**RE: Valle Prado Subdivision, Units 4 and 5
Tr 6, The Trails Unit 3A
Drainage Report Stamp Date: 1/18/19
Grading Plan Stamp Date: 1/18/19
Hydrology File: C09D011**

Dear Ms. Padilla Moyer,

PO Box 1293

Based on the submittal received on 1/18/19 the above-referenced Drainage Report and Grading Plan cannot be approved until the following are corrected:

Albuquerque

1. The proposed subbasin map and drainage analysis should reflect Valle Prado Unit 3 conditions. This unit revised some of the basins in 2015 (Drainage Report for Valle Prado Unit 3, BHI, March 2015, Hydrology File: C09D011A) and has since been built out and accepted.

NM 87103

2. The Basin B and Basin C delineations are not supported by the grading plan in the vicinity of Sandmark Rd/Two Rock Rd intersection and South Sky St/Two Rock Rd intersection. Either revise the basin delineations and drainage analysis to match the grading plan or visa-versa. The locations of valley gutter and waterblocks will likely need to be adjusted.

www.cabq.gov

3. Please increase the density of existing and proposed contour labels along the external boundaries. The slope indicators appear to be reversed along the 4:1 tie-in slope.

4. Provide written and signed permission from the owner of Tract OS-2 for the grading on their property (along the north side of Valle Prado Unit 5). If the retaining wall behind lots 10-16, Unit 5 will encroach, you should get this permission as well.

5. How will Lot 16, Unit 5 convey flows from Tract OS-2 to the public road? Provide a detail or section. How will this property be protected from offsite flows and does it need a cross lot drainage easement or separate tract for the runoff?

6. For Information. Prior to Unit 4 ROFG, a temporary drainage easement on the temporary ponds will be needed, unless the upstream road portions have been built.

CITY OF ALBUQUERQUE

Planning Department
David Campbell, Director

Mayor Timothy M. Keller

7. Identify internal retaining walls to be constructed by the developer (prior to Pad Cert) and those to be deferred to homebuilder. Any wall retaining 2 feet or more will need to be constructed by the developer (i.e prior to Pad Cert); less than 2 feet retained can be deferred to homebuilder.
 8. Along all external boundaries, provide sections showing any proposed retaining walls, the property line, and existing and proposed grades. Include diversion channels and berms if present. In accordance with DPM Ch.22, section 5 part B, grading and wall construction near the property line may not endanger adjacent property or constrain its use. Ensure that the retaining walls (including footers) do not encroach on neighboring property or public ROW.
 9. Also provide sections for the walls along Woodmont Ave, Sandmark Rd, and Redbloom Rd. If any of these footers encroach, a revocable permit will be required.
 10. This project requires an ESC Plan, submitted to the Stormwater Quality Engineer (Curtis Cherne PE, ccherne@cabq.gov or 924-3420). We have old ESC Plans for Units 1-3, but nothing for Units 4-5.
 11. Include a typical lot grading detail on the Grading Plan presumably showing that all of the backyards that drain to the streets via sideyard swales.
 12. Show the storm drain on the new subbasin exhibit.
 13. Provide street capacity calculations for Woodmont, anticipating the final builtout.
- If you have any questions, please contact me at 924-3695 or dpeterson@cabq.gov.

I. PURPOSE

This report will serve as Amendment No. 1 to the Drainage Management Plan for Valle Prado @ the Trails Unit 3A, June 2014, which was originally prepared for Woodmont Paseo, LLC. The owners of the property have changed at is now owned by PV Trail Albuquerque LLC and this amendment is submitted on their behalf. The original DMP stated above provides drainage analysis to support proposed site-specific drainage infrastructure for Valle Prado Unit 1 and 2 and The Trail Unit 3A. In this report the future phases 4 and 5 were anticipated and included as future basins, Future Basins 1, 2 and 3. See enclosed Exhibit A for this original Basin Map from the original DMP. With the proposed development of Phases 4 and 5, the lotting plan has changed slightly with a decrease of lots in some basins and an increase in others. This amendment provides some additional calculation to show that the subdivision is below the allowable 100-yr 6yr storm event approved in the Master DMP. Included are the original AHYMO calculations (Appendix A) to show the original %D and runoff to be 58% and 19.93cfs, 54% and 13.54cfs and 55% and 10.79cfs. A new proposed Basin Map is provided for Phases 4 and 5 with the Basins renamed as a Basins A, B, and C (formerly named Future Basins 1, 2, and 3 respectively). The AHYMO files are also included for with the updated land treatment types due to the lot changes with the %D and runoff being 55.8% and 19.47cfs, 53.5% and 13.68cfs and 63% and 11.30cfs respectively. The total increase in flow is 0.19cfs from 44.26cfs to 44.45 cfs which is negligible. Also included in Appendix C are the street hydraulic calculations.

