To Whom It May Concern:

After meeting with John Battaglia, Richard Dineen, and Ron Satriana and reviewing the attached updated grading and drainage plan, sheet C-001, PNM approves the design of the drainage pond in relation to the existing wood poles, downguys, and anchors. Minimum clearance requirements on both sides of the existing primary pole are to be 5' on the sides and 3' in the front. This will allow PNM trucks to access the pole for maintenance and/or for replacement purposes. The down guys and anchors should be outside the pond area per sheet C-001. The secondary pole to the Northeast will be accessed from the property to the North or by a crane if access is not possible. If you have any questions please feel free to contact me at 719-337-1599.

Sincerely,

Adrian Pereida
