Re: Sketch Plat Review – 8901 Modesto Ave NE, Lot 20, Block 17, Tract 1, Unit 3, North Albuquerque Acres

Dear Facilitation Team Members:

I'm submitting this application for sketch plat review on behalf of myself as applicant/owner. Although this is an existing platted parcel and I have no need or desire to subdivide or replat the property, I have been told that dedication of right-of-way may be required as a condition of building permit approval for existing lots within North Albuquerque Acres. I also understand that there may be public infrastructure required. Accordingly, I'm submitting this application in order to help define the requirements for building a home on the subject property. Below are questions that I'm submitting with this application:

- 1. Is a replat of the lot required in order to formally dedicate Right-of-Way for Modesto? If so, how and when does the city determine that this is required given that it apparently has not been required in other similar cases such as 8750 Eagle Rock (Lot 9, Block 2, Tract 3 Unit 3 NAA, City Hydro File C20D088)? That lot was approved by city hydrology for permanent CO in October of this year, but there is no recorded plat or recorded infrastructure improvements agreement.
- 2. If R/W dedication is required, can it be accomplished via a quitclaim deed in favor of the city rather than a formal plat process?
- 3. If a plat is required, what public infrastructure improvements will be required as a condition of plat approval?
- 4. Is it possible to request a waiver of sidewalk and/or curb & gutter requirements? Under what conditions are such waivers normally approved?
- 5. The lot contains a small natural arroyo that is not within a FEMA floodplain. Will a drainage easement for the natural arroyo be required as a condition of plat approval?

In addition to the questions above, if there is additional information or other requirements that I should be aware of
prior to moving forward with development of formal applications for approval, please advise me of such information
through this sketch plat process.

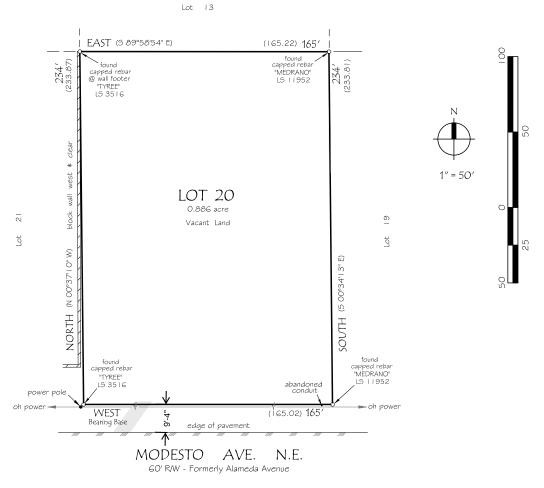

Sincerely,			

Bruce Stidworthy, PE,

Sketch Plat
