Re: Duggers Towing

7001 San Pedro NE

Request for Permanent C.O. - Accepted Engineer's Stamp dated: 05-29-13 (D18D034)

Certification dated: 3-25-14

Dear Mr. Arfman,

Based on the Certification received 4/2/2014, the site is acceptable for release of Certificate of Occupancy by Hydrology.

PO Box 1293

Hydrology is asking for an electronic copy, in .pdf format, of this certification for our records. This certification can be e-mailed to: rrael@cabq.gov.

Albuquerque

If you have any questions, you can contact me at 924-3986 or Rudy Rael at 924-3977.

New Mexico 87103

Re: Duggers Towing, Grading and Drainage Plan
Engineer's Stamp Date 04-02-2013 (D-18/D034)

Dear Mr. Demeulle,

Based upon the information provided in your email received 04-03-13, the above referenced plan cannot be approved for Building Permit until the following comments are addressed:

- Please quantify all off-site flows being received and show how these flows will leave the site.
- Provide additional spot elevations of the site interior as well as extend contours and show additional spots to the west of the property.
- Clarify the property boundaries; show all sidewalk, curb and gutter elevations and flowlines along San Francisco Drive.
- The proposed retention pond will be required to hold the full 10-day volume of developed and concentrated flows from the site; Hydrology suggests the implementation of a detention pond with ultimate discharge through a sidewalk culvert onto San Francisco Drive.
- How will the channelized flows be directed around the bends into the proposed pond without topping over?
- Will there be any parking requirements for the proposed building?
- Provide a benchmark designation on the grading plan.

If you have any questions, you can contact me at 924-3695.

Herrington, Cameron

Subject: RE: S0-19 Sidewalk Culvert Standard Notes and Details

Hi,

I look at the plan and had the following comments:

- _ower the pond so we would retain the developed volume. The invert of the sidewalk culverts and the bottom of the pond are the same elevation.
- 2 Change the property line to a thicker solid line or phantom for clarification.
- 3 Extend the sidewalk culvert 2' passed the property line. Add a note to the sidewalk culverts to "TACK WELD THE BOLTS AT THE PLATE".
- 4_ Provide sidewalk culvert capacity calculation.
- 5 Increase the txt size for the drainage calculations on the plan.
- 6_ Can you redesign the pond to make it a retention/detention pond to limit the discharge so you would only need 2-2' sidewalk culverts? Possibly the top of the pond would be at 31.50 or 32.00 and the bottom may at 29.20 and discharge point at 30.20. Provide a headerwall at the back of the inlet (with the top at 31.5 or 32.0) and opening sized to the sidewalk culvert dimensions.
- 7_ We will need two copies of the grading plan for the SO-19 approval.

Please give me a call with any questions

Thanks and have a nice day

Shahab Biazar, P.E.

Senior Engineer Planning Department Development & Building Services Division 600 2nd St. NW, Suite 201 Albuquerque, NM 87102 t 505-924-3695 f 505-924-3864

From: Herrington, Cameron

To: Biazar, Shahab

Subject: FW: S0-19 Sidewalk Culvert Standard Notes and Details

Shahab,

Let me know if you think his plan will be sufficient. He has added 3 - 24" culverts as well as the SO-19 standard notes. He will need to add the note to tack weld the bolts and to extend the culvert.

Cameron J. Herrington **Hydrology Section Intern** (505)924-3981cherrrington@cabq.gov

Subject: RE: S0-19 Sidewalk Culvert Standard Notes and Details

Mr. Herrington,

The drawing has been revised with the additional information you requested:

Sidewalk culverts

Additional spots and grading showing flowpaths into the swales

Additional spots near the pond and back wall

Datum reference (benchmark)

We have been unable to have the surveyor gain access to the private property along the back wall, but have added the top of wall information and bottom of wall. the proposed top of pond is approximately 1 foot lower than the top of retaining wall on the Duggers site, and the proposed sidewalk culverts will provide positive drainage to the curb and gutter prior to flows topping the back wall.

Please advise at your earliest convenience if you require any additional information.

Regards, Rob Demeule

Subject: S0-19 Sidewalk Culvert Standard Notes and Details

Date: Mon, 13 May 2013 09:36:10 -0600

From: cherrington@cabq.gov To: robdemeule@msn.com

Mr. Demeule,

Attached you will find a copy of our S0-19 Standard Notes to be included on the plan set. The COA drawing that is applicable for the site is No. 2236 with a minimum throat opening of 12". Per COA standard the steel plate for the culvert should have all bolts tack welded to the plate and the cover should extend back 2 feet from the property line to mitigate any fall hazards. Shahab is willing to review any changes prior to you submitting them if you would like to email us a .pdf of the plan. If you have any questions you can either call or email me or you can reach Shahab directly at sbiazar@cabq.gov or (505)924-3695.

