Re: Coors Pavilion
NW corner of St. Joseph's Dr. / Coors Blvd.
Traffic Impact Study
Engineer's Stamp dated 02-02-17 (G11-D069)

Dear Mr. Brown,

The subject Traffic Impact Study received on February 2, 2017 has been reviewed and approved by the Transportation Development Section. All comments have been adequately addressed.

The final Traffic Impact Study shall be valid for a period of three years. Should significant modifications to the approved development proposal occur, the approved study shall be revised to incorporate the changes.

If you have any questions, please feel free to contact me at (505) 924-3991.

Sincerely,

Racquel M. Michel, P.E.
Traffic Engineer, Planning Dept.

Coors Pavilion Retail Development
(St. Josephs Dr. / Coors Blvd.)
TRAFFIC IMPACT STUDY

STUDY PURPOSE

This study is being conducted in conjunction with a request for approval of a site development plan for implementation of a retail development such as the one shown in the Appendix (Page A-3) of this report. The purpose of this study is to identify the impact of the proposed development on the adjacent transportation system, and to make recommendations to mitigate any significant adverse impact on the adjacent transportation system. This study is being submitted to satisfy the requirements of the City of Albuquerque Transportation Development Section and the New Mexico Department of Transportation, District 3 Office.

STUDY PROCEDURES

A scoping meeting was held with City of Albuquerque Transportation staff members as well as with Nancy Perea at the New Mexico Department of Transportation, District 3 prior to beginning the study to discuss scope and methodology to be utilized within the proposed Coors Pavilion Retail Development Traffic Impact Study. Specific items included format, intersections to be studied, intersection analysis procedures, existing traffic counts, trip distribution methodology, and implementation year definition.

The basic procedure followed is described as follows:

1) Calculate the generated trips for the proposed development consisting of the following described land uses (See Appendix Pages A-17 thru A-22):
   - *a. A 105,000 SF of Retail Commercial Floor Space*
   - *b. A 4,500 SF Variety Store*
   - *c. A 7,000 SF Fast Food restaurant w/ drive-thru window*
   - *d. A 6,200 SF High Turnover (Sit-Down) Restaurant*
   - *e. A 48,000 SF General Office Building*

2) Calculate trip distribution for the newly generated trips by this development. The new commercial trips will be distributed based on year 2018 population within a 3-mile radius of the new project (See Appendix Pages A-23 thru A-34).

3) Determine Trip Assignments for the newly generated trips based on the results of the Trip Distribution Analysis and logical routing to and from the site (See Appendix Pages A-35 thru A-36).

4) Acquire recent traffic counts for all intersections to be analyzed in this report (See Appendix Pages A-112 thru A-120).

5) Calculate growth rate for the area utilizing a Mid-Region Council of Governments' 2005 thru 2014 Traffic Flow Map Data to define area traffic growth rate (See Appendix Pages A-8 thru A-16).

6) Determine 2018 NO BUILD Volumes by growing the existing turning movement counts to the year 2018 utilizing the calculated annual historic growth rate for the area (See Appendix Pages A-37 thru A-61).

7) Add the trips generated by the development to the 2018 NO BUILD Volumes to obtain 2018 BUILD Volumes for this project (See Appendix Pages A-37 thru A-61).
8) Apply a 30% pass-by trips rate to the driveways (See Appendix Page A-17).
9) Provide signalized and / or unsignalized intersection analyses for the following intersections:

INTERSECTION	TYPE CONTROL	NO BUILD	BUILD
1) Sequoia Rd. / Coors Blvd.	Traffic Signal	2018	2018
2) St. Josephs Dr. / Coors Blvd.	Traffic Signal	2018	2018
3) Western Trail / Coors Blvd.	Traffic Signal	2018	2018
4) Western Trail / Atrisco Dr.	Traffic Signal	2018	2018
5) St. Josephs Dr. / Atrisco Dr.	Traffic Signal	2018	2018
6) Milne Rd. / Atrisco Dr.	Stop Sign	2018	2018
9) Milne Rd. / Coors Blvd.	Stop Sign	2018	2018
10) St. Joseph's Dr. / Driveway "A"	Stop Sign	N/A	2018
11Driveway "B" / Coors Blvd.	Stop Sign	N/A	2018

PREVIOUS RELATED TRAFFIC IMPACT STUDIES

There are no trips from previously approved projects to consider for this development.

GENERAL AREA CHARACTERISTICS

The proposed requested site development plan is for a property bounded on the east by Coors Blvd., on the west by an existing development, on the south by St Joseph's Dr., and on the north by an existing residential subdivision as shown on the Vicinity Map on Page A-1 of the Appendix of this report. An aerial map of the adjacent transportation system to be considered and analyzed in this study may be found on Page A-2 in the Appendix of this report. The subject tract of land is in a moderately developed area of Northwest Albuquerque. The surrounding development is a mix of residential, commercial, and office uses. Also, there is a private school to the east of this site and a church to the west.

AREA STREET NETWORK

The impacted adjacent street network targeted for analysis in this study are defined on the 2040 Long Range Roadway System from the Mid-Region Metropolitan Planning Organization (MRMPO). They include the Coors Blvd. corridor and Atrisco Dr. from St. Josephs Dr. to Western Trail. Also included are the streets fronting the project or running through the project.

Coors Blvd is classified as a Regional Principal Arterial Roadway and is generally a six lane urban facility with raised medians. The posted speed limit along Coors Blvd. in the vicinity of this project is 45 MPH.

Atrisco Dr. and Sequoia Rd. are classified as Major Collector Streets. They are generally two lane urban roadways with left turn lanes at major intersections. The posted speed limit along these roads in the vicinity of this project is 35 MPH.

Western Trail and St. Joseph's Dr. are both classified as Minor Arterial Roadways and both are ultimately planned to be divided four lane paved urban roadway sections. Western Trail is fully improved from Atrisco Dr. to Coors Blvd. as a four lane urban roadway. The center of Western Trail is either a center two-way left turn lane or designated left turn lanes near the major intersections. St. Joseph's Dr. is currently a paved two lane roadway section between Atrisco Dr. and Coors Blvd.

The remaining roadways for the project are not classified.

EXISTING TRAFFIC VOLUMES

2014 Average Weekday Traffic Volumes (AWDT) for major streets in the site plan area are shown on Page A-6 thru A-7 of the Appendix.

Current turning movement volumes obtained during the AM and PM Peak Hours for the following intersections were acquired from recent field counts for the following intersections:

Sequoia Rd. / Coors Blvd.
St. Joseph's Dr. / Coors Blvd.
Western Trail / Coors Blvd.
Western Trail / Atrisco Dr.
St. Joseph's Dr. / Atrisco Dr.
Milne Rd. / Atrisco Dr.
Milne Rd. / Coors Blvd.

The counts are included in Appendix Pages A-112 thru A-120.

