Good morning Les,

I am a new hire with City of Albuquerque Stormwater program.

The following issues were observed on February 07, 2019:

1. Please provide a stabilized construction entrance to your site. The current access to the site utilizes a drive pad to the north, see photo EastAccessEntrance. The track out in the street will require cleaning as well.
2. The NorthSiltFence photo: Please reinstall the silt fence per approved methods on the north side of the site.
 - a. This photo also shows domestic and construction trash within the site. Please provide a dumpster, with the ability to cover when not in use, for onsite refuse.
3. Track out: Please clean track out in the street.
4. Notification of NPDES from public right-of-way is required; please post and install.

I am also in receipt of inspections reports; please e-mail the last inspection report for the project file.

Standard mitigation time frame is approximately seven days from inspection. If you have and questions feel free to e-mail me or call: (505-803-6155).

Regards,

Timothy Sims
