Hello Jeff.

After review of the updated Trip Generation for the site listed above. The City of Albuquerque has determined that an update TIS is not needed because of the reduction in trips generated. Let me know if you have any questions.

Thank you.

Logan,

Attached is the Trip Gen table showing a reduction of peak PM Trips by a total of 12.6 due to the change from the Shops building to the Christian Brothers Automotive. I have also attached the current approved plan and the proposed site plan for the Christian Brothers.

Thanks,

Jeffrey T. Wooten, PE, LEED AP

Importance: High

Hello Jeff,

After talking with Racquel we will need the trip generated recalculated for the site because of the previous TIS done. The trip gen calcs should be done before EPC.

Attached is a signed copy of the TIS form.

Let me know if you have any questions.

Thanks.

Awesome. I have attached the TIS form and supporting documents. Is this something you can review via email or do I need to deliver hard copies to you?

Basically, the original approved plan allowed for a 7,480 SF Retail Store. We are proposing a 4,896 SF Automotive Repair Shop (9 bays) in its place.

Thanks,

Jeffrey T. Wooten, PE, LEED AP

Hello Jeff,

I am reviewing the TIS now. I will be able to review the TIS form for you.

Thanks

Logan,

I need to submit a TIS form for an EPC case. Does Tony Loyd still review/approve these? If not, who should I submit this to?