EXISTING TRANSIT, BICYCLE AND PEDESTRIAN SERVICES

This area is serviced by the ABQ RIDE Route 155 (Coors Blvd.) provides service approximately every 30 minutes from 6:30 a.m. to 10:00 p.m. 6 days a week and limited service from 10:00 a.m. to 5:00 p.m. on Sunday, and by the Westside Rapid Ride Route 790 which provides hourly service during the AM and PM Peak Hour periods 6 days a week. (See Appendix Pages A-122 thru A-124).

Bicycle facilities in the project area include existing bicycle lanes along Coors Blvd., Atrisco Dr. and Western Trail and an existing bicycle route along St. Joseph's Dr. Bicycle lanes are proposed for Atrisco Dr., St. Joseph's Dr. and Western Trail, according to the Mid-Region Metropolitan, Planning Organization's 2040 Long Range Bikeway System Map (Appendix Page A-121).

Pedestrian facilities include a mix of sidewalk and paved trails along Coors Blvd., Atrisco Dr. and St. Joseph's Dr. adjacent to the property; however, currently, no pedestrian facilities exist along the immediate frontage of the proposed site along Coors Blvd. and Western Trail.

PROPOSED DEVELOPMENT

The conceptual site plan as it is shown in this report proposes two primary access points into the site. One access will be at (Driveway "A") off of St. Joseph's Dr. The second access will be a right-in, right-out driveway off of Coors Blvd (Driveway "B").

The proposed conceptual site development plan associated with this project consists of several different land uses summarized in the following table:

Land Use Description	Size Proposed
Shopping Center	105,000 S.F.
Variety Store	4,500 S.F.
Fast Food Restaurant w/ drive-thru window	7,000 S.F.
High Turnover (Sit-Down) Restaurant	6,200 S.F.
General Office Building	48,000 S.F.

See the conceptual site development plan on Page A-3 in the Appendix of this report to acquire more detailed information about the proposed development. This site plan is conceptual at this point in time and is subject to some changes as progress takes place in the design process. The plan should, however, provide a reliable basis upon which to analyze the impact of the development on the adjacent transportation system and provide guidelines for mitigating the impact and establishing access criteria.

TRIP GENERATION

Projected trips were calculated from data in the Institute of Transportation Engineers Trip Generation Manual (9th Edition, 2009). Trips for the development were determined based on land uses defined on the Conceptual Site Development Plan on Page A-3 in the Appendix of this report.

The resulting number of trips generated for the proposed development is summarized in the following table:

Coors Pavilion (St. Joseph's Dr. / Coors Blvd.)

Trip Generation Data (ITE Trip Generation Manual - 9th Edition)

	USE (ITE CODE)		24 HR VOL	A. M. PEAK HR.		P. M. PEAK HR.	
	DESCRIPTION		*GROSS*	*ENTER*	*EXIT*	*ENTER*	*EXIT*
	Summary Sheet	Units					
Lots 3, 6, 7, and Anchors	Shopping Center (820)	105.00	7,010	100	61	297	322
Lot 1 - Blake's	Fast Food Restaurant w/ Drive-Thru Window (934)	2.80	1,389	65	62	48	44
Lot 2 - Verizon	Variety Store (814)	4.50	288	9	9	15	15
Lot 4 - Panera Bread	High Turnover (Sit-Down) Restaurant (932)	6.20	788	37	30	37	24
Lot 5 - Chick Fil-A	Fast Food Restaurant w/ Drive-Thru Window (934)	4.20	2,084	97	93	71	66
	Commercial Subtotal		**11,559**	**308**	**255**	**468**	**471**
	*Pass-By Trips**	30%		*-92*	*-77*	*-140*	*-141*
	Total Primary Commercial Trips			**216**	**178**	**328**	**330**
	General Office Building (710)	48.00	752	94	13	22	110
	Total Primary Commercial and Office Trips		**12,311**	**310**	**191**	**350**	**440**

* - Pass-by Trip Reduction rate based on Figure 5.5 from Trip Generation Handbook, 2nd Edition

A 30% adjustment was made for Pass-By Trips.

TRIP DISTRIBUTION

Primary and Diverted Linked Trips:

Commercial Land Uses

Primary and diverted linked trips for office / commercial development have been distributed proportionally to the 2018 projected population of Subareas area wide. Population data for 2015 and 2025 were taken from the *2035 Socioeconomic Forecasts for Data Analysis Subzones for the Mid-Region of New Mexico*, supplied by the Mid-Region Council of Governments (MRCOG). Population Data was interpolated linearly to obtain 2018 values and adjusted for distance from the proposed new facility. The trip distribution worksheets and associated map of subareas are shown in the Appendix on Pages A-23 thru A-33. The Trip Distribution Map for Commercial use can be found in the Appendix on Page A-34.

TRIP ASSIGNMENTS

Trip assignments are first made on a percentage basis derived from data established in the trip distribution determination process and logical routing to and from the proposed site. Those percentages are then applied to the projected trips to determine individual traffic movements. Percentage trip assignment maps are shown in the Appendix on Pages A-35 thru A-36.

BACKGROUND TRAFFIC GROWTH

Background traffic growth rates were considered for the study area that was targeted for analysis based on data from the 2005 through 2014 Traffic Flow maps prepared by the Mid-Region Council of Governments.

Most of the Traffic Flow Data for the years 2005 through 2014 taken from the MRCOG Traffic Flow Maps were Standard Data. The data from those years for each approach was plotted on a graph and a linear "regression trend line" calculated using the equation format $y=mx+b$. The growth rate was determined by calculating the average volume increase per year during the time period considered and dividing that volume into the most recent AWDT used in the analysis from which future volumes will be calculated. The rate of growth of that trend line was utilized as the growth rate for each approach if that calculated rate appeared feasible. However, there may be some instances where the rate indicated a negative growth trend or appeared to be unreasonably high or low. In those cases, an appropriate growth rate from an adjacent segment of the same roadway was used, a shorter time span was used to determine the growth rate, or the growth rate was considered to be zero or a generic 0.5% if appropriate. Due to the potential for growth in the area, it was believed that a zero percent growth rate was inappropriate for this study. Therefore, a growth rate of 0.5% was often used if the linear regression analysis showed the growth rate to be negative. Additionally, if the R^2 value of the trend line was low, other means of establishing a probable growth rate from the data accumulated was considered. Historical Growth Rate Graphs with linear regression trendlines are shown in the Appendix on Pages A-9 through A-16. Additionally, the growth rate utilized for each approach to an intersection is printed at the top of the Turning Movement sheets for each intersection (Appendix Pages A-40 through A-61).

PROJECTED PEAK HOUR TURNING MOVEMENTS FOR 2018 BUILDOUT

The calculated growth rates were applied to the most recent peak hour traffic counts (conducted for this study) to establish the 2018 background NO BUILD traffic volumes. To these volumes, the generated trips based on implementation of the proposed Coors Pavilion Retail Development (100% development) were added to obtain 2018 BUILD volumes for the intersection analyses. See Appendix Pages A-37 thru A-61 for further information regarding 2018 turning movement counts.

