Sir, first and foremost, sincerely apologies for the delay in response. My email has been inoperable for several weeks and I'm currently having to use a web based program which doesn't allow for incoming notifications, amongst other problems. Nonetheless, the only time in which we would require a Fire 1 is if you are adding additional square footage to an existing building and/or this is a new ground up construction. Our department is only department that may request a Fire 1 sheet to be submitted. If you have any additional questions please feel free to contact me via telephonic means, my respective numbers are below, so I may address any questions and/or concerns you may have.

Good afternoon Robert,  
Hope all is well!

We have a project that we submitted for building permit. It went through all departments as well as yours. You guys requested information in regard to the change of use but did not request a FIRE 1. During the review phase, the city made us get a TCL. Well during the TCL process, the transportation reviewer is requesting that we get FIRE 1 approval. I've attached the project and plans. Could you take a look and let me know if we need a FIRE 1?

Thanks for your help!