In regard to first flush requirements, Pond E, shown in Exhibit A, was designed to accommodate 0.9ac-ft of first flush discharge. The first flush pond was designed to accommodate all phases including the future phases. Per, the original DMP on page 3, excerpt provided in Appendix E, the first flush was calculation using 0.44' which could have been 0.34' as required at the time. The report indicates that the required volumes was 1.3 acft at the 0.44' but if the 0.34', which was the requirement at the time, was used the required volume would have been 1.0 ac ft. For reference, I have also included the certification for Pond E in Appendix E. Grading Plans for Phase 4 and 5 are included as Exhibits C & D.

In conclusion, as stated above there is little to no impact on the downstream improvements as the runoff is consistent with the original DMP and approval (the approval letter is provided in Appendix D).

RE: Valle Prado Units 1&2 - Tracts 9 and OS-3 (File: C09D011)
Drainage Report for Valle Prado at the Trails Units 3A,
Engineer's Stamp Date 6-24-2014
Revised Grading and Drainage Plans, Engineer's Stamp Date 7-10-2014
Supplemental Calculations, Engineer's Stamp Date 7-10-2014
Revised Inlet and Storm Drain Network Map, Received Stamp Date 7-10-2014
Revised Preliminary Plat, Received Stamp Date 7-10-2014

Dear Mr. Patterson:

Based upon the information provided in your submittals received 6-24-14 and 7-10-14, the above referenced submittals are approved for Grading Permit with the following exceptions:

PO Box 1293

On the G & D plans:

- 1) A cap should be shown on the Woodmont SD, east of South Sky Street on the Grading and Drainage plans, or at least on the As-builts.
- 2) The temporary pond should note that the Volume shown is for the developed flows only, and the undeveloped discharge calculations are part of another project.
- 3) On Sheet 1 of Grading and Drainage Plan, is that a wall between Lots 17 and 18?

Albuquerque

On the Inlet and SD Map:

- 4) A typo on the Inlet and SD Map shows Inlet #6 as "IN4"
- 5) Verify that the capacity for SDP6 is 269.5 cfs. It seems relatively high.
- 6) On the Fully Developed Basin Map, the basin boundary is missing between Basin 1 and 3
- 7) In the Drainage Report, page 2 has a typo in last paragraph and should be "...Basin 5 (3.1cfs), ..."
- 8) Resubmit the INROADS Storm Drain Network File(Appendix C), to be reflective of the of the current SD Map.

New Mexico 87103

APPENDIX E

FIRST FLUSH

Basins 1, 2, 3 & 5, Offsite Basin 3, Offsite Basin 4, Offsite Basin Well and Future Basins 1, 2 & 3 all drain to the proposed storm drain network located in South Sky Street, Red Bloom Road and Sandmark Road. This storm drain network combines with flows from the existing storm drain network in Woodmont Avenue and discharges into Pond E. Pond E has an available storage volume capacity of 6.4 ac-ft. and a maximum developed volume of 5.9 ac-ft. The first flush retention for the upstream basins that enter Pond E was calculated to need a volume of 1.3 ac-ft. This was done by calculating the cumulative impervious land treatment of the upstream basins (Basins E1.1, E1.2, E.2, E4 and E6 from the DMP as well as the basins listed in the beginning of the paragraph) for a %D of 47%. This is multiplied by 0.44' and then the corresponding area of 75.6 ac, which results in 1.3 ac-ft. Due to the existing infrastructure constraints, Pond E is able to achieve 0.9 ac-ft. of first flush volume, while having a maximum discharge of $Q=21.2$ cfs which is below that allowable discharge of $Q=22.3$ cfs as defined in the DMP. The maximum discharge from Pond E is accomplished by using a standpipe in the pond to control the outflow. Due to all of the upstream flows being conveyed through Pond E, the existing 12" orifice plate located at AP-E per the DMP that currently limits the developed flows downstream is not needed and shall be removed.

