RE: DRAINAGE PLAN FOR WEST MESA MOBILE HOMES (K10-D28) ENGINEER'S
STAMP DATED 6/4/98

Dear Mr. Biazar:

Based on the information provided on your June 29,1998 submittal, the above referenced site is approved for Site Development Plan for Building Permit and Building Permit.

Please attach a copy of this approved plan to the construction sets prior to sign-off by Hydrology.

Also, a separate permit is required for construction within City R/W. A copy of this approval letter must be on hand when applying for the excavation permit.

Prior to Certificate of Occupancy release, Engineer Certification per the DPM checklist will be required.

If I can be of further assistance, please feel free to contact me at 924-3986.

C: Andrew Garcia
Arlene Portillo
File

Sincerely

Bernie J. Montoya CE
Associate Engineer

Good for You, Albuquerque!

Location

West Mesa Mobile Homes (Tract B-1-B-1 west 66 addition) contains ± 2.16 acres and is found at the northwest corner of Central Avenue and Airport Drive NW. See attached Zone Atlas page number K-10 for location.

Purpose

The purpose of this drainage report is to present a grading and drainage solution for the proposed sites. We are requesting rough grading approval, site development plan for building permit, paving and building permit.

Existing Drainage Conditions

The Tract has been partially paved and contains some parked mobile homes on the site. The site drains to the southeast corner of the tract at a flow rate of 7.82 cfs to an existing retention pond. In case of when the pond runs out of storage volume the runoff overflows through an existing concrete spillway into a 20' private drainage easement. Then from there it drains west to Airport Drive. There is an existing concrete overspill that when the runoff volume exceeds the volume of the pond overflows into an existing 20' drainage easement along the westerly property line and then to Airport Drive. There are no offsite runoff that

enters the site. All the offsite runoff to the north and the west drain east and south to Airport Drive and Central Avenue. All the offsite runoff to the south and to the east are intercepted by Central Avenue and Airport Drive.

Flood Plain

The site is located on FIRM Map No. 35001C0329 D as shown on the attached excerpt. The map shows that the site does not lie within any 100 year flood plains.

Proposed Conditions and On-Site Drainage Management Plan

We are proposing to place an sales/office building of 2432 sf with a parking lot for customers. The drainage pattern will remain the same. The runoff will drain to the existing pond located at the southwest corner of the tract at a developed flow rate of 8.98 cfs. A pump will be placed in the pond to pump the runoff at a maximum flow rate of 120 g.p.m. (0.27 cfs). The pump drains the runoff via a two-inch pipe which will be daylighted into the face of the curb along Airport Drive. The pond has been analyzed using AHYMO for its capacity. Based on the AHYMO summery, by placing a pump, the pond has enough capacity (without an increase in volume) to handle the developed runoff. The 100-year water surface elevation is 5093.6' which is lower than the top of the pond (an elevation of 5094.00'). A water block will be place at the entrance from Central to sales office to keep the runoff in the street.

Emergency Conditions

In case of an emergency when the pump fails or an event larger than 100-year occurs the pond will over flow through the existing concrete spillway into the existing 20' private drainage easement. Ten from there it drains west to Airport Drive.

Calculations

City of Albuquerque, Development Process Manuel, Section 22.2, Hydrology Section, revised January, 1993 was used for runoff calculations. See section II of this report for Summary Table for runoff results. See also for AHYMO input and output, and summery output file for runoff and ponding calculations.

RUNOFF CALCULATIONS

The site is @ Zone 1

LAND TREATMENT

Proposed

D = 90.00 %

B = 10.00 %

Existing

B = 20 %

C = 20 %

RE: GRADING PLAN FOR TRACT B-1-B-1 WEST 66 ADDITION (K10-D28)
ENGINEER'S STAMP DATED 2/2/95.

Dear Mr. Martinez:

Based on the information provided on your February 13, 1995
submittal, the above referenced site is approved for grading.

Please be advised that Engineer Certification will be required
when the grading of ponding area is completed.

If I can be of further assistance, please feel free to contact me
at 768-2667.

