Re: Central/Airport Business Park, K-10/D21A

Dear Mr. Aldaz

The Grading and Drainage Plan for the subject site was approved for building permit on November 26, 1991. Since that time the proposed site plan has been altered and the Site Plan for Development will be heard by the DRB on February 18, 1992. This submittal reflects the changes made on the site plan for the project.

The drainage patterns and the ultimate proposed development are unchanged. This phase of the development has been reduced in scope by reducing both the building and paving areas. The ponds have been retained in their originally designed configuration. Since the change (reduce impervious surface by approx. 20,000s.f.) will not have an adverse effect in the interim condition and there is no planned change in the ultimate plan it is suggested that the drainage data on file under the subject file number be retained and no revisions be made at this time.

If additional information or clarification are needed please notify me.

Sincerely,

Jean J. (Jake) Bordenave