A portion of Basin 4 and Future Basin 4 are intercepted by inlets located in Two Rock Road. These flows ($Q=6.2$ cfs) are conveyed north to an existing temporary pond. A temporary berm will be placed on the south side of the temporary pond to increase its capacity. In the future, this storm drain network will tie to an existing storm drain network located in Treeline Avenue. The remaining flows from Basin 4 and Future Basin 4 combine with flows from Offsite Basin 2 and enter a proposed retention pond that is located in Offsite Basin 2, just southeast of Two Rock Road.

In the interim condition, Valle Prado Unit 1, desiltation ponds will be placed just upstream of Red Bloom Road, Sandmark Road and South Sky St. These temporary ponds have been designed as a desiltation pond which will remove sedimentation before they enter the downstream streets.

V. CONCLUSION

This report provides a detailed study of the developed runoff and street capacities for the proposed Valle Prado Units 1 and 2 at the Trails Unit 3A Subdivision. Included is the preliminary plat, basin map, grading plan, and all necessary hydrologic and hydraulic analyses. The proposed drainage plan for Valle Prado Units 1 and 2 can be safely conveyed by the existing and proposed improvements in this drainage plan. This drainage

Re: Grading and Drainage Certification, Valle Prado Unit 1
DRB Case No. 1004404, (C09/D011)

Dear Rita:

We are submitting the final grading and drainage certification for Valle Prado Unit 1. Enclosed for your review is the approved grading and drainage plan dated 11/19/14, with as-built elevations for Unit 1 and Pond E. The Unit 1 lots have been graded, and curb and gutter, pavement and storm drain improvements have been constructed. Grading of the Unit 2 lots and public infrastructure has not been completed. The Unit 2 lots will be certified once grading and construction of improvements has been completed.

The Valle Prado Addendum #2 AHYMO analysis, which removed offsite Pond 2, dated 11/19/14, has been updated with a revised stage-storage-discharge curve for Pond E based on the as-built grades for Pond E. The table below shows a comparison of the Pond E operations from Addendum #2 and the as-built condition.

POND E SUMMARY		
Description	Addendum #2	As-built Condition
Peak Inflow, cfs	180.6	182.7
Time to Peak, hrs	1.5	1.5
Peak Outflow, cfs	20.9	21.3
Time to Peak, hrs	2.5	2.5
Max Water Surface, feet	5451.57	5451.67
Storage Volume, ac-ft	6.59	6.53
Peak Flow AP-E, cfs	21.8	22.3
Time to Peak, hrs	2.0	2.0

The as-built Pond E analysis results in a peak discharge at Analysis Point E of 22.3 cfs, which matches the allowed discharge in the Trails Units 1-3 DMP of 22.3 cfs. The results of this analysis show that Pond E functions per the intent of the design in the Valle Prado Units 1 and 2 Drainage Report Addendum #2, dated 11/19/14 and meets the requirements of the Trails DMP.

Advanced Technologies ▲

Rita Harmon, P.E.
Planning Department
April 23, 2015
Page 2

The final certification was originally submitted to City Hydrology on February 24, 2015. Curtis Cherne provided a comment per the attached email, dated February 27, 2015, regarding the Pond E rip-rap. In response to the comment, additional rip-rap, along with a swale directing water from the gas easement to Pond E, have been constructed and are shown on the as-built grading plan.

After reviewing the as-built elevations and visiting the site on 4/23/15, it is my belief that the Valle Prado Unit 1 subdivision has been graded in substantial compliance with the approved grading plan and will drain in compliance with the approved drainage plan.

Your review and approval is requested for Release of Financial Guaranty for Valle Prado Unit 1. I appreciate your time and consideration. If you have questions or require additional information, please contact me at 823-1000.

Sincerely,

A handwritten signature in blue ink, appearing to read "Scott J. Steffen".

