

## **Cherne, Curtis**

---

**To:** Vince Carrica  
**Subject:** Unser pond details

Vince,  
I heard from Wilfred.

The wall on the east side of the pond is to be a continuous concrete floodwall-no block and be waterproofed. The top of footer as a minimum should be below the pond bottom and below the footer of the garden wall to the east. Is there a seepage concern that may affect existing structures?

There is a maintenance concern with the annulus between the walls. Wilfred says he needs at least 6.5 feet to get a skid steer in there. Or the area could be capped so there is no annulus.

As mentioned earlier, the detail of this area is to be on the Grading Plan.
