Subject: Erosion & Sediment Control Plan For 6660 Central Avenue (K10/E025C)

Hi,

I have the following comments on the submittal for 6660 Central Avenue's Erosion & Sediment Control (ESC) Plan, K10/E025C:

- _ Sing posting location should be shown on the plan (sign to be visible from public street).
- _ "Compacted Construction Entrance" should be 50' min. in length.
- _ The legends should match the plan.
- _ Include BMP details on the plan. If BMP details are shown on a separate sheet, please make sure the plan is signed and stamped.

Just a reminder to submit electronic (PDF format) copy of the plan when submitting the hard copy. You can email the PDF files to Monica or Tim prior to your hard copy submittal.

Please let me know when you submit the revisions, and I can approve the ESC plan.

Thanks and have a nice day

Shahab Biazar, P.E.
