**Subject:** Fourth and Freeman project Construction site inspection  
**Attachments:** cement\_pollution.jpg; track-out\_pad.jpg

Jose,  
Good afternoon,  
I went out to the project today.  
Someone washed-out in the pond and I did not see an acceptable wash-out facility onsite. Please remove cement pollution and bring in an acceptable wash-out. Due to site constraints an Outpak or two may be the answer.  
  
Your track-out pad has small rocks; 3/4 " crushed. Seems to be working as I did not see any track-out. If you start getting track-out, I will expect you to replace the small rocks with larger rocks on top of filter fabric (standard track-out pad installation).  
Standard mitigation time is seven days.

Thanks,

Curtis Cherne, PE, QCIS

**To:** 'rodriguez3003@hotmail.com'  
**Subject:** COonstrucion site Inspection  
**Attachments:** pollution.jpg; paint\_pollution.jpg; oil\_pollution.jpg

Jose,

Good morning.

Thank you for taking time to talk with me on-site.

As discussed there were some pollution prevention issues at the site:

1. There was a blue-colored liquid with some what appeared to be stucco wash-out.
2. Someone had sprayed paint on the ground.
3. There was a quart of oil leaking into the ground.

These items and the affected dirt is to be removed and an acceptable wash-out area placed on site. As far as the painting goes, you could set up a tarp or plastic and paint on top of that.

If you have any questions, please let me know.

**Subject:** 4419 4th St SWPPP inspection  
**Attachments:** cement\_pollution.jpg; entrance\_maintenance.jpg; inlet\_protection.jpg; cement\_pollution\_trash.jpg

Jose,  
I went out to 4419 4<sup>th</sup> st NW today for a SWPPP inspection.  
The following issues were observed:

1. Duke City was washing out there truck when I pulled up. I spoke to the driver. He informed me that the Site Supervisor told him to wash-out there. Wash-out is to be in a lined pit or wash-out bin. I didn't see an appropriate wash-out location at the site.
2. The entrance needs maintenance and there was track-out. This area of 5<sup>th</sup> street is to be swept.
3. The inlet at 5<sup>th</sup> and Freeman should have acceptable inlet protection. A wattle or mulch sock would be acceptable.
4. There was another wash-out on Freeman St. For some reason the trash on top of it makes it stand out more.

Standard mitigation time is seven days. I'll be out in a week to follow-up.  
If you have any questions, please let me know.  
Thanks.

**Cc:** grant@inspectionsplusinc.com  
**Subject:** SWPPP inspeciton 4th and freeman  
**Attachments:** no-constr-entrance.jpg

Jose,  
I visited the construction site at 4<sup>th</sup> and Freeman on Wednesday. The silt fence looked good and there was no trash. However, you need to put in a stabilized rock construction entrance (see ESC plan from Inspections plus) and the site wasn't posted per paragraph 1.5 of the CGP.

7 days is the generally acceptable time frame to fix these things.  
Please let me know if you have any questions.
