Ernie, I was looking at your last e-mail, too. From our end, we would not ask to hold this up on our end because we have the financial guaranty.

However, if there are items that were not built for Transportation purposes, that should be a problem with your Traffic Circulation Plan items not being complete. This sounds like something you need to discuss with Racquel.

Ernie, yes, you may issue a C.O. on this since it is a Procedure B, and we have the financial guaranty.