INTERSECTION CAPACITY ANALYSIS

Intersection capacity analyses were performed in accordance with the procedures for signalized and unsignalized intersections in the Highway Capacity Manual, Special Report 209, Transportation Research Board, 2010, using Trafficware's Synchro version 9 Highway Capacity Software for signalized and unsignalized intersections. For signalized intersections, the operational method of analysis was used for 2018 conditions (NO BUILD and BUILD).

Capacity analyses were performed for the following traffic conditions.

2018 without development of the subject property (2018 NO BUILD)
2018 with total development as per the Proposed Site Plan (2018 BUILD).

The results of the 2018 NO BUILD and BUILD capacity analyses are summarized in the following sections - *Results and Discussion of Intersection Capacity Analyses*.

The Highway Capacity Manual (2010) defines Level of Service (LOS) for signalized and unsignalized intersections in terms of average controlled delay per vehicle as follows:

LEVEL-OF-SERVICE CRITERIA FOR SIGNALIZED INTERSECTIONS

Average Delay (secs)	Level-of-Service
≤ 10	A
> 10 and ≤ 20	B
> 20 and ≤ 35	C
> 35 and ≤ 55	D
> 55 and ≤ 80	E
> 80	F

LEVEL-OF-SERVICE CRITERIA FOR UNSIGNALIZED INTERSECTIONS

Average Delay (secs)	Level-of-Service
≤ 10	A
> 10 and ≤ 15	B
> 15 and ≤ 25	C
> 25 and ≤ 35	D
> 35 and ≤ 50	E
> 50	F

Level of Service D is generally considered acceptable in urban areas and is the desirable base condition for analysis in a traffic study. In addition to consideration of the overall level-of-service of the signalized intersection, the levels-of-service of each individual movement should be considered.

RESULTS OF SIGNALIZED INTERSECTION CAPACITY ANALYSES

IMPLEMENTATION YEAR (2018)

Intersection #1 - Sequoia Rd. / Coors Blvd. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of Sequoia Rd. / Coors Blvd. are summarized in the following table:

Intersection: 1 - Sequoia Rd. / Coors Blvd.

		2018 AM Peak Hour BUILD					2018 PM Peak Hour BUILD				
		(EXIST. GEOM.)					(EXIST. GEOM.)				
		NO BUILD		BUILD			NO BUILD		BUILD		
		Lanes	LOS-Delay	Lanes	LOS-Delay		Lanes	LOS-Delay	Lanes	LOS-Delay	
EB	L	2	D - 49.7	2	D - 47.3	L	2	D - 54.5	2	D - 50.1	
	T	3	D - 46.0	3	D - 43.9	T	3	D - 42.3	3	D - 39.5	
	R	>	**F** - 81.7	>	**D** - 53.3	R	>	D - 44.9	>	D - 41.8

	T	3	A - 0.7	3	A - 0.5	T	3	C - 35.0	3	C - 26.8	
	R	1	A - 0.1	1	A - 0.0	R	1	C - 21.2	1	B - 16.5	
Intersection:		***B - 10.3***			***A - 9.3***			***C - 30.4***			***C - 31.0***

Note: ">" designates a shared right or left turn lane.

This study demonstrates that this signalized intersection will operate at acceptable levels-of-service for the 2018 AM Peak Hour and PM Peak Hour NO BUILD and BUILD Conditions considered in this report. The newly generated traffic from this development will only increase the delay from 0.8 seconds during the AM Peak Hour and does not increase the delay during the PM Peak Hour. The analysis demonstrates that there will be no adverse impact to the intersection. Therefore, no recommendation is made for the Sequoia Rd. / Coors Blvd. intersection.

The results of the queueing analysis for this intersection is summarized in the following table:

Queueing Analysis Summary Sheet

Project: Coors Pavillion Retail Development (St. Joseph's Dr. / Coors Blvd.)

Intersection: **Sequoia Rd. / Coors Blvd.**

2018

Approach	Left Turns			Thru Movements				Right Turns

AM BUILD Queue	**1**	**33**	**75**	**3**	**2,708**	**>1,000**	*	**1**	**41**	**100**
Existing Lane Length	*1*	*86*	*100*	*3*	*1,647*	*Cont*		*1*	*76*	*270*
PM NO BUILD Queue	1	87	**150**	3	1,672	**775**		1	77	150
PM BUILD Queue	**1**	**93**	**175**	**3**	**1,810**	**850**		**1**	**77**	**150**

	AM	PM
Cycle Length:	130	130

NOTE: Queue lengths are in feet.

Calculated Right Turn Queue Lengths can be reduced by 50% to account for right-turns-on-red and right turn overlaps.

The recommendations of the queuing analysis for this intersection are summarized in the following table and paragraph:

Lane Description	Existing Length (Ft)	NO BUILD Length (Ft)	BUILD Length (Ft)	Lengthen Existing Auxiliary Lane to:
Eastbound Left Turn:	180	200	200	No Recommendation
Westbound Left Turn:	120	250	250	**250' plus transition.**
Westbound Right Turn:*	120	50	60	No Recommendation
Northbound Left Turn:	120	175	175	**175' plus transition.**
Northbound Right Turn:*	165	90	90	No Recommendation
Southbound Left Turn:	100	150	175	**175' plus transition.**
Southbound Right Turn:*	270	80	80	No Recommendation

* - Calculated right turn queue lengths reduced by 50% to account for rtor / overlap phases.

The queueing analysis demonstrates that the westbound left turn lane should be lengthened from 120 to 250 feet plus transition. These measures would adversely impact the length of the existing eastbound left turn lane into the Walgreen's. The queuing analysis also demonstrates that the northbound left turn lane should be lengthened from 120 feet to 175 feet plus transition. This measure would adversely impact the existing southbound left turn lane into the access to Sequoia Square Shopping Center. Therefore, no recommendations are made for the intersection of Sequoia Rd. / Coors Blvd. with regard to the westbound and northbound legs. The queuing analysis also demonstrates that the southbound left turn lane should be lengthened from 100 feet to 175 feet plus transition. It appears from an aerial photograph that this lengthening can be accomplished. Therefore, it is a recommendation of this study that the southbound left turn lane should be lengthened from 100 feet to 175 feet plus transition.

Intersection #2 - St. Josephs Dr. / Coors Blvd. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of St. Josephs Dr. / Coors Blvd. are summarized in the following table:

Intersection: 2 - St. Joseph's Dr. / Coors Blvd.

Note: ">" designates a shared right or left turn lane.

This study demonstrates that this signalized intersection will operate at acceptable levels-of-service for the 2018 AM Peak Hour and PM Peak Hour NO BUILD and BUILD Conditions for the overall intersection. Certain movements will experience marginally excessive and excessive delays for the AM Peak Hour and PM Peak Hour for both the NO BUILD and BUILD conditions – eastbound movements during the AM and PM Peak Hours. The northbound left turn movement will experience excessive delays during the AM Peak Hour BUILD conditions. Therefore, no recommendations are made for the intersection of St. Joseph's Dr. / Coors Blvd.

The results of the queueing analysis for this intersection is summarized in the following table:

Queueing Analysis Summary Sheet

Project: Coors Pavillion Retail Development (St. Joseph's Dr. / Coors Blvd.)

