Re: Risen Savior Catholic Parking Lot Improvements
7810 Scotts PI NE
Traffic Circulation Layout
Architect's Stamp 07-15-16 (D19D002)

Dear Mr. Stafford

Based upon the information provided in your submittal received 07-15-16, the above referenced plan cannot be approved for Building Permit until the following comments are addressed:

- 1. Please list the length for all existing and proposed parking spaces.
- List radii for all curves shown; for passenger vehicles, the minimum end island radius is 15 ft. Landscape island radius for delivery trucks, fire trucks, etc. is 25 ft. or larger.
- 3. One-way vehicular paths require pavement directional sign at the point of egress. Please show detail and location of posted signs.
- 4. Please provide a clear sight triangle exhibit and add the following note to the clear sight triangle: "Landscaping and signage will not interfere with clear sight requirements. Therefore, signs, walls, trees, and shrubbery between 3 and 8 feet tall (as measured from the gutter pan) will not be acceptable in this area."
- 5. Please specify the City Standard Drawing Number when applicable
- 6. It appears that a porting of the public sidewalk is in the private property. Please provide a public pedestrian access easement.
- Clarify where the project is located. The vicinity map is confusing. Direction of North arrow is incorrect.
- 8. Please add a dimension at all the pinch points.(i.e. from the garage to the landscaping island.)
- 9. Please add a note on the plan stating "All improvements located in the Right of Way must be included on the work order."
- Please add a note stating "All broken or cracked sidewalk must be replaced with sidewalk and curb & gutter." A build note must be provided referring to the appropriate City Standard drawing.
- 11. Please include two copies of the traffic circulation layout at the next submittal.
