RE: ROBERT GIBSON ADDITION -- J-14

Gentlemen:

Mark Goodwin and Associates is pleased to submit the Grading and Drainage Plan for the referenced project for your review.

As you will note from the drawing, the site is currently a paved parking lot with an alley. The alley is currently not paved, therefore, we have requested alley grades from MDD. We were told that this process could take six weeks. In any case, we are not proposing to do any improvements near or in the alley. Stormwater runoff does not enter this site from the alley nor from anywhere off-site.

We wish to state that we are not increasing the peak rate of runoff from this site with this proposed addition. In fact, the peak should be slightly less in that it is proposed to replace 350 square feet of the existing parking lot with landscaped areas.

If we may be of further service to you in this matter, please call.

Sincerely,

D. Mark Goodwin and Associates, P.A.

Mark Goodwin, P.E.
