RE: FINAL DRAINAGE PLAN FOR THE 4TH STREET FUELING FACILITY

Dear Mr. Aguirre:

Enclosed for Building Permit approval and DRC sign-off is the final drainage plan for the 4th street Fueling Facility which reflects the items of discussion during our pre-design conference on 2/5/92.

A review of the plans will confirm that the existing drainage pattern for the site has been preserved and that we are making use of the existing sidewalk culvert and driveways to convey nuisance flows; excess flows will be allowed to overflow the sidewalk as in the past and agreed to during our pre-design conference.

Thank you for your assistance and prompt response to our request for an informal meeting.

If you or members of your staff have any questions, please call me or Mr. Lee Bell at 889-4100.

Sincerely,

Paul C. Roybal, P.E.
Project Manager
