Totten,

We'd like to request an extension for the subject Temp CO to allow time to complete the last item – the inlet. The work is scheduled for Thursday, October 12 when school will be out for fall break. This will allow time for the concrete to harden by the time school resumes the following week.

As per below, the first item (wall opening) is not needed and we will note that on the final submittal. The other two items (roof drain and water quality pond) are complete and will also be verified.

Please let us know if you have any questions, or if there is any additional information we can provide.

Thank you,

Graeme

Totten,

One comment/observation: The wall opening at the mechanical yard is not required because they yard was constructed differently and drains to the southeast out the door, and not to the northwest. We'll note that on the final cert/resubmittal.

Thanks, again.

APS/HB/SSWA Team, please see attached approval for Temp CO with conditions to be satisfied and verified for final CO.

Let us know if you have any questions.

Graeme
