) days after the initial hearing.

I have read this sheet and discussed it with the Development Services Front Counter Staff. I understand (A) my obligation to keep the sign(s) posted for (15) days and (B) where the sign(s) are to be located. I am being given a copy of this sheet.

SITE PLAN CHECKLIST

Project #: PR-2021-006070 Application #: _____

This checklist will be used to verify the completeness of site plans submitted for review by the Planning Department. **Because development proposals vary in type and scale, there may be submittal requirements that are not specified here. Also there may additional requirements if a site is located in CPO, HPO, and/or VPO or if located in DT-UC-MS or PT areas. See the IDO or AGIS for boundaries.** Nonetheless, applicants are responsible for providing a complete submittal. Certification as specified below is required.

I CERTIFY THAT THE SUBMITTED SITE PLAN IS COMPLETE AND ACCURATE, AND THAT ALL APPLICABLE INFORMATION AS SPECIFIED IN THIS CHECKLIST IS PROVIDED. FURTHER, I UNDERSTAND THAT THIS APPLICATION IS BEING ACCEPTED PROVISIONALLY AND THAT INACCURATE AND/OR INCOMPLETE INFORMATION MAY RESULT IN THE SUBSEQUENT REJECTION OF THE APPLICATION OR IN A DELAY OF ONE MONTH OR MORE IN THE DATE THE APPLICATION IS SCHEDULED FOR PUBLIC HEARING.

 11/5/21

GENERAL LANDSCAPE NOTES

IRRIGATION:
IRRIGATION SYSTEM STANDARDS OUTLINED IN THE WATER CONSERVATION LANDSCAPING AND WATER WASTE ORDINANCE SHALL BE STRICTLY ADHERED TO. A FULLY AUTOMATED IRRIGATION SYSTEM WILL BE USED TO IRRIGATE TREE, SHRUB AND GROUND COVER PLANTING AREAS. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO ISOLATE PLANT MATERIAL ACCORDING TO SOLAR EXPOSURE AND WILL BE SET UP BY PLANT ZONES ACCORDING TO WATER REQUIREMENTS. THE TREES WILL BE PROVIDED WITH (6) 2 GPH EMITTERS, WITH THE ABILITY TO BE EXPANDED TO ACCOMMODATE THE GROWTH OF THE TREE. SHRUBS AND GROUNDCOVERS WILL BE PROVIDED WITH (2) 1 GPH EMITTERS. TREES, SHRUBS AND GROUNDCOVERS WILL BE GROUPED ON THE SAME VALVE.

