

Good Morning,

We are all just busy heads spinning with the news the holiday that children heavy truck traffic is prohibited on 10th St specifically non-residential vehicles access to another than 10th St is restricted. 10th St is narrow, with weight restrictions, and is residential. You all know this.

The other day we watched a very large dump truck attempting to make its way to the site, couldn't make it this because, as we've said all along, 10th St isn't wide enough. He then proceeded to back his way down the street in Lomas and go around to the site, all while parents were also trying to park on 10th St to pick up/bring off their elementary aged children from Maricopa City School. And then there's the 10th St residents also attempting to utilize our street, the street we live on. It's a safety issue, an accident and injury waiting to happen. You all know this.

We are open to more of children's educational, drop trucks, and all heavy equipment not exceeding from Council 10th St we never designed for the type of traffic. You all know this.

Please let me hear from you I appreciate your time. Thank you.

Respectfully,
John Smith
Council 10th St WVA