Intersection: **St. Joseph's Dr. / Coors Blvd.**

	AM	PM
Cycle Length:	130	130

NOTE: Queue lengths are in feet.

Calculated Right Turn Queue Lengths can be reduced by 50% to account for right-turns-on-red and right turn overlaps.

The recommendations of the queueing analysis for this intersection are summarized in the following table and paragraph:

Lane Description	Existing Length (Ft)	NO BUILD Length (Ft)	BUILD Length (Ft)	Lengthen Existing Auxiliary Lane to:
Eastbound Left Turn:	130	250	300	**300' plus transition.**
Eastbound Right Turn:*	130	80	110	No Recommendation
Westbound Left Turn:	220	250	250	**250' plus transition.**
Westbound Right Turn:*	165	100	100	No Recommendation
Northbound Left Turn:	440	225	375	No Recommendation
Northbound Right Turn:*	330	160	160	No Recommendation
Southbound Left Turn:	5,660	375	375	No Recommendation
Southbound Right Turn:*	280	200	210	No Recommendation

* - Calculated right turn queue lengths reduced by 50% to account for rtor / overlap phases.

The queueing analysis demonstrates that the eastbound left turn lane should be lengthened from 130 to 300 feet plus transition and the westbound left turn lane should be lengthened from 220 feet to 250 feet plus transition. The westbound left turn lane cannot be lengthened to the recommended length without adversely impacting the intersection with Fox Sparrow Trail. Therefore, no recommendation is made for the westbound left turn lane. It is recommended that the dual eastbound left turn lanes be extended to a total length of 300 feet per lane.

Intersection #3 - Western Trail / Coors Blvd. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of Western Trail / Coors Blvd. are summarized in the following table:

Intersection: 3 - Western Trail / Coors Blvd.

		2018 AM Peak Hour BUILD					2018 PM Peak Hour BUILD

Intersection:		***E - 67.7***		***E - 65.7***			***D - 38.9***		***C - 33.9***		

Note: ">" designates a shared right or left turn lane.

This study demonstrates that this signalized intersection will operate at marginally acceptable levels-of-service for the 2018 AM Peak Hour and PM Peak Hour NO BUILD and BUILD Conditions considered in this report. The newly generated traffic from this development will not increase the delay at the intersection. It is important to note that sometimes the BUILD Condition demonstrates a lower delay than the NO BUILD Condition due to the difference in intersection splits, just as is the case for the AM and PM Peak Hour Conditions. Also, if a project generates traffic to a movement with relatively low delays, then the weighted average delay of the intersection may be reduced. The analysis demonstrates that there will be no significant adverse impact to the intersection. Therefore, no recommendation is made for the Western Trail / Coors Blvd. intersection.

Also, it seems apparent from the above analysis that there is a deficient capacity for the eastbound thru / right turn movement at the intersection for both the 2018 AM and PM Peak Hour periods and both the NO BUILD and BUILD conditions. It seems intuitive that a new eastbound right turn lane would help improve the operation of the intersection and solve the deficiency for the eastbound thru / right turn movement. However, it also seems intuitive that the development of the vacant land at the southwest corner of Western Trail / Coors Blvd. should be responsible to dedicate the needed right-of-way and to construct the new eastbound right turn lane when it proposes development.

The results of the queueing analysis for this intersection is summarized in the following table:

Queueing Analysis Summary Sheet

Project: Coors Pavillion Retail Development (St. Joseph's Dr. / Coors Blvd.)

Intersection: **Western Trail / Coors Blvd.**

2018

	AM	PM
Cycle Length:	130	130

NOTE: Queue lengths are in feet.

Calculated Right Turn Queue Lengths can be reduced by 50% to account for right-turns-on-red and right turn overlaps.

The recommendations of the queueing analysis for this intersection are summarized in the following table and paragraph:

Lane Description	Existing Length (Ft)	NO BUILD Length (Ft)	BUILD Length (Ft)	Lengthen Existing Auxiliary Lane to:
Eastbound Left Turn:	150	225	225	**225' plus transition.**
Westbound Left Turn:	295	150	150	No Recommendation
Westbound Right Turn:*	245	40	40	No Recommendation
Northbound Left Turn:	210	425	425	**425' plus transition.**
Northbound Right Turn:*	175	50	50	No Recommendation
Southbound Left Turn:	100	75	75	No Recommendation
Southbound Right Turn:*	420	160	160	No Recommendation

* - Calculated right turn queue lengths reduced by 50% to account for rtor / overlap phases.

The queueing analysis demonstrates that the eastbound left turn lane should be lengthened from 150 feet to 225 feet plus transition and the northbound left turn lane should be lengthened from 210 feet to 425 feet plus transition. The eastbound left turn lane cannot be lengthened without adversely impacting the intersection of Stafford Place to the west. The proposed Coors Pavilion does not contribute any traffic to the northbound left turn movement and, therefore, should not be held responsible to lengthen it. This is a NO BUILD condition problem. Therefore, no recommendations are made for the intersection of St. Western Trail / Coors Blvd.

Intersection #4 - Western Trail / Atrisco Dr. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of Western Trail / Atrisco Dr. are summarized in the following table:

Intersection: 4 - Western Trail / Atrisco Rd.

PM BUILD Queue	**1**	**15**	**50**	**1**	**27**	**75**	**0**	**7**	**25**

	AM	PM
Cycle Length:	130	130

NOTE: Queue lengths are in feet.

Calculated Right Turn Queue Lengths can be reduced by 50% to account for right-turns-on-red and right turn overlaps.

The recommendations of the queueing analysis for this intersection are summarized in the following table and paragraph:

Lane Description	Existing Length (Ft)	NO BUILD Length (Ft)	BUILD Length (Ft)	Lengthen Existing Auxiliary Lane to:
Eastbound Left Turn:	95	25	25	No Recommendation
Eastbound Right Turn:*	0	290	310	No Recommendation
Westbound Left Turn:	65	200	200	**200' plus transition.**
Westbound Right Turn:*	0	50	50	No Recommendation
Northbound Left Turn:	115	375	425	**425' plus transition.**
Northbound Right Turn:*	0	80	80	No Recommendation
Southbound Left Turn:	105	75	75	No Recommendation
Southbound Right Turn:*	0	10	10	No Recommendation

* - Calculated right turn queue lengths have been reduced by 50% to account for right-turns-on red and overlap phases.

The queuing analysis recommends lengthening the westbound left turn lane from 65 feet to 200 feet plus transition and lengthening the northbound left turn lane from 115 feet to 425 feet plus transition. The westbound left turn lane actually transitions into a two-way left turn lane of more than 1,000 feet and therefore, does not need to be lengthened. The northbound left turn lane also transitions into a two-way left turn lane of 415 feet. If it is lengthened any more, it will adversely affect the street to the south (Los Cerros Rd.). Therefore, no recommendations are made for the intersection of Western Trail / Atrisco Dr.