GENERAL NOTES

1. ALL WORK DETAILED ON THESE PLANS AND PERFORMED UNDER THIS CONTRACT SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE PROJECT SPECIFICATIONS AND THE PROJECT GEOTECHNICAL REPORT. WHERE APPLICABLE, CITY OF ALBUQUERQUE PUBLIC WORKS STANDARDS SHALL APPLY.
2. THE CONTRACTOR SHALL ABIDE BY ALL LOCAL, STATE, AND FEDERAL LAWS, RULES AND REGULATIONS WHICH APPLY TO THE CONSTRUCTION OF THESE IMPROVEMENTS, INCLUDING EPA REQUIREMENTS WITH RESPECT TO STORM WATER DISCHARGE.
3. PRIOR TO CONSTRUCTION, THE CONTRACTOR SHALL FIELD VERIFY THE HORIZONTAL AND VERTICAL LOCATIONS OF ALL POTENTIAL OBSTRUCTIONS INCLUDING ALL UNDERGROUND UTILITIES. SHOULD A CONFLICT EXIST, THE CONTRACTOR SHALL NOTIFY THE CONSTRUCTION OBSERVER OR ENGINEER SO THAT THE CONFLICT CAN BE RESOLVED WITH A MINIMUM AMOUNT OF DELAY.
4. TWO (2) WORKING DAYS PRIOR TO ANY EXCAVATION, THE CONTRACTOR SHALL CONTACT LINE LOCATING SERVICE FOR LOCATION OF EXISTING UTILITIES.
5. ALL ELECTRICAL, TELEPHONE, CABLE TV, GAS AND OTHER UTILITY LINES, CABLES, AND APPURTENANCES ENCOUNTERED DURING CONSTRUCTION THAT REQUIRE RELOCATION, SHALL BE COORDINATED WITH THAT UTILITY. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATION OF ALL NECESSARY UTILITY ADJUSTMENTS. NO ADDITIONAL COMPENSATION WILL BE ALLOWED FOR DELAYS OR INCONVENIENCES CAUSED BY UTILITY COMPANY WORK CREWS. THE CONTRACTOR MAY BE REQUIRED TO RESCHEDULE HIS ACTIVITIES TO ALLOW UTILITY CREWS TO PERFORM THEIR REQUIRED WORK.
6. THE CONTRACTOR IS RESPONSIBLE FOR PROTECTING ALL EXISTING UTILITY LINES WITHIN THE CONSTRUCTION AREA. ANY DAMAGE TO EXISTING FACILITIES CAUSED BY CONSTRUCTION ACTIVITY SHALL BE REPAIRED OR REPLACED AT THE CONTRACTOR'S EXPENSE AND APPROVED BY THE CONSTRUCTION OBSERVER.
7. CONSTRUCTION ACTIVITY SHALL BE LIMITED TO THE PROPERTY AND/OR PROJECT LIMITS. ANY DAMAGE TO ADJACENT PROPERTIES RESULTING FROM THE CONSTRUCTION PROCESS SHALL BE REPAIRED OR REPLACED AT THE CONTRACTOR'S EXPENSE.
8. OVERNIGHT PARKING OF CONSTRUCTION EQUIPMENT SHALL NOT OBSTRUCT DRIVEWAYS OR DESIGNATED TRAFFIC LANES. THE CONTRACTOR SHALL NOT STORE ANY EQUIPMENT OR MATERIAL WITHIN THE PUBLIC RIGHT-OF-WAY.
9. THE CONTRACTOR SHALL OBTAIN ALL THE NECESSARY PERMITS FOR THE PROJECT PRIOR TO COMMENCING CONSTRUCTION (I.E., BARRICADING, TOPSOIL DISTURBANCE, EXCAVATION PERMITS, EPA STORM WATER PERMITS, ETC.).
10. ALL PROPERTY CORNERS DESTROYED DURING CONSTRUCTION SHALL BE REPLACED AT THE CONTRACTOR'S EXPENSE. ALL PROPERTY CORNERS MUST BE RESET BY A REGISTERED LAND SURVEYOR.
11. THE CONTRACTOR SHALL PREPARE A CONSTRUCTION TRAFFIC CONTROL AND SIGNING PLAN AND OBTAIN APPROVAL OF SUCH PLAN FROM THE CITY OF ALBUQUERQUE, TRAFFIC ENGINEERING DEPARTMENT, PRIOR TO BEGINNING ANY CONSTRUCTION WORK ON OR ADJACENT TO EXISTING STREETS.
12. ALL BARRICADES AND CONSTRUCTION SIGNING SHALL CONFORM TO APPLICABLE SECTIONS OF THE "MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES" (MUTCD), US DEPARTMENT OF TRANSPORTATION, LATEST EDITION.
13. THE CONTRACTOR SHALL MAINTAIN ALL CONSTRUCTION BARRICADES AND SIGNING AT ALL TIMES. THE CONTRACTOR SHALL VERIFY THE PROPER LOCATION OF ALL BARRICADING AT THE END AND BEGINNING OF EACH DAY.
14. THE CONTRACTOR SHALL TAKE ALL STEPS NECESSARY TO CONFORM WITH EPA REQUIREMENTS, INCLUDING COMPLIANCE WITH NPDES PHASE 2 REQUIREMENTS.

