RE: ENGINEER CERTIFICATION FOR FOURTH STREET FUELING FACILITY (J14-D98)  
ENGINEER STATEMENT DATED 4/7/93.

Dear Mr. Roybal:

Based on the information provided on your April 7, 1993 submittal, Engineer Certification for the above referenced site is acceptable.

If I can be of further assistance, please feel free to contact me at 768-2667.

Sincerely,

Bernie J. Montoya, CE  
Engineering Assistant

P.O. Box 1293  
Albuquerque, NM 87103

**RE: REQUEST FOR CERTIFICATE OF OCCUPANCY APPROVAL FOR THE 4TH STREET FUELING FACILITY**

Dear Mr. Aquirre:

Enclosed for Certificate of Occupancy approval is my certification of compliance with the previously approved drainage plan. As requested, we are also enclosing the Certified Drainage Plan, Drainage Information Sheet, the Pre-Design Conference Report, and the DPM Engineer Certification Checklist.

As noted on the enclosed as-built drainage plan, the only deviation from the design plan were the raised slab elevations over the underground fuel storage tanks and pump islands which resulted in improved drainage but did not change the drainage areas nor the point of discharge.

If you have any questions regarding this request for approval, please call me or Mr. Lee Bell at 889-4100.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul C. Roybal".

FINDINGS:

- An approved drainage plan is required for building permit ~~and DRC~~ approval ~~and~~ DRC sign-off.
- The existing sidewalk culvert adjacent to the Credit Union is acceptable for the nuisance flows. Flows in excess of the nuisance flows are allowed to overflow the sidewalk.
- Ponding not required if the existing drainage pattern is maintained.
- Certification ~~required~~ for compliance with the approved drainage plan is required for Certificate of Occupancy sign-off.

The undersigned agrees that the above findings are summarized accurately and are only subject to change if further investigation reveals that they are not reasonable or that they are based on inaccurate information.

## ENGINEER'S CERTIFICATION CHECKLIST

Use this checklist when certifying compliance with an approved drainage report or drainage plan for public buildings, commercial buildings and multi-residential buildings requiring a Certificate of Occupancy. Engineer must provide the information below on the original reproducible drainage plan. Engineer's certification is strongly recommended for major projects, projects requiring numerous drainage inspections during construction, projects in flood hazard area and phased projects.

- ✓1. Completed Information Sheet - see Information Sheet.
- N/A 2. Provide as-built pad elevations.
- N/A 3. Provide as-built spot elevations on the property line and/or limits of phase development (points of significant grade changes) to demonstrate compliance with the approved drainage report or drainage plan.
- N/A 4. Provide copies of construction approval from the appropriate government agencies for construction within their rights-of-way and/or easements.
- ✓5. Outline the as-built drainage basin(s) (including roof areas) supported with sufficient spot elevations and roof drain locations.
- ✓6. Provide as-built elevations and dimensions for the following structures:
  - N/A A. Pond(s)
  - N/A B. Pipe inlet(s) and outlet(s)
  - N/A C. Rundown(s) (including the required inlet dimensions)
  - N/A D. Spillway(s) (including the required outlet dimensions)
  - ✓E. Channel(s)
  - ✓F. Swale(s)
  - N/A G. Erosion control structure(s)
  - N/A H. Temporary drainage facilities required for phased development
  - ✓I. Retaining and/or garden wall(s)
  - J. Other
- ✓7. Professional Certification-engineer's stamp dated and signed accompanied with a statement indicating substantial compliance with the approved drainage report and/or plan.
- ✓8. As-built plan.

RE: DRAINAGE PLAN FOR THE FOURTH STREET FUELING FACILITY  
(J-14/D98) & 4309.90 ENGINEER'S STAMP DATED MARCH 6, 1992

Dear Mr. Roybal:

Based on the information provided on your submittal of March 9, 1992, the following concerns must be addressed prior to final approval.

✓ 1. Bench Marks - location, description and elevation

- a. Albuquerque Control Survey Vertical Datum used. - "Z-H14"
- b. Temporary bench mark on site permanently marked. R.R. SPIKE in P.P.

✓ 2. Site Description

- ✓ a. Vicinity map, please include the zone atlas map index number. H14; J14
- b. Legal description or current plat. - "see Attached"

3. Flow volumes and rates - calculations showing on-site undeveloped and developed flow volumes and rates. Use attached emergency rule criteria for your calculations. - Shown on Plan

4. Are there any off-site flows entering from the surrounding properties? No

5. New or proposed elevations must be determined and not estimated.

"As per telephone conversation"

**RE: FINAL DRAINAGE PLAN FOR THE 4TH STREET FUELING FACILITY**

Dear Mr. Aguirre:

Enclosed for Building Permit approval and DRC sign-off is the final drainage plan for the 4th street Fueling Facility which reflects the items of discussion during our pre-design conference on 2/5/92.

A review of the plans will confirm that the existing drainage pattern for the site has been preserved and that we are making use of the existing sidewalk culvert and driveways to convey nuisance flows; excess flows will be allowed to overflow the sidewalk as in the past and agreed to during our pre-design conference.

Thank you for your assistance and prompt response to our request for an informal meeting.

If you or members of your staff have any questions, please call me or Mr. Lee Bell at 889-4100.

Sincerely,

Paul C. Roybal, P.E.
