REPRESENTING

ATTENDANCE: Frank Lovelady
Billy Goolsby

FINDINGS: ① Drainage Plan per DPM required
② Site not in Flood Hazard. However, the site is located in the valley and downstream capacity analysis will dictate discharge from the site.
③ Flows may be divided to 8th & Kerkher St NW. West flows to be routed through landscaping and containing nuisance flows on-site - "Construction Within Public R/W" document required as needed
④ Erosion Control Plan required for the period of construction.

The undersigned agrees that the above findings are summarized accurately and are only subject to change if further investigation reveals that they are not reasonable or that they are based on inaccurate information.