Intersection #5 - St. Josephs Dr. / Atrisco Dr. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of St. Josephs Dr. / Atrisco Dr. are summarized in the following table:

Intersection: 5 - St. Joseph's Dr. (Ladera Dr.) / Atrisco Rd.

Intersection:		***B - 18.1***		***C - 20.7***			***B - 13.9***		***C - 26.8***		

Note: ">" designates a shared right or left turn lane.

This study demonstrates that this signalized intersection will operate at acceptable levels-of-service for the 2018 AM Peak Hour and PM Peak Hour NO BUILD and BUILD Conditions considered in this report. The newly generated traffic from this development will increase the delay from 2.6 to 12.9 seconds. The analysis demonstrates that there will be no adverse impact to the intersection. Therefore, no recommendation is made for the St. Joseph's Dr. / Atrisco Dr. intersection.

The results of the queueing analysis for this intersection is summarized in the following table:

Queueing Analysis Summary Sheet

Project: Coors Pavillion Retail Development (St. Joseph's Dr. / Coors Blvd.)

Intersection: **St. Joseph's Dr. / Atrisco Dr.**

PM NO BUILD Queue	1	33	**75**	1	190	275	0	52	100
PM BUILD Queue	**1**	**94**	**175**	**1**	**190**	**275**	**0**	**52**	**100**

	AM	PM
Cycle Length:	130	130

NOTE: Queue lengths are in feet.

Calculated Right Turn Queue Lengths can be reduced by 50% to account for right-turns-on-red and right turn overlaps.

The recommendations of the queueing analysis for this intersection are summarized in the following table and paragraph:

Lane Description	Existing Length (Ft)	NO BUILD Length (Ft)	BUILD Length (Ft)	Lengthen Existing Auxiliary Lane to:
Eastbound Left Turn:	120	125	125	No Recommendation
Eastbound Right Turn:*	100	60	60	No Recommendation
Westbound Left Turn:	155	125	125	No Recommendation
Westbound Right Turn:*	0	80	130	No Recommendation
Northbound Left Turn:	40	100	100	**100' plus transition.**
Northbound Right Turn:*	0	60	80	No Recommendation
Southbound Left Turn:	110	150	225	**225' plus transition.**
Southbound Right Turn:*	0	50	50	No Recommendation

* - Calculated right turn queue lengths have been reduced by 50% to account for right-turns-on red and overlap phases.

The queuing analysis recommends lengthening the northbound left turn lane from 40 feet to 100 feet plus transition and lengthening the southbound left turn lane from 110 feet to 150 feet plus transition. Both the northbound and southbound left turn lanes transition into two-way left turn lanes of 475 feet or more and therefore, do not need to be lengthened. Therefore, no recommendations are made for the intersection of St Joseph's Dr. / Atrisco Dr.

RESULTS OF UNSIGNALIZED INTERSECTION CAPACITY ANALYSES

IMPLEMENTATION YEAR (2018)

Intersection #6 - Milne Rd. / Atrisco Dr. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of Milne Rd. / Atrisco Dr. are summarized in the following table:

Intersection: 6 - Milne Rd. / Atrisco Dr.

		2018 AM Peak Hour BUILD (EXIST. GEOM.)				2018 PM Peak Hour BUILD (EXIST. GEOM.)			
		NO BUILD		BUILD		NO BUILD		BUILD	
		Lanes	LOS-Delay	Lanes	LOS-Delay	Lanes	LOS-Delay	Lanes	LOS-Delay

Intersection:		***u - 5.7***		***u - 6.0***		***u - 2.6***		***u - 2.4***	

Note: ">" designates a shared right or left turn lane.

This study demonstrates that this unsignalized intersection will operate at acceptable levels-of-service for the 2018 AM and PM Peak Hour NO BUILD and BUILD Conditions. Therefore, no recommendation is made for the intersection of Milne Rd. / Atrisco Rd.

Intersection #9 - Milne Rd. / Coors Blvd. - Pages A-62 thru A-107

The results of the implementation year analysis of the signalized intersection of Milne Rd. / Coors Blvd. are summarized in the following table:

Intersection: 9 - Milne Rd. / Coors Blvd.

2018 AM Peak Hour BUILD **2018 PM Peak Hour BUILD**

		(EXIST. GEOM.) NO BUILD Lanes	LOS-Delay	BUILD Lanes	LOS-Delay		(EXIST. GEOM.) NO BUILD Lanes	LOS-Delay	BUILD Lanes	LOS-Delay
EB	R	1	C - 24.7	1	C - 28.2	R	1	B - 13.4	1	B - 13.8
NB	L	1	B - 17.3	1	B - 19.0	L	1	B - 14.3	1	B - 15.3
NB	T	3	A - 0.0	3	A - 0.0	T	3	A - 0.0	3	A - 0.0
SB	T	3	A - 0.0	3	A - 0.0	T	3	A - 0.0	3	A - 0.0
SB	R	1	A - 0.0	1	A - 0.0	R	1	A - 0.0	1	A - 0.0
Intersection:		***A - 0.3***		***A - 0.4***			***A - 0.2***		***A - 0.2***	

Note: ">" designates a shared right or left turn lane.

This study demonstrates that this unsignalized intersection will operate at acceptable levels-of-service for the 2018 AM Peak Hour and PM Peak Hour NO BUILD and BUILD Conditions considered in this report and that the newly generated traffic from this development will not have a significant adverse impact on this intersection. Therefore, no recommendations are made for the Milne Rd. / Coors Blvd. intersection.

Intersection #10 - St. Josephs Dr. / Driveway "A" - Pages A-62 thru A-107

The results of the analysis of the unsignalized intersection of St. Joseph's Dr. / Driveway "A" (full access) are summarized in the following table:

Intersection: 10 - St. Joseph's Dr. / Driveway "A"

2018 AM Peak Hour BUILD **2018 PM Peak Hour BUILD**

		(EXIST. GEOM.) NO BUILD Lanes	LOS-Delay	BUILD Lanes	LOS-Delay	(MIT. GEOM.) BUILD Lanes	LOS-Delay		(EXIST. GEOM.) NO BUILD Lanes	LOS-Delay	BUILD Lanes	LOS-Delay	(MIT. GEOM.) BUILD Lanes	LOS-Delay
EB	L	>	A - 0.0	>	A - 8.6	1	A - 8.1	L	>	A - 0.0	>	A - 9.8	1	A - 9.0
EB	T	1	A - 0.0	1	A - 0.0	1	A - 0.0	T	1	A - 0.0	1	A - 0.0	1	A - 0.0

Intersection:		***u - 0.0***		***u - 12.7***		***u - 2.8***			***u - 0.0***		***u - 155***		***u - 6.5***	

Note: ">" designates a shared right or left turn lane.

Construct separate EB left, WB right and SB right turn lanes. Construct a second WB thru lane from Coors Blvd. to Atrisco Dr.

