

City of Albuquerque
Stormwater Construction Site
Inspection Report

General Information

Project Name and Location	Generating at West Mesa 5th & Avalon		
Site Contact Name & Agency	Joe Cocchia Gorman & Gurney	ESC File No. NPDES ID No.	K11E004
Date of Inspection	1-9-19	Start/End Time	10:05/10:40
COA Inspector Name	Curtis Cherne, Stormwater Quality		
Describe Present Phase of Construction	Constructing bldgs		

Type of Inspection:

☒ Regular • During storm event • Post-storm event (> 0.25 inch) • 311 / Complaint Response • Follow-Up

Weather Information

Weather at time of this inspection?

Temperature: ~ 35 F°

☒ Clear • Cloudy • Rain • Sleet • Fog • Snowing • Windy

Has there been a storm event since the site was Permitted? ☒ Yes • No

Amount: • < 1/4" • ☒ 1/4" to 3/4" • > 3/4" • Snow _____"

Inspection

CGP ¹ Section	BMP / Activity	Maintenance or Corrective Action Required	Location and Notes
1.5	Post a Notice	✓	posted on trailer, should be moved to new shed
2.2.1	Provide and maintain Natural buffer when Waters of the US < 50 ft		
2.2.3	Sediment control along any perimeter	✓	sediment in street - north by track-out per 2
2.2.3	Sediment control along any perimeter		
2.2.3	Sediment control along any perimeter	✓	dirt too high - replace sediment BMP east side & 2
2.2.3	Sediment control along any perimeter		
2.2.3	Sediment control along any perimeter		
2.2.3	Sediment control along any perimeter		
2.2.3	Sediment control along any perimeter		
2.2.4	Minimize sediment track-out		

2.2.5	Manage stockpiles		
2.2.6	Minimize Dust		
2.2.10	Protect Storm Drain Inlets		
2.2.10	Protect Storm Drain Inlets		
2.2.11	Minimize erosion of conveyance channels		
2.2.12	Sediment Basins		
2.2.14	Stabilize exposed portions of the site.		
2.2.14	Stabilize exposed portions of the site.		
2.2.14	Stabilize exposed portions of the site.		
2.2.14	Stabilize exposed portions of the site.		
2.3.1	Equipment and Vehicle Fueling		
2.3.2	Equipment and Vehicle Washing		
2.3.3	Building Material Storage.		
2.3.3	Fuel, oil, hydraulic fluid, petroleum products and chemical storage	✓	no spill kit
2.3.3	Construction and Domestic Wastes		
2.3.3	Construction and Domestic Wastes		
2.3.4	Washing Applicators used for paint, stucco, concrete, etc.		
2.3.4	Washing Applicators used for paint, stucco, concrete, etc.		
2.3.4	Washing Applicators used for paint, stucco, concrete, etc.		
2.4	Dewatering		
2.1	Discharge off site?	• Yes • <u>No</u>	
4	Self-Inspection Reports	request	Latest Report Date: 1-8-19

Notes: (City Inspector Use) Items in compliance can be left blank.

¹ Construction General Permit (CGP)

Maintenance or corrective actions are to be completed within 7 days.

Curtis,

Here are the pics you requested. The oil in the road is from Gorman's water truck filling up at that hydrant. AUI is the contractor doing the work for ABCWUA out there and we reached out to them and told them to clean their messes up and replace all BMP's in the street.

Thanks and have a great day,

Subject: RE: Gorman 5710 Avalon

Joe,
Good mornin'.
Thanks for the fixes.
Windrow may be hefty enough to hold water. A little compaction goes a long way. Leave it up to you.
Also,
ABCWUA contractor is to be cleaning Avalon Rd uphill from you. You should see this today.
Have a good day.

Curtis,
It was nice to meet you today.
As you can see from the attached photos, we addressed your concerns.
We ran a winrow in the area that could have let storm water into the adjacent properties on the East of the project, also
as we talked we will install "waddle" along the fence line.
We also brought on a fuel broom for the track off on Avalon Street.

Thank you,
Joe Cocchia
Site Superintendent

Subject: dirt in avalon road near a development site and the interceptor job
Attachments: abcwua.jpg; abcwua2.jpg; abcwua3.jpg

Victoria,

Good afternoon.

