Re: Zanios/Brunacini: Airport Drive Storm Drainage Upgrade

Dear Ted:

This will follow up on our July 1993 correspondence regarding the referenced storm sewer upgrade and the termination of a drainage covenant which affects the property of our client, Zanios Foods.

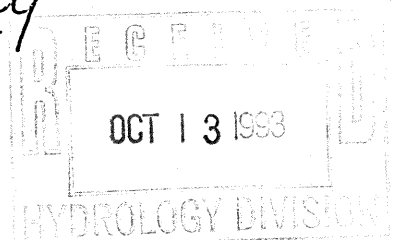

It is my understanding from the contractor that the detention pond improvements have been finally completed and the on-site survey work necessary to do the required city certificate of completion has also been completed. I expect within the next few days that the engineer will furnish a satisfactory certificate of completion to City Hydrology so that you can circulate the termination documents for signature within the City. For your assistance, I am enclosing a photocopy of the termination documentation which you have previously approved as to form.

Thank you very much.

Very truly yours,

Henry A. Kelly