Driveway “A” is a full access driveway. This study demonstrates that this unsignalized driveway will operate at acceptable levels-of-service for the 2018 AM Peak Hour and PM Peak Hour BUILD Conditions considered in this report, except for the southbound movements which will experience excessive delays during both the AM and PM Peak Hour BUILD Conditions. The intersection can be mitigated by constructing separate eastbound left, westbound right and southbound right turn lanes. A second westbound thru lane should also be constructed along St. Joseph’s Dr. from Coors Blvd. to Atrisco Dr.

Intersection #11 - Driveway “B” /Coors Blvd. - Pages A-62 thru A-107

The results of the analysis of the unsignalized intersection of Driveway “B” / Coors Blvd. (right-in, right-out only) are summarized in the following table:

Intersection: 11 - Driveway "B" / Coors Blvd.

		2018 AM Peak Hour BUILD (EXIST. GEOM.)					2018 PM Peak Hour BUILD (EXIST. GEOM.)				
		NO BUILD		BUILD			NO BUILD		BUILD		
		Lanes	LOS-Delay	Lanes	LOS-Delay		Lanes	LOS-Delay	Lanes	LOS-Delay	
EB	R		A - 0.0	1	C - 24.5	R		A - 0.0	1	C - 19.5	
NB	T	3	A - 0.0	3	A - 0.0	T	3	A - 0.0	3	A - 0.0	
SB	T	3	A - 0.0	3	A - 0.0	T	3	A - 0.0	3	A - 0.0	
SB	R	>	A - 0.0	>	A - 0.0	R	>	A - 0.0	>	A - 0.0	
Intersection:		***u - 0.0***		***u - 0.3***			***u - 0.0***		***u - 0.4***		

Note: ">" designates a shared right or left turn lane.

Driveway “B” is a right-in, right-out only driveway. This study demonstrates that this unsignalized driveway will experience acceptable levels-of-service and delays for the 2018 AM Peak Hour and PM Peak Hour BUILD Conditions. Therefore, no recommendations are made for the intersection of Driveway “B” / Coors Blvd.

Additionally, this driveway warrants a southbound right turn lane along Coors Blvd. having a length of 370 feet with a 12.5:1 taper. See Appendix Pages A-108 thru A-111 for further detail regarding the Determination of Warrants for Deceleration Lanes.

CONCLUSIONS

This analysis was conducted using the following methodology: Trip Generation was established using the Institute of Transportation Engineers’ (ITE’s) Trip Generation Manual (9th Edition). Generated Trips were distributed proportionately based on the Population Data Analysis Subzones for Commercial Land Use; NO BUILD volumes were established based on recent traffic count data grown at historical growth rate; and the intersection analyses were performed in accordance with the 2010 Highway Capacity Manual. The Traffic Impact Study showed a moderate to substantial increase in traffic volumes for the adjacent transportation network based on 100% buildout of the proposed project.

In summary, the proposed plan for the Coors Pavilion Retail Development presents no significant adverse impact to the adjacent transportation system provided that the following recommendations are followed:

RECOMMENDATIONS

- All site design and construction including driveways and landscaping shall maintain adequate sight distances at the driveways and the existing intersections.
- Access to the site should be via the implementation of two driveways - St. Joseph's Dr. / Driveway "A" (full access with one lane entering, two lanes exiting) and Driveway "B" / Coors Blvd. (right-in, right-out, only with one lane entering, one lane exiting) as defined on the conceptual site plan on Page A-3 of the Appendix of this report.
- **Sequoia Rd. / Coors Blvd.** – lengthen the southbound left turn lane from 100 feet to 175 feet plus transition.
- **St. Joseph's Dr. / Coors Blvd.** – Lengthen the dual eastbound left turn lanes to 300 feet plus transition.
- **St. Joseph's Dr. / Driveway "A"** - construct separate eastbound left, westbound right and southbound right turn lanes. Construct a second westbound thru lane along St. Joseph's Dr. from Coors Blvd. to Atrisco Dr. (to be constructed by City of Albuquerque). The eastbound left turn lane on St. Joseph's Dr. at Driveway "A" should be constructed to a length of 150 feet plus transition (150' – 150' reverse curve transition). The westbound right turn deceleration lane should be constructed to a length of 150 feet plus transition (150' – 150' reverse curve transition)
- **Driveway "B" / Coors Blvd.** - a southbound right turn deceleration lane on Coors Blvd. southbound at Driveway "B" is warranted. The right turn deceleration lane should be designed and constructed to be 370 feet in length with a 12.5:1 taper, and it should be 12 feet wide. Physical constraints in the field may require slight reduction in the length of the right turn deceleration lane. The length of the right turn deceleration lane will require New Mexico Department of Transportation approval.

In addition to the recommendations above, the New Mexico Department of Transportation's requirements are stipulated in the letter from Nancy Perea dated 12/16/2016 which is included on Pages A-128 thru A-130 in the Appendix of this report.

- Classification TBD, Post 2040

The Long Range Roadway System (LRRS) provides future recommended roadways and their regional role. This network includes roadways that are not expected to be constructed in the timeframe of the 2040 MTP, however they are included to in order to identify future needed connections.

The LRRS builds upon functional classification, by considering the character of the roadway, its role in the regional network, the types of trips taken, and the needs to all users.

REGIONAL PRINCIPAL ARTERIAL
Trips on regional principal arterials are primarily for traveling longer distances across the region. Regional principal arterials prioritize passenger vehicles and freight. These roadways should have high levels of access management.

COMMUNITY PRINCIPAL ARTERIAL
Community principal arterial include many destinations with direct access from the arterial. Travel on community principal arterials tends to be over relatively short distances. Community principal arterials do not prioritize one mode over another; instead, they strive to achieve a balance for different user needs.

MINOR ARTERIAL
Minor arterials provide the connectivity of principal arterials, but they prioritize slower moving traffic, including bicyclists and pedestrians, to allow these modes additional options to reach destinations without needing to be on a principal arterial.

MAJOR COLLECTOR
Major collectors provide additional connectivity between destinations on arterials and neighborhoods. They prioritize bicyclists and pedestrians. Bicyclists should be able to use collectors for long segments of their trips while motorists primarily use them for short segments of their trips.

MINOR COLLECTOR
Minor collectors provide additional connectivity between destinations on arterials and neighborhoods.

Data Entry Sheet

Determination of Warrants for Deceleration Lanes

NM DOT State Access Management Manual Criteria

Driveway "B" / Coors Blvd.

