Grant of Permanent Drainage Easement, by New Mexico Gas Company, Inc., a Delaware corporation ("Grantor"), whose address is 7120 Wyoming Blvd, NE, Suite 20, Albuquerque, NM 87109, for the benefit of Lots B-1, C-1, D-1 and E-1, Block 44, of the Perea Addition ("Grantee"), situate in Section 18, Township 10 North, Range 3 East, N.M.P.M., City of Albuquerque, Bernalillo County, New Mexico.

Grantor grants to the Grantee a non-exclusive, perpetual drainage easement ("Easement"), said Easement being more particularly described on Exhibit "A," for the construction, installation, maintenance, repair, modification, replacement and operation of a private drainage facility ("Facility"), together with the right to remove trees, shrubs, undergrowth and any other obstacles within the Easement if the Grantee determines they interfere with the appropriate use of this Easement. The maintenance of the Facility shall be the responsibility of the Grantee and shall be in accordance with the approved Drainage Report and Plans. Grantee agrees that all installation, maintenance, repair, modification, replacement, operation and any other activities within the Easement will be coordinated with Grantor so as to minimize any disruption to Grantor's property.

In no event shall Grantee's use of the Easement interfere with the Grantor's use of the Grantor's property. Grantee shall not enter into Grantor's property other than as explicitly authorized by this grant of Easement, and in no event shall Grantee enter upon or perform any work upon any of Grantor's improvements on Grantor's property. To the fullest extent permitted by applicable law. Grantee shall indemnify, defend and hold harmless Grantor, Grantor's affiliates and their respective directors, officers, employees, representatives, and agents from and against any and all damages, losses, claims, obligations, demands, assessments, penalties, liabilities, costs, and expenses (including attorney fees and expenses), arising out of or resulting from Grantee or Grantee's members, officers, employees, representatives, and agents use of the Easement, including but not limited to the existence of the Facility thereon. Grantee shall not cause or permit to be caused by any of its employees or agents any hazardous substances, pollutants or contaminants, as defined by applicable law, to be dumped, spilled, released, stored or deposited on, over or beneath the Easement or any other property owned by Grantor.

Grantor covenants and warrants that Grantor is the owner in fee simple of the real property comprising the Easement, and that Grantor has a good lawful right to convey the Easement.

The grant and other provisions of this Easement constitute covenants running

with the Easement for the benefit of the Grantee and its successors and assigns until terminated.

Site Grading and Drainage Plan

PURPOSE

The purpose of this report is to provide the Drainage Management Plan for the redevelopment of an existing lot located on the southwest corner of 14th and Mountain NW. This plan was prepared in accordance with the City of Albuquerque design regulations, utilizing the City of Albuquerque's Development Process Manual drainage guidelines. This report will demonstrate that the proposed development does not adversely affect the surrounding properties, nor the upstream or downstream facilities.

INTRODUCTION

The subject of this report, as shown on the Exhibit A, is a 0.33-acre parcel of land located on the southwest quadrant of 14th and Mountain in the near north valley of Albuquerque. The lot is currently being combined into one lot; the existing legal description of this site is lots B, C, D, and E Block 44 Perea Addition. As shown on FIRM map3501C0331HF, the entire property is located within Flood Zone X. This site is an existing site developed as a single family residence with large parking area. Based on the site location and the adjacent drainage infrastructure this development must drain to Mountain and the adjacent property at less than existing conditions.

EXISTING CONDITIONS

The site is currently developed. The site is not impacted by any offsite flows, and is surrounded by developed properties. The site discharges to the adjacent lot to the east, were the flow enters 14th street and drains to an inlet at the corner of 14th and mountain. As shown in Appendix A, the existing site discharges at a peak rate of 0.93cfs in a 100-year, 6-hour event. The discharge leaves the site as sheet flow upon the lot to the east were it enters 14th street and captured by an inlet at 14th and Mountain.

PROPOSED CONDITIONS

The proposed improvements consist of a 4 town homes on the combined lot. The site will be graded to create 2 basins. Basin A contains the front half of the buildings and the shared parking areas. This basin generates 0.91 cfs that will drain to a water harvest pond located at the North West corner. The outfall is restricted by a 6" pipe. The parking lot functions as a detention basin and the routed flow is decreased to 0.53 cfs. The maximum water surface elevation will be 4959.77. The parking lot will discharge to the street at 5960 in the event of clogging. This basin will retain a water quality volume of 275 cf, which exceeds the required of 256 cf. Basin B contains the rear of the buildings and back yard. This basin will generate a peak flow rate of .38 cfs draining to the adjacent lot. This basin is throttled by the addition of a 4" pipe with the rear yards acting as a detention basin, the routed discharge rate will be 0.20 cfs. This basin will retain a water quality volume of 286, which exceeds the 84 cf required. In the event of clogging, the basin will discharge to basin A and leave the site via the driveway. The combined flow leaving the site will be 0.73, which is less than existing rate of 0.93 cfs. The drainage patterns are modified to direct more flow to the street. The downstream collection point remains the inlet at 14th and Mountain

SUMMARY AND RECOMMENDATIONS

This project is an infill project within a completely developed area of the near north Valley Albuquerque. The project is a redevelopment of an existing site. The site currently discharges .93 cfs to 14th street over an adjacent vacant lot. The proposed drainage plan drains the majority of the lot to mountain. The rear portion of the lot will continue to drain upon the adjacent lot, which is a natural gas pipeline valve station. The total flow leaving the site is reduced to 0.73 cfs by utilizing detention ponds with orifice restrictions. The first flush volume is retained onsite. The proposed decrease of 0.2 cfs shall have no negative impact on existing drainage patterns.

[1] Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values.

Please refer to NOAA Atlas 14 document for more information.

To the fullest extent permitted by applicable law. Grantee shall indemnify, defend and hold harmless Grantor, Grantor's affiliates and their respective directors, officers, employees, representatives, and agents from and against any and all damages, losses, claims, obligations, demands, assessments, penalties, liabilities, costs, and expenses (including attorney fees and expenses), arising out of or resulting from Grantee or Grantee's members, officers, employees, representatives, and agents use of the Easement, including but not limited to the existence of the Facility thereon. Grantee shall not cause or permit to be caused by any of its employees or agents any hazardous substances, pollutants or contaminants, as defined by applicable law, to be dumped, spilled, released, stored or deposited on, over or beneath the Easement or any other property owned by Grantor.

Grantor covenants and warrants that Grantor is the owner in fee simple of the real property comprising the Easement, and that Grantor has a good lawful right to convey the Easement.