Thank you,

Cameron J. Herrington Hydrology Section Intern (505)924-3981 cherrington@cabq.gov

Re: Revised Drawing - Duggers Towing, Grading and Drainage Plan, Engineer's Stamp Date 04-02-2013 (D-18/D034)

Dear Shahab,

Please find attached the revised grading and drainage plan referenced above. We have provided the additional details and revisions requested in your review letter dated April 26, 2013. Specifically, we have addressed your comments in the following manner (your bulleted comments are shown below and our response follows each bullet):

• Please quantify all off-site flows being received and show how these flows will leave the site.

The site is isolated from offsite flows by curb & gutter along San Pedro, San Francisco and Pino. Flows from adjoining private property immediately to the north are prevented by CMU walls, corrugated metal security fence, and existing grading. Additionally, an existing metal-panel security fence along the south and west side property line prevents discharge of flows along the west and south sides of the site. The revised drawing quantifies all off-site flows being received, and how these flows are routed to an on-site retention pond.

Provide additional spot elevations of the site interior as well as extend contours and show additional spots to the west of the property.

More detailed contouring is shown in the revised drawing, as well as extended contours and spots to the west. (Private property access was not granted to the west, but we have provided spot elevations where we were able to legally acquire topography)

• Clarify the property boundaries; show all sidewalk, curb and gutter elevations and flowlines along San Francisco Drive.

The property boundaries have been clarified and the requested elevations along San Francisco are shown.

The proposed retention pond will be required to hold the full 10-day volume of developed and concentrated flows from the site; Hydrology suggests the implementation of a detention pond with ultimate discharge through a sidewalk culvert onto San Francisco Drive.

The design hydrology and retention pond design have been revised to retain the 10-day volume, no discharge through sidewalk culvert is planned for the purpose of storm water quality.

• How will the channelized flows be directed around the bends into the proposed pond without topping over?

The pond has been extended to remove the bends and any possibility of topping over.

• Will there be any parking requirements for the proposed building?

There are no parking requirements for the proposed building, it is not open to the public and has no need for parking.

Provide a benchmark designation on the grading plan.

A project benchmark is shown at the corner of San Pedro and San Francisco.

Thank you for these clear comments and direction. We anticipate that we have made the revisions necessary for your final approval of this grading and drainage plan. If you do have any additional questions or require any clarifications, please contact me at your earliest convenience, as the owner is faced with a pressing deadline.

Sincerely,

Robert Demeule, PE

Albuquerque City Zoning 600 2nd Street NW, #720 Albuquerque, New Mexico 87102

To Whom It May Concern:

This letter simply advises that the Federal Bureau of Investigation's contract requirements for vehicle seizures and other assets subject to forfeiture, requires a secure indoor facility for storage of assets valued over \$10,000.00 with no public access allowed. This maintains the integrity of the asset for those times when assets are released prior to the completion of the forfeiture process. Duggers Metro Road Service currently holds the contract to provide such storage for vehicles and other valuable assets seized by the Federal Bureau of Investigation and other Department of Justice law enforcement agencies.

If you have any questions, please feel free to contact Asset Forfeiture Investigator Evonne S. Buie at 505-889-1300.

Sincerely,

Stephan Marshall

Re: Duggers Towing, Grading and Drainage Plan
Engineer's Stamp Date 05-28-2013 (D-18/D034)

Dear Mr. Demeulle,

Based upon the information provided in your submittal received 05-30-13, the above referenced plan is approved for Building Permit. A separate Excavation/Barricading Permit is required for SO-19 construction within City ROW. A copy of this approval letter must be on hand when applying for the excavation/barricading permit. To obtain a Certificate of Occupancy, the proposed sidewalk culvert must be inspected and accepted. Please contact Jason Rodriguez, Storm Drain Maintenance, at 857-8074 to schedule an inspection.

PO Box 1293

Please attach a copy of this approved plan to the construction sets when submitting for a building permit. If the approved plan is not attached to the construction set, Hydrology will reject the construction set for building permit.

Albuquerque

Prior to Certificate of Occupancy release, Engineer Certification per the DPM checklist will be required. If you have any questions, you can contact me at 924-3695.

Requests for approvals of Site Development Plans and/or Subdivision Plats shall be accompanied by a drainage submittal. The particular nature, location, and scope to the proposed development defines the degree of drainage detail. One or more of the following levels of submittal may be required based on the following

- 1. Conceptual Grading and Drainage Plan: Required for approval of Site Development Plans greater than five (5) acres and Sector Plans
- 2. Drainage Plans: Required for building permits, grading permits, paving permits and site plans less than five (5) acres
- 3. Drainage Report: Required for subdivision containing more than ten (10) lots or constituting five (5) acres or more
- 4. Erosion and Sediment Control Plan: Required for any new development and redevelopment site with 1-acre or more of land disturbing area, including project less than 1-acre than are part of a larger common plan of development