Project Information:

Project Name:	**Coors Pavillion Retail Development (St. Joseph's Dr. / Coors Blvd.)**
Project Location:	**St. Joseph's Dr. / Coors Blvd.**
Implemenation Year:	**2018**
Project Environment:	**Urban Multi-Lane**

Street Information:

Major Street Name:	**Coors Blvd.**
Minor Street Name:	**Driveway "B"**

Intersection Information:

	Orientation	Prevailing Speed	No. Lanes Each Direction
Driveway "B"	**Eastbound**	**25**	**N/A**
Coors Blvd.	**North-South**	**45**	**2**

Determine Case:

Case
1 Urban Two-Lane Highway - Use Table 17.B.1
2 Urban Multi-Lane Highway - Use Table 17.B-2
3 Rural Two Lane Highway - Use Table 17.B-3 and 17.B-5
4 Rural Multi-Lane Highway - Use Table 17.B-4 and 17.B-6

Coors Blvd. is Case **2**
Speed Category **45 to 55**

SB Right Turn Volumes		**SB Thru Volumes**
2018 AM Pk. Hr. NO BUILD	0	2881
2018 AM Pk. Hr. BUILD	136	2828
2018 PM Pk. Hr. NO BUILD	0	2468
2018 PM Pk. Hr. BUILD	180	2383

NB Left Turn Volumes		**NB Thru Volumes**
2018 AM Pk. Hr. NO BUILD	0	1854
2018 AM Pk. Hr. BUILD	0	1905
2018 PM Pk. Hr. NO BUILD	0	3270
2018 PM Pk. Hr. BUILD	0	3388

Worksheet Developed by Terry O. Brown, P.E.

Determination of Warrants for Auxiliary Lanes

Project Name: **Coors Pavillion Retail Development (St. Joseph's Dr. / Coors Blvd.)**
Name of Highway: **Coors Blvd.**
Name of Cross Street: **Driveway "B"**

Determination of Warrants for: Eastbound Driveway

Implementation Year Volumes - **2018** **Posted Speed Limit:** **45**

Right Turn Deceleration Lane - Implementation Year Volumes

Condition	Year	Projected Right Turn Volume	Warrant Volume in thru Lane	Projected Volume in thru Lane	✓ if Met	Lane Length (Deceleration)*	Adjustment Factor for Grade**	Lane Length (Storage)***	Total Lane Length	Taper Ratio
AM Peak Hour NO BUILD	**2018**	-	-	1,441		N/A		-	**N/A**	**N/A**

Based on Table 17.B-2 (Criteria for Deceleration Lanes on Urban Multi-Lane Highways)

* **Lane Length Requirements based on Table 18.K-1 (Deceleration and Acceleraion Lengths)**

** **Enter Grade Adjustment Factor from Table 18.K-2 or other criteria.**

*** **Lane Storage Length is Based on a calculated 3-minute queue based on average arrival rate per minute.**

= Volume/Hr. divided by 60 times three (rounded) times 25 feet per vehicle.

Lane Storage Length for right turn decel lanes is zero unless there is a stop condition.

Notes and Comments:

1. This warrant sheet is for the eastbound Driveway "B" at 100% Development of the Project

Worksheet Developed by Terry O. Brown, P.E.

Table 17.B-2
Criteria For Deceleration Lanes On
URBAN MULTI-LANE HIGHWAYS

Turning Volume[1] (vph)	LEFT-TURN DECELERATION LANE Minimum Volume in Adjacent Through Lane (vphpl)[2]			RIGHT-TURN DECELERATION LANE Minimum Volume in Adjacent Through Lane (vphpl)[2]		
	≤30 mph	35 to 40 mph	45 to 55 mph	≤30 mph	35 to 40 mph	45 to 55 mph
<5	**Not Required**	**Not Required**	**Not Required**	**Not Required**	**Not Required**	**Not Required**

≥56	**Required**	**Required**	**Required**	**Required**	**Required**	**Required**
	Left-turn Deceleratаion Lanes are Required on Urban Multi-lane Highways for the following Left-turn Volumes: • ≤30 mph : 56 vph or more • 35 to 40 mph : 46 vph or more • 45 to 55 mph : 36 vph or more			***Right-turn Deceleratаion Lanes are Required on Urban Multi-lane Highways for the following Right-turn Volumes:*** • ≤30 mph : 56 vph or more • 35 to 40 mph : 46 vph or more • 45 to 55 mph : 41 vph or more		

Notes:

1. *Use linear interpolation for turning volumes between 5 and 55 vph.*
2. *The volume in the adjacent through lane includes through vehicles and turning vehicles.*

Table 18.K-1
Deceleration and Acceleration Lengths (feet)

CITY OF ALBUQUERQUE

STANDARD LETTER

SCOPE OF TRAFFIC IMPACT STUDY (TIS)

TO: Terry Brown, P.E., PTOE
P. O. Box 92051
Albuquerque, NM 87199-2051
tobe@swcp.com

MEETING DATE: December 3, 2015

ATTENDEES: Jeanne Wolfenbarger, Racquel Michel, Carol Toffaleti and John MacKenzie, City of Albuquerque; Terry Brown.

PROJECT: Coors Pavilion (northwest corner of St. Joseph's Drive/Coors Boulevard)

REQUESTED CITY ACTION: _X__Zone Change ___Site Development Plan

X Subdivision X Building Permit ___Sector Plan ___Sector Plan Amendment

___Curb Cut Permit ___Conditional Use ___Annexation ___Site Plan Amendment

ASSOCIATED APPLICATION: There is a 21-acre tract on the northwest corner of St. Joseph's Drive and Coors Boulevard. On this tract, it is proposed to construct a couple of drive-thru restaurants and a shopping center, drive-in bank, and pharmacy. There will be partial access onto Coors Boulevard (right-turn-in, right-turn-out only) approximately 400 feet north of St. Joseph's Drive, access onto Ladera Drive, and a possible tie-in to the north via Quaker Heights Plaza.

The Traffic Impact Study should follow the standard report format, which is outlined in the DPM. The following supplemental information is provided for the preparation of this specific study. As each item identified in the scoping letter is completed, check the appropriate (box).

1. Trip Generation - Use Trip Generation Manual, 9th Edition. (30% pass-by trips are assumed.)

2. **Signalized Intersections:**

- **Coors Blvd. / St. Joseph's Drive**
- **Coors Blvd. / Sequoia Road**
- **Coors Blvd. / Western Trail**
- **Atrisco Drive / St. Joseph's Drive**
- **Atrisco Drive / Western Trail**

Unsignalized Intersections:

- **Quaker Heights Plaza / Western Trail**
- **Milne Road / Atrisco Drive**
- **Quaker Heights Plaza / Milne Road**
- **Milne Road / Coors Blvd.**

All drives for site access.

O Box 1293
Albuquerque
New Mexico 87103
www.cabq.gov

3. Intersection turning movement counts (7-9 a.m. peak hour, 4-6 p.m. peak hour).

4. Existing traffic signal timing and synchronization.
Intersections provided: signalized intersections above

5. Type of intersection progression and factors to be used.
Type III arrival type (see "2010 Highway Capacity Manual" or equivalent as approved by staff). Unless otherwise justified, peak hour factors and % heavy commercial should be taken directly from the MRCOG turning movement data provided or as calculated from current count data by consultant.

6. Boundaries of area to be used for trip distribution.
City Wide - residential, office or industrial;
3-mile radius - commercial;

7. Basis for trip distribution.
Residential – Use inverse relationship based upon distance and employment. Use employment data from 2035 Socioeconomic Forecasts, MRCOG – See MRCOG website for most current data.

Office/Industrial - Use inverse relationship based upon distance and population. Use population data from 2035 Socioeconomic Forecasts, MRCOG – See MRCOG website for most current data.

