Ensure that all stormwater controls (BMPs) are maintained and remain in effective operating condition during permit coverage per CGP 2.1.4. If at any time you find that a stormwater control needs routine Maintenance, you must immediately initiate the needed maintenance work and complete such work by the close of the next business day. When the problem requires a new or replacement control or significant repair, install the new or modified control and make it operational, or complete the repair, by no later than seven (7) calendar days from the time of discovery per CGP 5.2.1. Sediment was in the street near an inlet located on the north side of Bluewater at the intersection of Daytona Rd Required Mitigation: Where sediment has been tracked-out from your site onto paved roads and sidewalks remove the deposited sediment by the end of the same business day CGP 2.2.4.d. FYI In accordance with City Ordinance § 14-5-2-11(C)(1), self-inspections must continue until the site is "determined as stabilized by the city." The property owner/operator is responsible for determining when the "Conditions for Terminating CGP Coverage" per CGP Part 8.2 are satisfied and then for filing their Notice of Termination (NOT) with the EPA. Each operator may terminate CGP coverage only if one or more of the conditions in Part 8.2.1, 8.2.2, or 8.2.3 has occurred. After filing the NOT with the EPA, the property owner is responsible for requesting a Determination of Stabilization from the City. Prompt stabilization and termination is an alternative to the above required mitigation.		· · · ·							
BMPs - the Silt Fence (SF) on the north side of Bluewater from Maverik to Daytona Rd was severely deteriorated, nothing but wire and posts remained, in violation of CGP 2.1.4. Required Mitigation: 3. Ensure that all stormwater controls (BMPs) are maintained and remain in effective operating condition during permit coverage per CGP 2.1.4. If at any time you find that a stormwater control needs routine Maintenance, you must immediately initiate the needed maintenance work and complete such work by the close of the next business day. When the problem requires a new or replacement control or significant repair, install the new or modified control and make it operational, or complete the repair, by no later than seven (7) calendar days from the time of discovery per CGP 5.2.1. 4 Sediment was in the street near an inlet located on the north side of Bluewater at the intersection of Daytona Rd Required Mitigation: Where sediment has been tracked-out from your site onto paved roads and sidewalks remove the deposited sediment by the end of the same business day CGP 2.2.4.d. Notes: The NPDES ID # NMR1002MI belongs to the contractor Insight Construction who hasn'e been onsite in about 3 years. That coverage under the 2017 permit expired a year ago, and the City has no record of permit coverage for the property owner, "98th and I-40 Land, LLC." It has been 2 years since the last inspection and there are not any prior violations in the City files on this project.
