SUBMITTED BY: GUY JACKSON, PE DATE: 7-23-12

Requests for approvals of Site Development Plans and/or Subdivision Plats shall be accompanied by a drainage submittal. The particular nature, location and scope to the proposed development define the degree of drainage detail. One or more of the following levels of submittal may be required based on the following:

1. **Conceptual Grading and Drainage Plan:** Required for approval of Site Development Plans greater than five (5) acres and Sector Plans.
2. **Drainage Plans:** Required for building permits, grading permits, paving permits and site plans less than five (5) acres.
3. **Drainage Report:** Required for subdivision containing more than ten (10) lots or constituting five (5) acres or more.

July 23, 2012

Shahab Biazar, PE  
Senior Engineer, Planning Department  
Hydrology  
Development & Building Services

Albuquerque, New Mexico 87103

**Re: Lots 2-A, 2-B, 2-C & 2-D –Lands of Della Sanchez, Albuquerque, NM  
(Zone Atlas Map J-12/13). DRB Project # 1007971**

Dear Shahab:

Attached for Preliminary Plat approval are the following:

- One (1) drainage information sheet
- One (1) copy of the master drainage & grading plan
- One (1) copy of the drainage calculations/spreadsheet

Please review the following responses to your comments received July 18, 2012.

*Comment 1) Please identify any offsite flows entering the proposed drainage basins. It appears that flows may enter the property from Tracts A & B, Lot 1, Lot 7 as well as Lots 8-A & 8-B.*

Response: I spoke with Chuck Cala PS (High Mesa Consulting Group) and he explained that obtaining access to the rear and side yards of the adjacent properties was not in crew's best interest, because of dogs and undesirable access conditions. He also mentioned that the topography on these adjacent properties appears to be virtually flat and that the grades at the property lines on the east and south were "mounded at the fence lines". I visited the site on 7/19/2012 and attest to his opinion. I did however, review the AGIS contours that were available for the adjacent sites and created "potential offsite basins" that include all of the basins that you referenced (*Tracts A & B, Lot 1, Lot 7 as well as Lots 8-A & 8-B.*) I also included a portion of the MRGCD ROW to the north to their fence line that does appear to drain into the subject property. With this said, I have revised the grading & drainage master plan and calculations to indicate these potential offsite basins.

*Comment 2): Include the existing and proposed spot elevations labels in the legend.*

Response: Concur -these have been added as requested.

*Comment 3) Top of curb, flowlines and proposed spot elevations are not visible on the plan. Please enlarge the text size.*

Response: Concur –The texts of these elements were enlarged as requested.

*Comment 4) Add the legal description on the plan.*

Response: Concur –The description has been added to the plan as required.

Mr. Shahab Biazar

July 21, 2012

Page 2

*Comment 5) Show the elevations for the existing contours.*

Response: Concur –the elevations have been shown on the existing contours. Note that all of the existing contours within the property are at the elevation of 4958.

Finally, I'm in hopes of getting on the DRB agenda for next week (8/1/12). If at all possible, would you please consider reviewing this before the end of Tuesday (7/24) so that I can make the application by noon on 7/24? Anything you can do would be greatly appreciated.

Note that I'm submitting these materials via e-mail and will follow up with an official re-submittal on Monday morning (7/23/12).

Please contact me if you have any questions or comments.

Sincerely,

GUY JACKSON & ASSOCIATES, LLC

Guy C. Jackson, PE