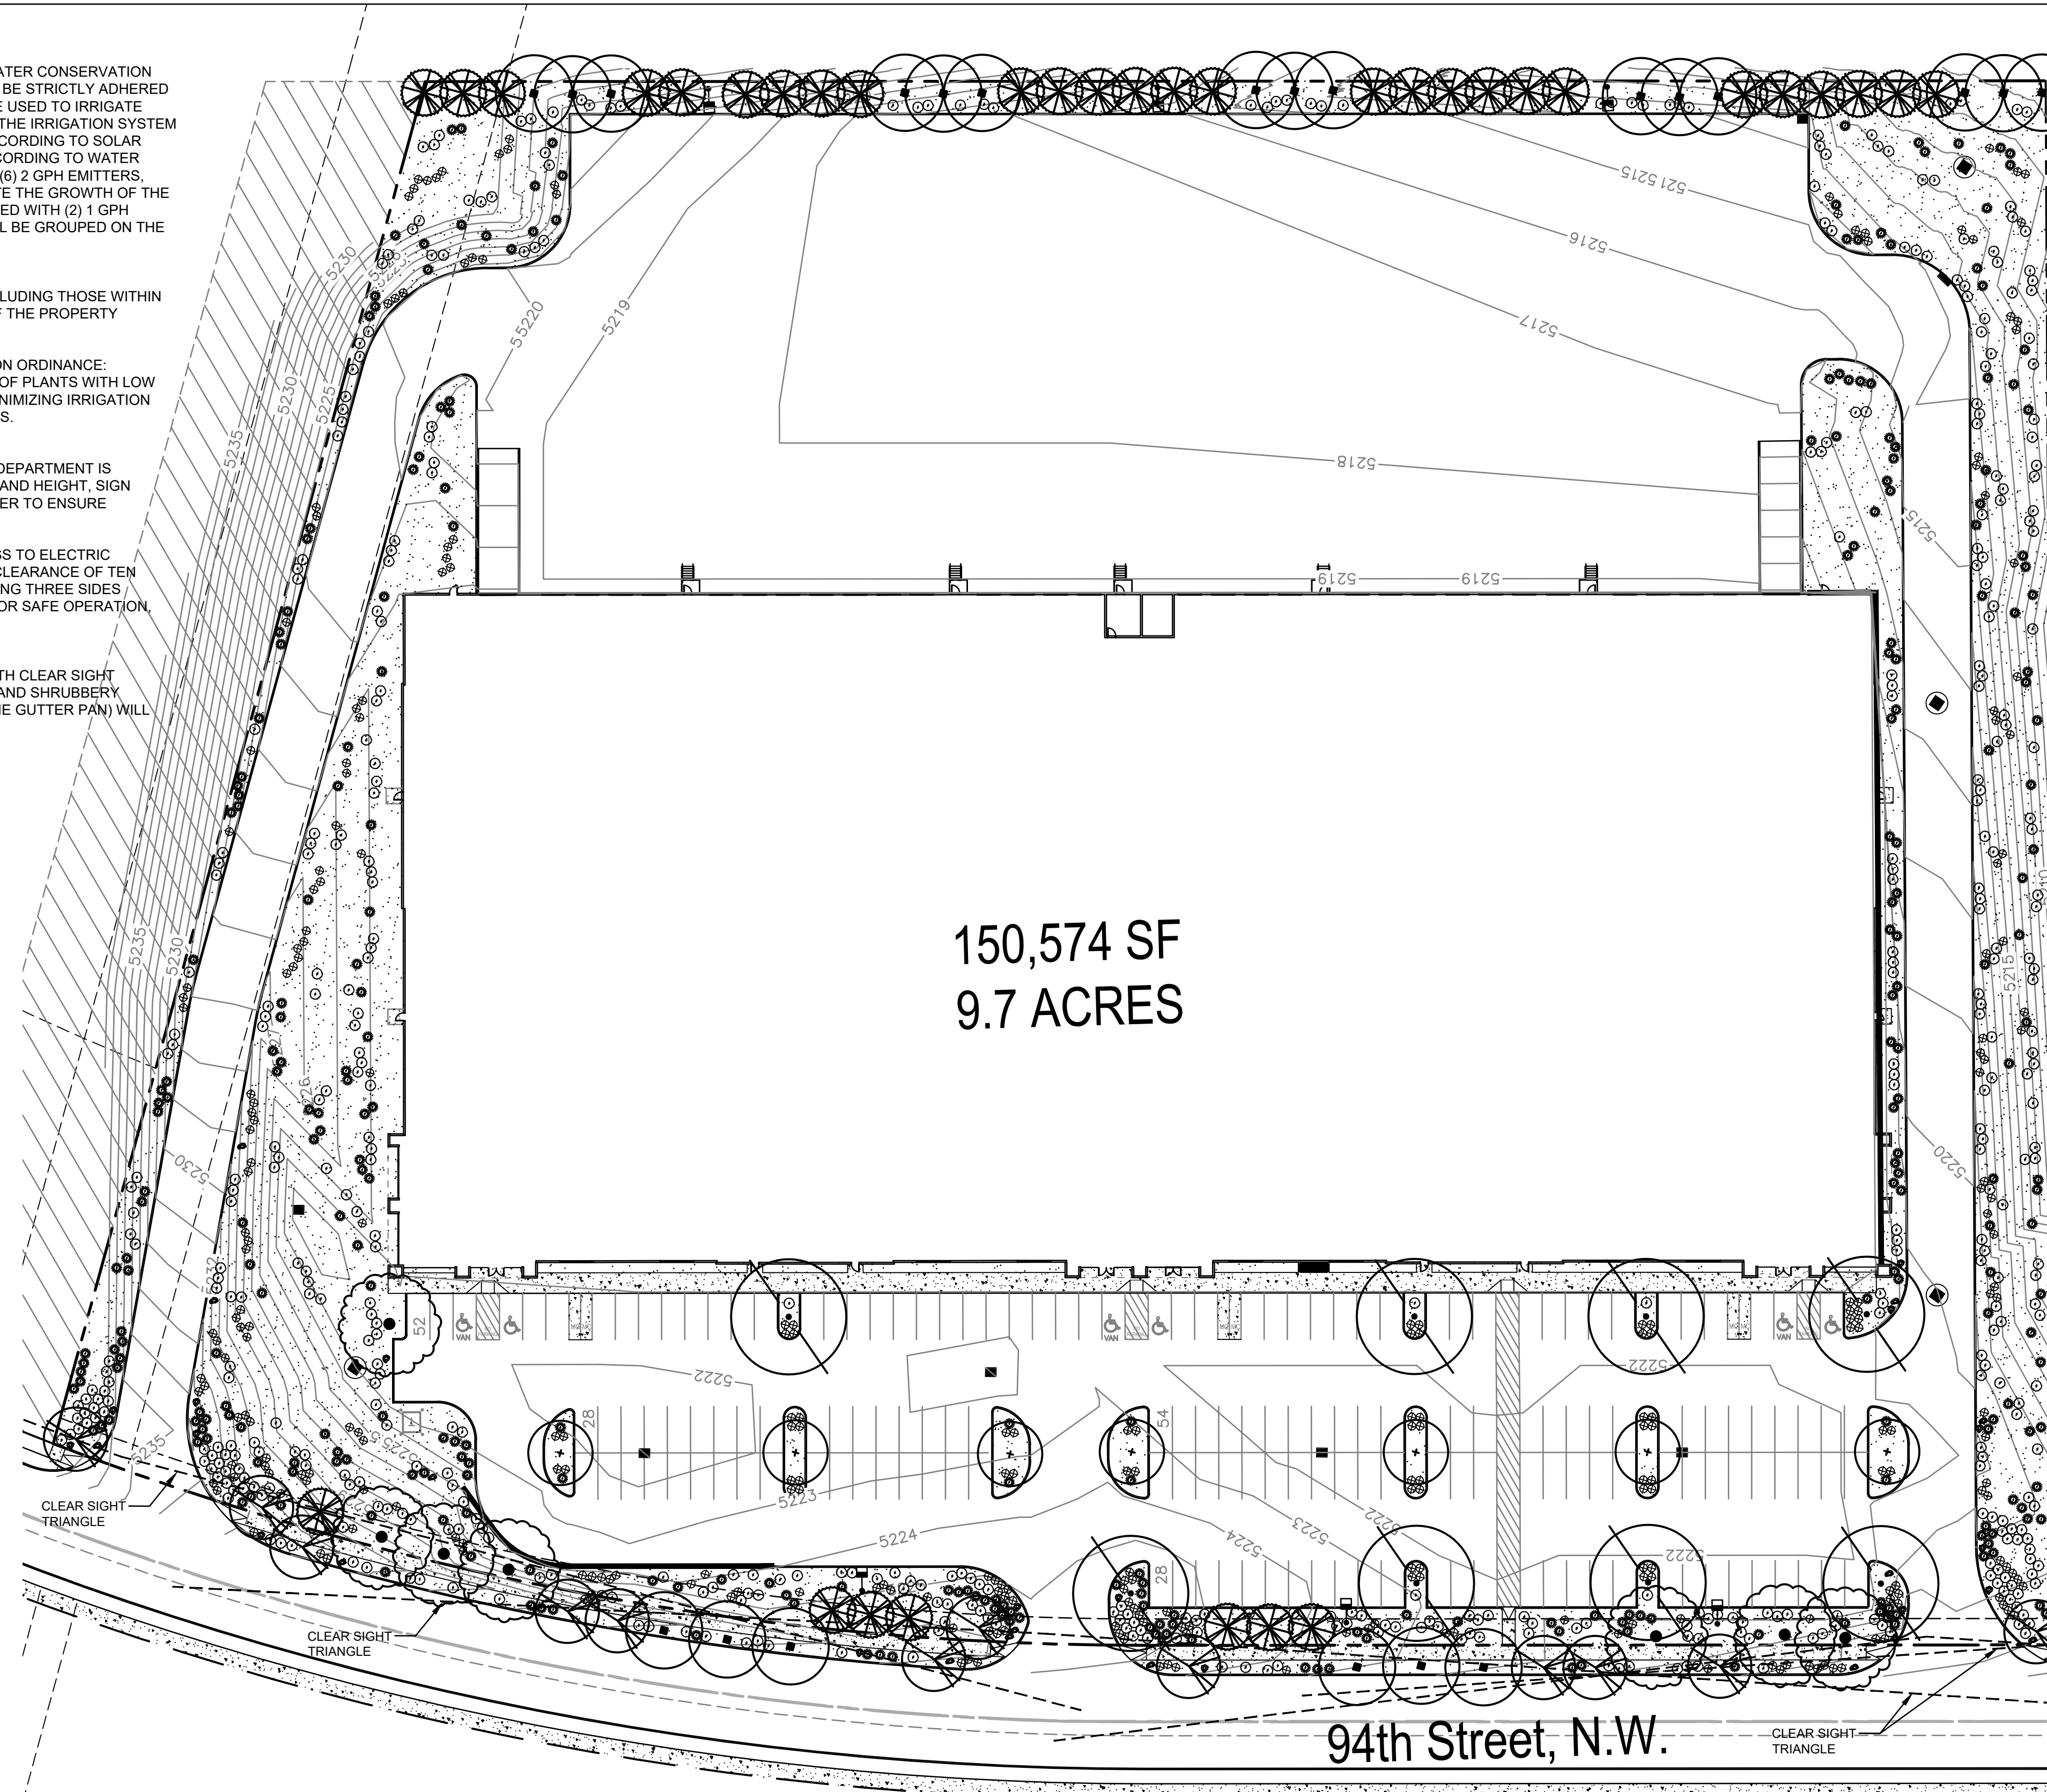

RESPONSIBILITY OF MAINTENANCE:
MAINTENANCE OF ALL PLANTING AND IRRIGATION, INCLUDING THOSE WITHIN THE PUBLIC R.O.W., SHALL BE THE RESPONSIBILITY OF THE PROPERTY OWNER.

