## EASEMENT

ALBERT G. SIMMS II, M.D., a married man dealing in his sole and separate estate, and ALBUQUERQUE NATIONAL BANK, Trustee under Trust Agreements dated May 20, 1977 for the benefit of Albert G. Simms III, Leslie Simms Garza, Margaret Simms Davis, Frank Y. Simms, and Mary Simms Holland (Owners of the 28.807-acre tract of land in Bernalillo County, New Mexico more particularly described in Exhibit A attached hereto), for consideration grant to RUST TRACTOR CO., a Delaware Corporation, whose address is P. O. Box 25007, Albuquerque, New Mexico 87125, (Owner of the 18.9008-acre tract of land in Bernalillo County New Mexico more particularly described in Exhibit B attached hereto), and to SEVENTY SIX LIMITED, a limited partnership whose address is 9720 Bell Avenue, S. E., Albuquerque, New Mexico (Owner of the 20-acre tract of land in Bernalillo County, New Mexico more particularly described in Exhibit C attached hereto), the following described drainage easement located in Bernalillo County, New Mexico:

The western-most 12 feet along the full length of the western boundary line of Grantors' 28.807-acre tract of land described in Exhibit A attached hereto, said easement being an appurtenance to said 18.9008-acre tract of Grantee RUST TRACTOR CO. as abuts the east boundary of said 18.9008-acre tract, and being an appurtenance to said 20-acre tract of Grantee SEVENTY SIX LIMITED as it abuts the east boundary of said 20-acre tract and said 18.9008-acre tract.

The existing elevations of the Grantor's property (up-slope) are higher or greater than the existing elevations of the Grantees' property (down-slope). By the granting of this easement, the Grantors have hereby established this drainage easement for utilization by Grantor, to the extent required, as specified more fully below, to control the drainage of "on-site" water developed within the boundaries of the

Grantor's property described in Exhibit A. For the purpose of this easement "on-site water" shall mean that portion of any water falling onto the Grantor's property from the air which, due to construction or other improvements on Grantor's property, is caused to run off of the Grantor's property.

Grantor's obligation hereunder shall be limited to the duty to construct, at Grantor's sole expense, a drainage channel, within the drainage easement described above, to control and divert the drainage of "on-site water" developed within the boundaries of Grantor's property described on Exhibit A. Such construction shall be consistent with the analysis and design thereof by a registered professional engineer employed by the Grantors at the Grantor's expense. Grantor shall be permitted to cross the easement with vehicular traffic by "dip sections" and other means and to make other uses that are consistent with the primary purpose of the easement.

This easement shall benefit the Grantees and their successors and assigns in ownership of the property described in Exhibits B and C. The obligations of this easement shall at all times be limited to the then current owners of the property described in Exhibit A.

Dated this 7 day of January, 1980.

SUBJECT: Final Drainage Approval

Dear Fred:

During the course of our construction of the Chant Business Center, we have requested and received temporary permits from the Drainage Department for the individual building permits within the project.

We are rapidly approaching the completion of the project which within the shell permit includes the final sitework and drainage for the entire tract D-2 development. These drainage drawings show a ponding area North of the tract D-2 area that at this time has not been completed with respect to constructing a retaining wall along the ponds western edge. We have refrained from putting this wall in because the site drainage plans for the Tract D-1 which is north of D-2 and extends to Bear Arroyo, will modify the D-2 design. We have submitted to the City and are in the process of receiving approval to change the designated ponding area to a drainage channel that runs to Bear Arroyo. We should have the drainage channel approved prior to the completion and final inspection request for the D-2 tract.

Please contact myself for Chris Weiss if you have any questions regarding the drainage for these projects.

Sincerely,

CHANT CORPORATION
