Subject: Request for Replatting of Parcel

Dear Planning Department,

I am writing to formally request the replatting of my parcel to clearly delineate it as a separate property from the adjacent parcel. Although both properties currently have distinct legal descriptions and ownership, city records show them combined as a single elongated lot. This has led to issues such as lost mail and other administrative inconveniences.

Resolving this issue through replatting would significantly benefit not only us as current owners but also future property owners and subsequent generations, by simplifying property management and administrative processes.

We are fully committed to cooperating with our neighbor to ensure an efficient and agreeable resolution to this matter.

Thank you for your consideration. Please feel free to reach out if you need any additional information.

Sincerely,

David Vilar