GRADING NOTES

1. EXCEPT AS PROVIDED HEREIN, GRADING SHALL BE PERFORMED AT THE ELEVATIONS AND IN ACCORDANCE WITH THE DETAILS SHOWN ON THIS PLAN.
2. CONTRACTOR SHALL OBTAIN AND ABIDE BY A TOPSOIL DISTURBANCE PERMIT FROM THE CITY OF ALBUQUERQUE ENVIRONMENTAL HEALTH DIVISION, PRIOR TO CONSTRUCTION. THE COST FOR REQUIRED CONSTRUCTION DUST AND EROSION CONTROL MEASURES SHALL BE INCIDENTAL TO THE PROJECT COST. THE CONTRACTOR SHALL CONFORM TO ALL CITY, COUNTY, STATE, AND FEDERAL DUST CONTROL MEASURES AND REQUIREMENTS AND WILL BE RESPONSIBLE FOR PREPARING AND OBTAINING ALL NECESSARY APPLICATIONS AND APPROVALS.
3. ALL WORK RELATIVE TO FOUNDATION CONSTRUCTION, SITE PREPARATION, AND PAVEMENT INSTALLATION, AS SHOWN ON THIS PLAN, SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE SOILS REPORT. ALL OTHER WORK, UNLESS OTHERWISE STATED OR PROVIDED FOR HEREON, SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE PROJECT SPECIFICATIONS (FIRST PRIORITY), AND/OR THE CITY OF ALBUQUERQUE (COA) STANDARD SPECIFICATIONS FOR PUBLIC WORKS (SECOND PRIORITY).
4. TWO WORKING DAYS PRIOR TO EXCAVATION, CONTRACTOR MUST CONTACT LINE LOCATING SERVICE (765-1264) FOR LOCATION OF EXISTING UTILITIES.
5. PRIOR TO GRADING, ALL VEGETATION DEBRIS, AND NEAR SURFACE ORGANICALLY CONTAMINATED SOIL SHALL BE STRIPPED FROM ALL AREAS TO BE GRADED. VEGETATION AND DEBRIS SHALL BE DISPOSED OF OFF-SITE OR STOCK-PILED FOR USE IN PLANTERS AND NON-STRUCTURAL FILLS.
6. EARTH SLOPES SHALL NOT EXCEED 4 HORIZONTAL TO 1 VERTICAL UNLESS SHOWN OTHERWISE.
7. IT IS THE INTENT OF THESE PLANS THAT THIS CONTRACTOR SHALL NOT PERFORM ANY WORK OUTSIDE OF THE PROPERTY BOUNDARIES EXCEPT AS REQUIRED BY THIS PLAN.
8. THE CONTRACTOR IS TO ENSURE THAT NO SOIL ERODES FROM THE SITE ONTO ADJACENT PROPERTY OR PUBLIC RIGHT-OF-WAY. THIS SHOULD BE ACHIEVED BY CONSTRUCTING TEMPORARY BERMS AT THE PROPERTY LINES WETTING THE SOIL TO PROTECT IT FROM WIND EROSION.
9. A DISPOSAL SITE FOR ALL EXCESS EXCAVATION AND UNSUITABLE MATERIAL SHALL BE OBTAINED BY THE CONTRACTOR IN COMPLIANCE WITH APPLICABLE ENVIRONMENTAL REGULATIONS AND APPROVED BY THE OBSERVER. ALL COSTS INCURRED IN OBTAINING A DISPOSAL SITE AND HAUL THERETO SHALL BE CONSIDERED INCIDENTAL TO THE PROJECT, AND NO SEPARATE MEASUREMENT OR PAYMENT SHALL BE MADE.
10. PAVING AND ROADWAY GRADES SHALL BE +/- 0.1' FROM PLAN ELEVATIONS. PAD ELEVATION SHALL BE +/- 0.05' FROM BUILDING PLAN ELEVATIONS.
11. ALL SPOT ELEVATIONS ARE TO FLOWLINE UNLESS OTHERWISE NOTED. VALLEY CUTTER ELEVATIONS ARE SHOWN AT FLOWLINE ELEVATION.
