Doug

Based upon the information provided in your submittal received 10-26-2017, the above referenced plan cannot be approved for CO PERM until the following comments are addressed:

- The approved grading and drainage plan 2 of 3 with engineers stamp date of 10-16-07 must be certified by an engineer.

Refer to page 2 of the attachment for instructions on obtaining the Hydrology CO PERM. The engineer's certification must be a part of the drawing. If you have any question please do not hesitate to contact me. Thank you.
