David,

As you may be aware, Shelly Barnes has transferred to the Phoenix Office of our LA District. I have reviewed the drawing you provided in your email and compared it to the drawing Shelly based her NWP 32 verification of authorization decision on (dated June 6, 2018). It appears that there are no substantial changes to the design we reviewed that would affect or change our current decision on NWP 32 authorization; therefore, no further action by the USACE is necessary at this time and our letter dated June 6, 2018 remains in full force and effect.

Please let me know if any additional modifications to this current design occur. Thank you

Kelly E. Allen  
Phone: 505-342-3216

Michelle, we have been working with Mr. Hughes at the city to complete the attached reclamation grading plan. The design intent is to re-establish the sand bottom of the historic arroyo. We have prepared a plan that closely matches the pre development hydrology and provide the continuation of the sand bottom, to provide for a continuation of sediment transfer and flow capacity. Once approved by you the city will issue us a permit and we we will remove fencing and restore the channel to its historical condition.

Please review and let me know if you have any questions or comments.

David Soule, PE

Hi Doug,

If it would be more convenient to meet at your offices on Friday I can be available to meet there. Please just provide the time, address, and room location for the meeting.

Thank you,

Shelly Barnes

I cannot make a meeting out of the office this Friday, I have too many other meetings here. The following week is a short week with the holiday Monday. I can meet Wednesday the 17th after 3pm or Thursday afternoon or Friday afternoon.

Hi John,

As far as I am aware, AMAFCA does not have a structure adjacent to your lot or any regulatory authority. Their involvement at this time would be a courtesy measure and not necessary for the resolution of the current violation regarding this property. Therefore, AMAFCA may participate if available and you desire them to be present, however their participation or lack thereof at this meeting will not affect our process.

I am available at 10 a.m. Friday morning and can provide a conference room at the U.S. Army Corps of Engineers office at 4101 Jefferson Plaza NE for the meeting. Please confirm that this time and place is feasible for all parties.

Thank you,

Shelly Barnes

Regulatory Project Manager

USACE Albuquerque District

Hello all,

Does Friday morning at 9:30am work for everyone at 9000 Alameda? David, please forward models and info to all parties. Does AFMACA need to be involved in any way? If so, who would be the contact?

Thank you,

John

9000 Alameda. David Soule has the models requested to evaluate and resolve.

If, anyone else that needs to be involved to resolve this issue, please advise as I would like to get this behind all of us and move on. I am sure all would agree.
