**Re: Applebee's, 98th St.
Traffic Circulation Layout**
Engineer's/Architect's Stamp dated 2-27-15 (K09-D038)

Dear Mr. Wooten,

Based upon the information provided in your submittal received 2/27/15, the above referenced plan cannot be approved for Building Permit until the following comments are addressed:

1. The proposed development looks like it may meet the threshold for a Traffic Impact Study based upon the combined square footage of the Applebee's and proposed adjacent retail site. Provide a trip generation.
2. For next submittal, please provide site address and/or legal description.
3. On next submittal, please label drawing as "Traffic Circulation Layout" in lieu of "Site Plan".
4. Provide separate D.R.C. drawings for outer curbs on 98th St. R.O.W. On the Traffic Circulation layout, provide a dimension from the median curb to the proposed curb, and label lane widths for southbound traffic on 98th Street.
5. Subject site entrance off of 98th St. must have a 5 ft. keyway for vehicles backing up out of parking spaces shown at Keyed Note 10. In order to accomplish this requirement, the developer may reduce parking space width to 8.5 ft.
6. The ADA van accessible sign must have the required language per 66-7-352.4C NMSA 1978 **"Violators Are Subject to a Fine and/or Towing."** Please show detail on drawing.
7. The ADA van accessible aisles are required to be a minimum 8.5 feet in width. Label these widths on the site plan.
8. The ADA access aisle shall have the words **"NO PARKING"** in capital letters, each of which shall be at least one foot high and at least two inches wide,

9. Parking spaces must be a minimum of 18 ft. in length. Proposed drawing shows all spaces as 16 ft. in length. Per code, "Compact Parking" shall only consist of one-third of the total number of parking spaces, excluding number of handicap parking spaces. Either increase the parking space length to 18 feet while maintaining the 24-foot wide parking aisle, or call out a 2-foot overhang over the islands to satisfy the 18-foot requirement. For all parking spaces that are kept compact, list them as "Compact".
10. Label curb radii for all curves shown; for passenger vehicles, the minimum end island radius is 15 feet, but 10 feet is shown for many of these islands. Also show the 2-foot radii as applicable. (See Figure 23.7.2 of the DPM.)
11. Per the DPM, a 6 ft. wide ADA accessible pedestrian pathway is required from the HC parking stall access aisles to the building entrances. Please show detail on drawing. Please show detail for call-out notes #5 and #25 for curb ramps, showing all details including the maximum 12:1 slope for the ramp, the maximum 2% cross-slope and all necessary dimensions. (In order to meet this requirement, a 6-foot wide landing area is required at the top of the ramps from the parking lots to the proposed retail building. Otherwise, the ramp may be changed to the same style of the ramps in front of the Applebee's as long as they are 6 feet wide.) For the Applebee's ramps, call out the ramps to be a minimum of 6 feet wide.
12. Per the DPM, a 6-foot wide ADA accessible pathway is required from the public right-of-way to the building entrances. For all note call-outs for Note 12 for the pedestrian walkways only, label the dimension of the pedestrian walkway as 6 feet. Also, provide a minimum dimension of 6 feet behind the back of the ramp on the south side of the south entrance.
13. Label the existing curb ramp on the north side of the north entrance. Call out for truncated domes to be placed on this existing ramp.
14. Design delivery vehicle route needs to be shown.
15. For each of the two driveway entrances off of 98th Street, please provide a clear sight triangle. (see the *Development Process Manual, Chapter 23, Section 3, Part D.5 Intersection Sight Distance*).

placed at the rear of the parking space so as to be close to where an adjacent vehicle's rear tire would be placed. (66-1-4.1.B NMSA 1978)

16. Please add the following note to the clear sight triangle: "Landscaping and signage will not interfere with clear sight requirements. Therefore, signs, walls, trees, and shrubbery between 3 and 8 feet tall (as measured from the gutter pan) will not be acceptable in this area." (The signage called out by Keyed Note number 18 may interfere with this requirement.)
17. Label the recording information for the existing 40-foot access easement and DRB Case Number.
18. Platting action and infrastructure list must be finalized prior to approving Traffic Circulation layout with regard to proposed curb and sidewalk.
19. Please include two copies of the traffic circulation layout at the next submittal.