METHOD FOR COMPLYING WITH WATER CONSERVATION ORDINANCE:
THE PLANT PALETTE IS PREDOMINANTLY COMPRISED OF PLANTS WITH LOW TO MEDIUM WATER USE REQUIREMENTS, THEREBY MINIMIZING IRRIGATION NEEDS WHILE ENSURING THE VIABILITY OF THE PLANTS.

PNM COORDINATION:
COORDINATION WITH PNM'S NEW SERVICE DELIVERY DEPARTMENT IS NECESSARY REGARDING PROPOSED TREE LOCATION AND HEIGHT, SIGN LOCATION AND HEIGHT, AND LIGHTING HEIGHT IN ORDER TO ENSURE SUFFICIENT SAFETY CLEARANCES.

SCREENING WILL BE DESIGNED TO ALLOW FOR ACCESS TO ELECTRIC UTILITIES. IT IS NECESSARY TO PROVIDE ADEQUATE CLEARANCE OF TEN FEET IN FRONT AND AT LEAST 5 FEET ON THE REMAINING THREE SIDES SURROUNDING ALL GROUND-MOUNTED EQUIPMENT FOR SAFE OPERATION, MAINTENANCE AND REPAIR PURPOSES.

CLEAR SIGHT DISTANCE:
LANDSCAPING AND SIGNAGE WILL NOT INTERFERE WITH CLEAR SIGHT REQUIREMENTS. THEREFORE, SIGNS, WALLS, TREES, AND SHRUBBERY BETWEEN 3 AND 8 FEET TALL (AS MEASURED FROM THE GUTTER PAN) WILL NOT BE ACCEPTABLE IN THE AREA.

EXISTING DRAINAGE

THIS SITE IS CURRENTLY VACANT AND IS LOCATED ON THE EAST SIDE OF DAYTONA ROAD JUST NORTH OF THE BLUEWATER RD. THE SITE IS BOUNDED BY ROADS ON THE WEST SIDE AND A MULTIFAMILY DEVELOPMENT ON THE EAST SIDE AND VACANT PROPERTY ON THE NORTH AND SOUTH SIDES. IT CONTAINS APPROXIMATELY 9.69 ACRES. THE SITE GENERALLY DRAINS FROM NORTHWEST TO SOUTHWEST WITH MOST OF IT DRAINING INTO THE ADJACENT SITE WHICH DRAINS TO BLUEWATER ROAD EXISTING STORM DRAIN. ACCORDING TO AN APPROVED MASTER DRAINAGE PLAN (K09D041) COMPLETED BY BOHANNAN HUSTON INC. THE ALLOWABLE DEVELOPED DISCHARGE FROM THE SITE IS 1.5 CFS PER ACRE. THE SITE IS NOT LOCATED WITHIN A FLOOD PLAIN AS SHOWN ON THE FIRM MAP. THERE ARE OFFSITE FLOWS THAT ENTER THE SITE FROM THE NORTH.

PROPOSED DRAINAGE

THE SITE WILL DRAIN TO THE SOUTHEAST CORNER OF THE SITE INTO A PROPOSED STORM DRAIN WHICH WILL ROUTE THE FLOWS TO A PROPOSED DETENTION POND. SENSITIVE LANDS ANALYSIS**

Dear Ms. Wolfley:

Tierra West, LLC has performed a Sensitive Lands Analysis Report as required under the Integrated Development Ordinance (IDO) Section 5-2(C) for new subdivisions of land, documenting the following:

Item:	Presence:	Commentary:
Floodplains and Flood Hazard	None	See attached Firmette showing no flood plain present
Steep Slopes	None	See attached conceptual grading and drainage plan with topographic survey
Unstable Soils	None	Based on geotech reports from adjacent sites in the area of this project, existing on site soils should be suitable for engineered fills.
Wetlands (Constant supply of water)	None	See attached Firmette showing no flood plain present. Attached conceptual grading and drainage plan anticipates a drainage pond in the southeast corner of the site to attenuate runoff prior to it entering an existing storm sewer in Bluewater Rd.
Arroyo	None	See attached topographic survey. No arroyos present
Irrigation Facilities	None	See attached topographic survey. No irrigation facilities identified.
Escarpment	None	See attached grading and drainage plan with topographic survey. No areas of escarpment identified.
Large stands of mature trees	None	No existing mature trees noted on site.
Archeological sites	None	No archaeological issues have been uncovered. See attached Certificate of No Effect from City Archaeologist Dated 10/4/21.
