Re: Seville Estates Subdivision Grading & Drainage Plan, ZAP A-10
Engineer's Stamp Dated September 30, 2003

Dear Mr. Bohannon:

AMAFCA received the revised plan and offers the following comments:

1. It is not necessary to have both a water quality manhole and inlet. In this case, the flows are small enough so that a water quality inlet will suffice.
2. Show the existing drop structure in the Calabacillas Arroyo.
3. AMAFCA recommends a more direct storm drain alignment to the arroyo (see attached) that will not require manholes.

If you have any questions, please call me at 884-2215.

Sincerely,
AMAFCA

Lynn M. Mazur, P.E.
Development Review Engineer