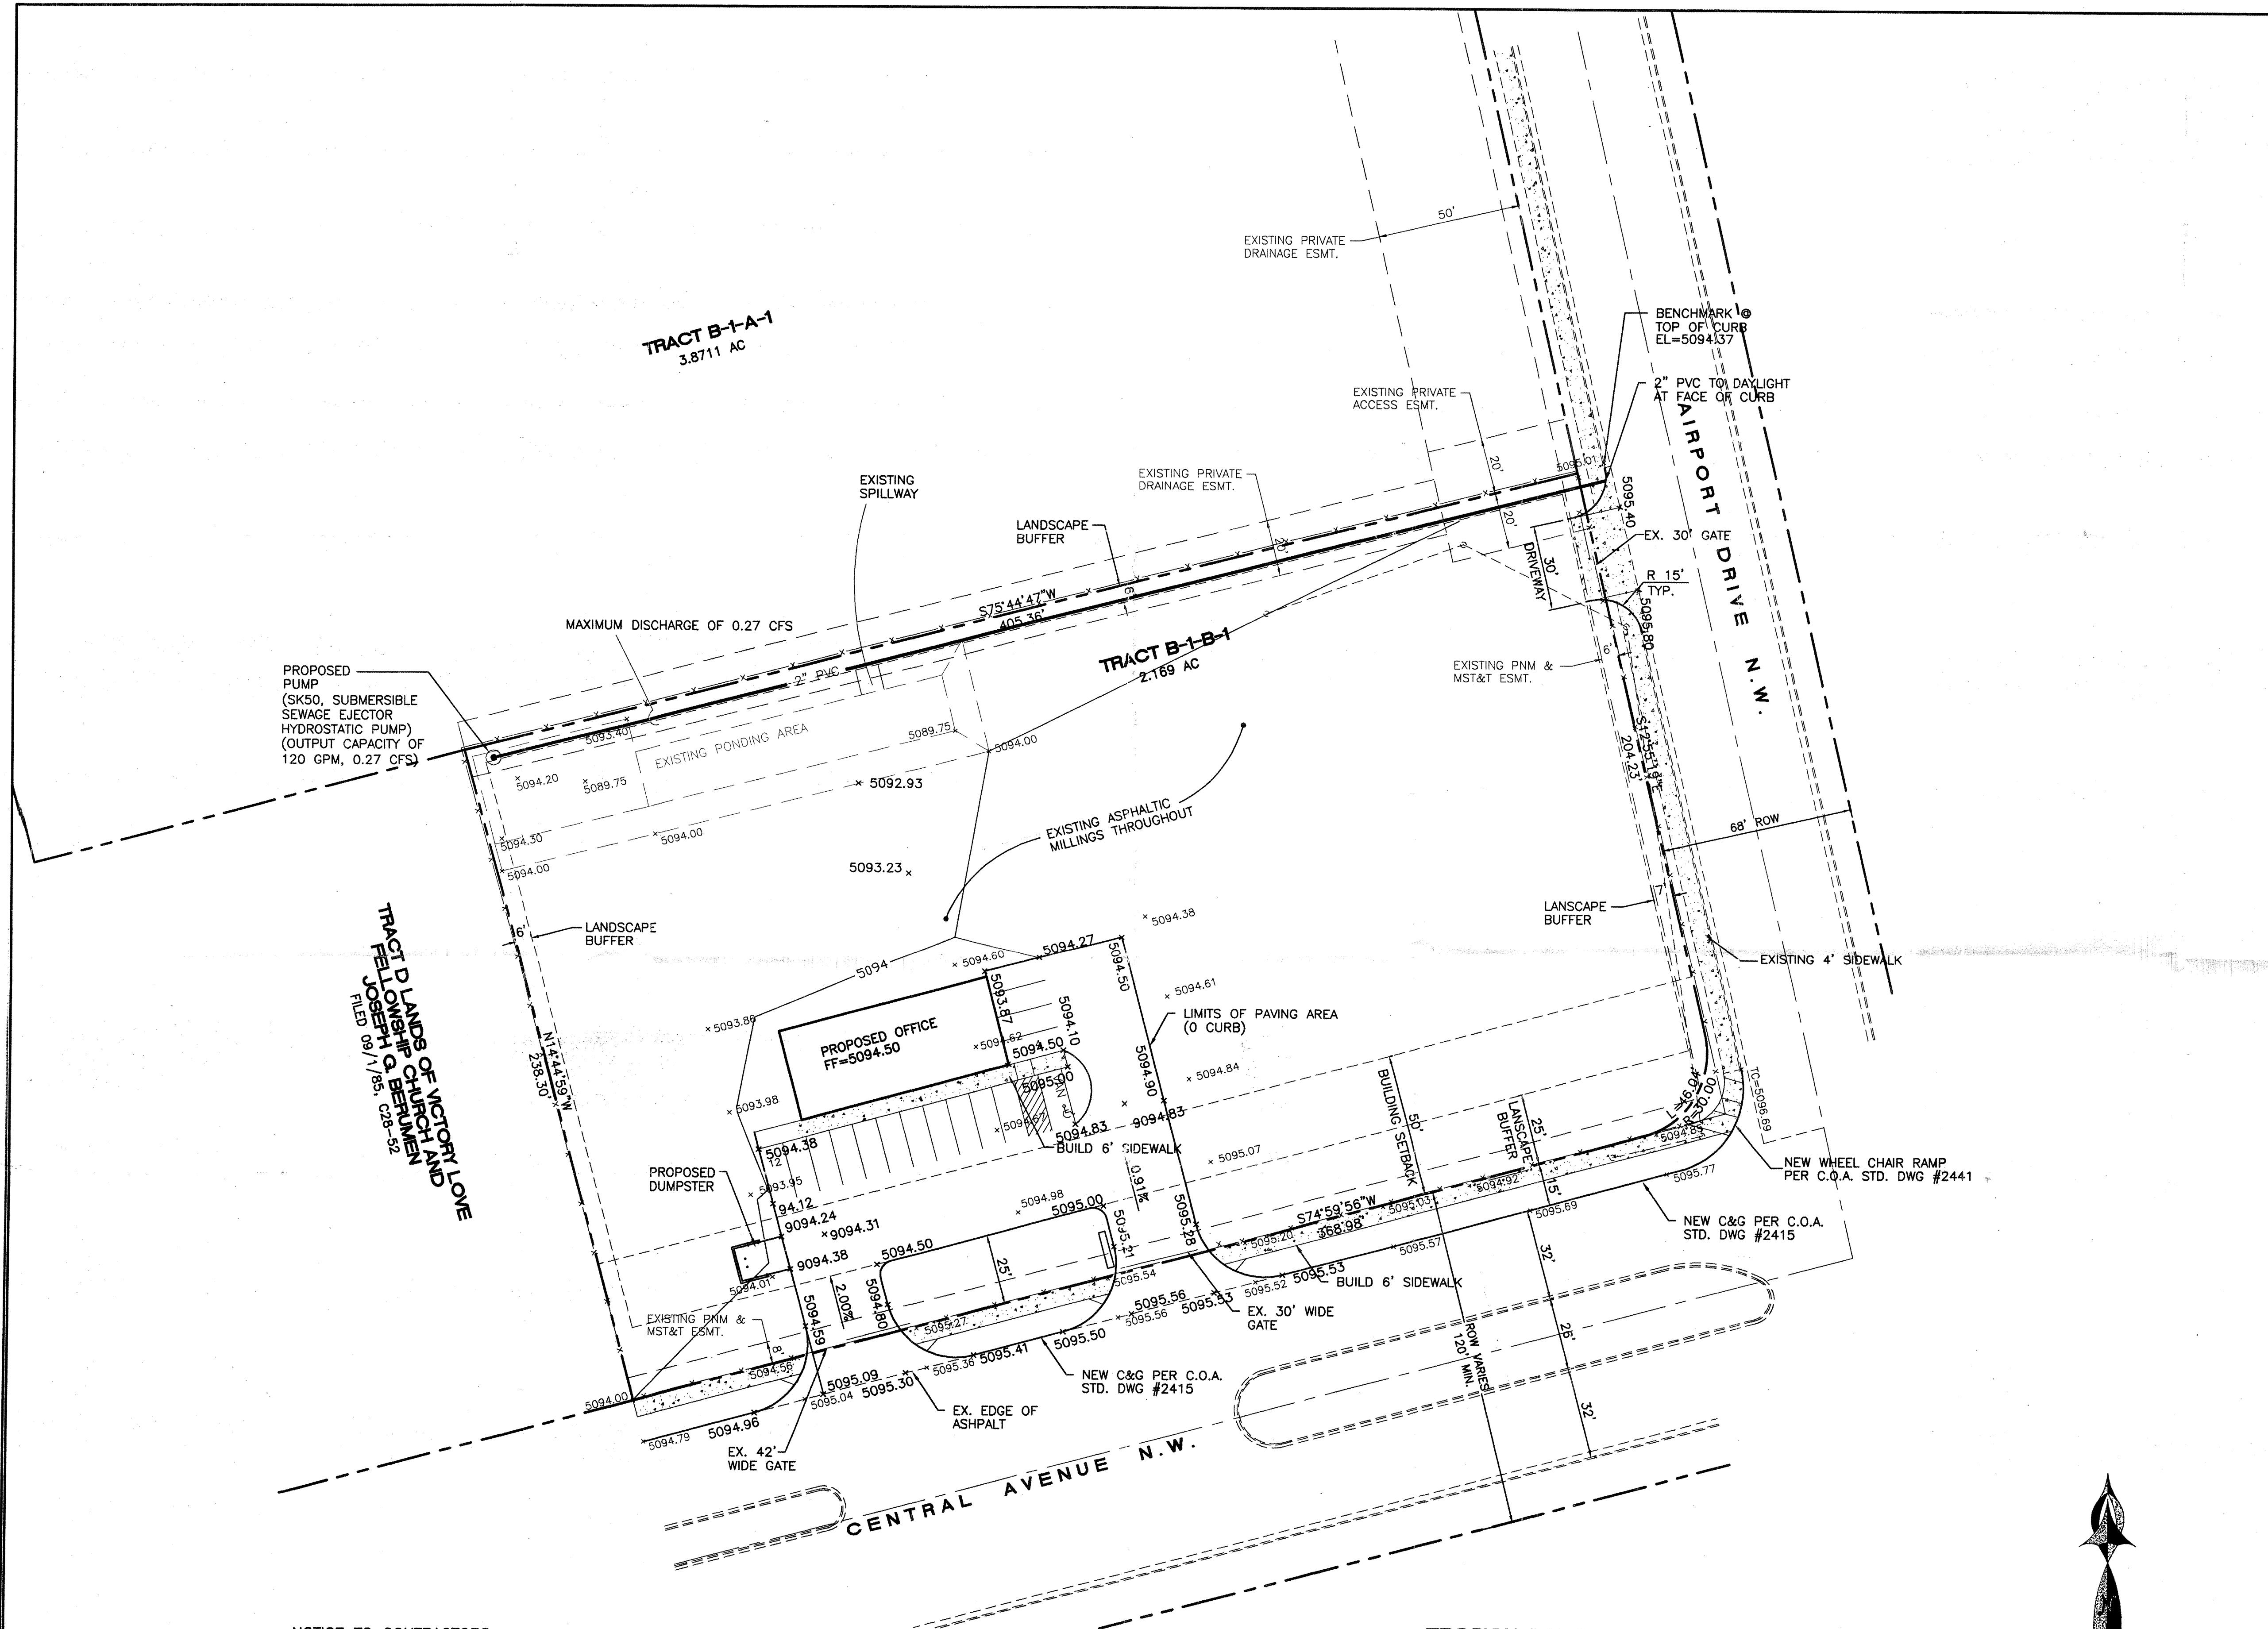

Sincerely,

Bernie J. Montoya
