RE: Porous Asphalt
D&B U Sell It
8531 Bluewater Rd. NW
Albuquerque, NM 87121

We are currently working with Concrete, Aggregate & Asphalt Testing, LLC., Western Technologies, Inc. and Vulcan Materials company on this specific mix design. This product is not a mix currently used in New Mexico so Vulcan Materials will be gathering information from one of their plants in southern California to collect data and see what needs to be done to create this special hot mix for porous asphalt here in New Mexico. This team of experts will work together to create a drivable mix design using New Mexico aggregates. We will submit the data and mix specifications to the City of Albuquerque for review and acceptance as soon as possible.

If you have any questions, feel free to contact me by email at joey@allianceconinc.com.

Thank you,

Joey Sedillo, Project Manager
Alliance Paving, Inc.
