This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all planimetric features outside Coastal base flood elevations apoly only landward of 0.0 NGVD, and include the effects of wave action; these elevations may also differ significantly from those developed by the National Weather Service for hurricane

evacuation planning. Areas of Special Flood Hazard (10-year flood) include Zones A, AE, AH, AO, Certain areas not in Special Food Hazard Areas may be protected by

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Floodway widths are provides in the Flood Insurance Study Report. This map may incorporate approximate boundaries of Coastal Barrier Resource System Units and c Otherwise Protected Areas established under the Coastal Barrier Improvement Act of 1990 (PL 101–591). Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsection to the issuance of this map. For community map revision story prior to countywide mapping, see Section 6.0 of the Flood Insurance Study Report.
