**Re: Scenic Road NW
Erosion Sediment Control Plan
Engineer's Stamp Date 10-15-18 (D09E003C)**

Dear Mr. Duneman,

Based upon the information provided in your submittal received 10-22-18, the above referenced plan is approved to be included in the SWPPP and for grading and Work Order with the following conditions:

1. An erosion BMP is to be installed in the ditch on the north side of the road every 100 to 200 feet or so, depending on the longitudinal ditch slope and observed erosion, if any. Erosion BMP can be a coir roll, straw wattle, mulch sock or similar. They should be staked.

2. A sediment BMP is to be installed at the downstream end of the ditch on the north side of the road. Sediment BMP could be coir Roll, mulch sock or similar, but should be a minimum of 10" tall.

If you have any questions, you can contact me at 924-3420.

Sincerely,

Curtis Cherne, P.E.
Principal Engineer, Stormwater Quality
Planning Dept.
