*Planning Department*  
David Campbell, Director

*Mayor Timothy M. Keller*

October 23, 2018

Diane Hoelzer, P.E.  
Mark Goodwin & Associates  
PO Box 90606  
Albuquerque, NM 87199

**RE: Tierra Serena (Glendesto) Subdivision**  
**Drainage Supplement Stamp Date: 10/15/18**  
**Hydrology File: B18D020**

Dear Ms. Hoelzer:

Based on the submittal received on 10/15/18, the above referenced submittal is re-approved for Work Order.

PO Box 1293

If you have any questions, please contact me at 924-3695 or [dpeterson@cabq.gov](mailto:dpeterson@cabq.gov).

Albuquerque

Sincerely,

NM 87103

Dana Peterson, P.E.  
Senior Engineer, Planning Dept.  
Development Review Services

**Supplemental Information  
to  
Approved Drainage Management Plan  
Glendesto Subdivision  
(A.K.A. Tierra Serena Subdivision)  
(27 lots)**

**Prepared by  
Mark Goodwin & Associates, P.A.**

**October 2018**

**I.           Revisions to Stormwater Management Plan on Glendale Avenue**

*After plans were approved and construction had commenced, City Engineers requested that the developer consider a redesign to replace the roadside shotcrete swale with a curb and gutter and pavement section to carry the runoff to two new inlets placed at the end of Glendale Avenue near San Pedro.*

*Subsequent to this redesign, City Hydrology stated that they wanted all of the storm runoff to be intercepted into the Double D inlet, not allowing any bypass runoff into San Pedro Avenue. In addition, transportation wanted a minimum pavement section of 12 feet F-E.*

*It was then decided that a curb opening / spillway into a short section of concrete channel would be the best solution for intercepting the runoff in Glendale into the existing double D inlet. A velocity vector analysis indicates that a 30 foot wide opening should intercept the 100 year (25.47 cfs) flow in Glendale Avenue into the roadside concrete channel. The plans have been revised and the accompanying calculations are being submitted with this report.*

SHEET \_\_\_\_\_ OF \_\_\_\_\_

### VELOCITY VECTOR (100 YEAR)

$$d = \sqrt{(2.13)^2 + (2.0)^2} = 2.92$$

$$V_{100} = 4.70 \text{ fps}$$

$$\frac{4.70}{2.92} (2.13x + 2.00y) = 3.428x + 3.219y$$

$$\text{TOP WIDTH} = 23.14 \text{ ft.}$$

### VELOCITY VECTOR (10 YEAR)

$$d = 2.92$$

$$V_{10} = 4.24 \text{ fps}$$

$$\frac{4.24}{2.92} (2.13x + 2.00y) = 3.093x + 2.904y$$

$$\text{TOP WIDTH} = 17.61 \text{ ft.}$$

A boat travels at  $7 \text{ km h}^{-1}$  in the direction of the vector  $-6\mathbf{i} + 8\mathbf{j}$ . Find the velocity of the boat.

$$\text{let } \underline{d} = -6\underline{i} + 8\underline{j}$$

$$\begin{aligned}\therefore |\underline{d}| &= \sqrt{6^2 + 8^2} \\ &= \sqrt{100} \\ &= 10\end{aligned}$$

$$\begin{aligned}\therefore \text{velocity } \underline{v} &= \frac{7}{10} (-6\underline{i} + 8\underline{j}) \\ &= -4.2\underline{i} + 5.6\underline{j}\end{aligned}$$

$$\text{velocity} = \frac{\text{speed}}{\text{magnitude of the direction vector}} \times \text{direction vector}$$

<sup>1</sup> Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values.

SECTION 625  
SHOTCRETE

GENERAL

1. The work shall consist of construction of the shotcrete lining within the existing process, including mining, placing, finishing, setting and curing as shown in the contract documents with these specifications.
2. The equipment of Section 510 - Portland Cement Concrete shall apply except as modified herein. Shotcrete shall have a minimum compressive strength of 4,000 psi at 28 days. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
3. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

4. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
5. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

6. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
7. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

8. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
9. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

10. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
11. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

12. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
13. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

14. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
15. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

16. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
17. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

18. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
19. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

20. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
21. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

22. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
23. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

24. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
25. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

26. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
27. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

28. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
29. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

30. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
31. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.

32. Shotcrete shall be placed in a layer of 12" to 18" and shall be finished to a smooth surface.