Commercial - Use relationship based upon population. Use population data from 2035 Socioeconomic Forecasts, MRCOG – See MRCOG website for most current data.

8. Traffic Assignment. Logical routing on the major street system.

9. Proposed developments which have been approved but not constructed that are to be Included in the analyses: None

10. Method of intersection capacity analysis - planning or operational (see "2010 Highway Capacity Manual" or equivalent [i.e. HCS, Synchro, Teapac, etc.] as approved by staff). Must use latest version of design software and/or current edition of highway capacity manual.
Implementation Year: 2018

11. Traffic conditions for analysis:

a. Project completion year without proposed development (yr. 2018);

b. Project completion year with proposed development (yr. 2018).

12. Background traffic growth.
Method: Use 10-year historical growth based on standard data from the MRCOG Traffic Flow Maps. Minimum growth rate to be used is 1/2%.

13. Planned (programmed) traffic improvements.
List planned CIP improvements in study area and projected project implementation year: Ladera Drive Improvements (Kellie Shaw - DMD Project Manager).

14. Items to be included in the study:
    a. Intersection analysis.
    b. Signal progression - An analysis is required if the driveway analysis indicates a traffic signal is possibly warranted.
    c. Arterial LOS analysis;
    d. Recommended street, intersection and signal improvements.
    e. Site design features such as turning lanes, median cuts, queuing requirements and site circulation, including driveway signalization and visibility.
    f. Transportation system impacts.
    g. Other mitigating measures.
    h. Accident analyses ___yes X no.
    Location(s):
    i. Weaving analyses ___yes X no.

15. Number of copies of report required 4_(3 for the COA, 1 for NMDOT), 1 electronic version.
    Executive Summary Required ___yes X no

16. Other:
    - Comply with the Coors Corridor Plan (existing and proposed). Proposed plan, as indicated by Carol, requires driveway spacing of one driveway per 450 feet for partial access and one driveway per 1000 feet for full access. Table 18C1 of the Highway Access Manual also shows required spacing of access points on state-owned facilities. The proposed right-turn-in, right-turn-out access onto Coors Blvd. follows both the existing and proposed Coors Corridor Plan and is acceptable to the DOT.
    - Terry Brown met with Nancy Perea of NMDOT in advance of the TIS meeting to determine acceptability of proposed access off of Coors Boulevard. Terry mentioned that the DOT requested a deceleration lane in advance of the Coors Boulevard access.

The Traffic Impact Study for this development proposal, project name, shall be performed in accordance with the above criteria. If there are any questions regarding the above items, please contact me at 924-3993.

New Mexico DEPARTMENT OF
TRANSPORTATION

December 16, 2016

Mr. Terry Brown, P.E.
P.O. Box 92051
Albuquerque, NM 87199

Subject: Proposed Coors Pavilion Revision 1
NM 45 Mile Post 16.09 (NW Quadrant at St. Joseph's Drive)
Albuquerque, Bernalillo County, New Mexico

Dear Mr. Brown:

This letter is to inform you that the Traffic Impact Study (TIS) for the proposed commercial development at the northwest quadrant of the intersection of NM 45 and St. Joseph's Drive dated October 8, 2016 has been reviewed and below are the District comments.

The NMDOT has no objection to granting the requested Right-in/Right-out commercial driveway onto NM 45 southbound providing the following conditions are met.

1. The NMDOT shall provide final approval on the design for the offsite improvements. The developer shall agree to incorporate all the comments requested by the NMDOT.
2. The Property Owner shall submit a Commercial Driveway Application for the Right-in/Right-out commercial driveway onto NM 45.

In addition to the TIS, the improvements are based on other factors, including but not limited to, the State Access Management Manual (SAMM) design criteria, roadway design references and any local jurisdiction planning documents. The following offsite improvements will be required inclusive of those listed in the TIS report recommendations (attached) for the proposed development:

A. The 12 foot wide deceleration lane shall be constructed to include the taper and storage area.

B. The access width shall be constructed to accommodate lanes for one ingress and one egress movement at a maximum of 36 feet wide. The access return radii shall meet design vehicle criteria.

C. Bike lane with buffer shall be built in kind along the property frontage on NM 45.

D. Pavement marking shall be installed on NM 45 for the full length of the development's property frontage. Any existing pavement markings impacted or otherwise damaged during construction shall be re-installed at NMDOT discretion.

E. Appropriate signage per the MUTCD shall be installed based on the new roadway geometry.

F. The existing ITS sign conflicts with the new deceleration lane. It consists of three major components, the foundation, the structure, and the board. All major components shall be removed and installed new with the exception of the structure itself. Pending the following: (1) Structural drawings stamped, signed by a registered engineer of New Mexico approving the reuse of the existing sign structure and (2) NMDOT D-3 ITS approval for reuse of sign structure.

G. Sidewalk shall be installed along the property line of NM 45 tying into the existing sidewalk to the north and new ADA curb ramp to the south. All sidewalk installation shall be built per standard drawings 608 series.

H. Verify that the ADA curb ramp(s) at the northwest corner of NM 45 & St. Joseph's Drive are ADA compliant. If existing conditions are not ADA compliant the subject area shall be rebuilt to NMDOT/PROWAG specifications. ADA curb ramp shall be built per standard drawings 608 series.

I. Roadway luminaires shall be removed and reinstalled along the property frontage of NM 45 with roadway widening. Roadway luminaires shall be installed per standard drawings 706, 707 & 708 series.

J. Utilities shall be removed and relocated along the property frontage of NM 45 and additional, if needed, to tie into existing infrastructure.

The following information will be required in conjunction with the approval of the development:

a. All geometric details associated with the proposed offsite improvements listed in this letter shall be approved by the NMDOT. Any schematic layout (s) for the proposed improvements that is contained in the report is for informational purposes only and should not be considered as an approved final design.

b. Detailed construction plans, including traffic control plans, for the proposed roadway improvements shall be submitted to Margaret Haynes P.E at Margaret.Haynes@state.nm.us prior to any driveway application submittals. The roadway design shall be compliant with proposed right-of-way accessibility guidelines (PROWAG) for pedestrian facilities.

c. Grading and drainage plans, shall be submitted with the driveway application for review and approval by Mr. Timothy Trujillo, D3 Drainage Engineer.

d. An Environmental Clearance will need to be obtained from Mr. Gary Funkhouser for disturbance to the state right-of-way. Mr. Funkhouser can be reached at 505.827.5692 or Gary.Funkhouser@state.nm.us

e. Utility permit application for all utility work within NMDOT right-of-way shall be submitted to Mr. Israel Suazo, D3 Permit Agent, for review and processing. Mr. Suazo can be reached at 505.798.6655 or Israel.Suazo@state.nm.us

f. All traffic control permits, within NMDOT right-of-way related to the proposed development shall be submitted to Mr. Peter Kubiak, D3 Engineering Coordinator at 505.798.6608 or Peter.Kubiak@state.nm.us

If you have any questions please feel free to call me at 505.798.6625.

Sincerely,

Nancy R. Perea, P.E.
District Three Traffic Engineer