A development on the south side of Avalon and west of 57th St is beginning earth moving operations. They have some track out onto Avalon Road, which the contractor agreed to remove.

However, there is some dirt in Avalon Road from the interceptor job that drains past the entrance of the development project.. See photos.

I was hoping that you could remove the sediment from the south gutter ("abcwua2.jpg") on Avalon, from the bypass pipe area ("abcwua3.jpg") on Avalon, and not sure if removal from the bypass location ("abcwua.jpg") is enough or a sediment BMP (wattle/filter sock) may help.

Thanks.

**Re: Generations at West Mesa
Erosion and Sediment Control Plan
Engineer's Stamp Date 7-21-18 (K11E084)**

Dear Mr. Soule,

Based upon the information provided in your submittal received 7-23-18, the above referenced plan is not approved to be included in the SWPPP and to apply for an ESC Permit for grading and Building Permit until the following comments are addressed:

1. The plan does not show proposed grades.
2. Fencing cannot be used as a sediment BMP.
3. The plan does not have a Vicinity map.
4. The plan that was approved, Cypress Civil Development stamp date 4-24-18, did not have Vehicle Tracking Control proposed at the SE corner as it is a downhill location. These usually get mucked-up due to site drainage. It was omitted with the resubmittal.

**RE: Responses to Comments for Generations at West Mesa –Erosion and Control Plan – 1st
Submittal – K11E084**

Cypress Civil Development has compiled the following responses to the comment letter received from City of Albuquerque Stormwater Quality Planning Department for the above mentioned project. The responses are listed by heading below:

Comments dated April 20, 2018 from Curtis Cherne, P.E. – Stormwater Quality Planning Department

Comment 1 – Complied. Kevin Hall is a registered Professional Engineer in the state of New Mexico and the stamp was replaced with the correct stamp.

Comment 2 – Complied. The proposed grades are now provided on the plan.

Comment 3 – Complied. Inlet protection is now provided near the southeast corner of the site.

Comment 4 – Complied. Details are now provided for all BMPs.

Comment 5 – Complied. This is now noted on the plan.

Comment 6 – Complied. A vicinity map is now provided.

Comment 7 – Complied. The construction entrance is now located off of Avalon Road.

Comment 8 – Acknowledged.

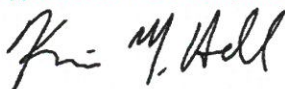

Comment 9 – Complied. The note is now provided on the plan.

Comment 10 – Complied. The title block was updated accordingly.

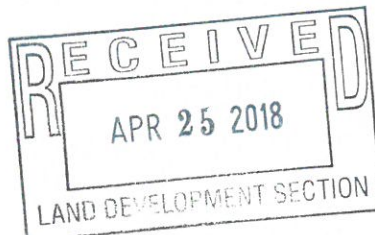

These comments addressed are the only comments received by CYPRESS for this project as of the date of this letter. If you have any questions, please do not hesitate to contact the undersigned.

Sincerely,

Cypress Civil Development

**Re: Generations at West Mesa
Erosion and Control Plan
Engineer's Stamp Date -no date, No NM Registration- (K11E084)**

Dear Mr. Hall,

Based upon the information provided in your submittal received 4-17-18, the above referenced plan is not approved to be included in the SWPPP or to apply for an Erosion and Sediment Control Permit for grading and Building Permit until the following comments are addressed:

- ✓ 1. The plan is to be stamped and sealed by a Professional Engineer registered in the state of New Mexico. ✓
- ✓ 2. Provide proposed grades. ✓
- ✓ 3. Provide inlet protection for the inlet near the southeast corner of the site. ✓
4. Provide details for all proposed BMPs. *Silt fence* ✓
- ✓ 5. As a minimum, the two large first flush ponds shown in the south area of the site are be graded with the initial grading. Please indicate this on the plan. ✓
- ✓ 6. Provide a Vicinity Map. This is a small (4"x 4" or so) window on the plan that shows the location of the site. ✓
- ✓ 7. It would be preferable to locate the construction entrance on Avalon as it is the uphill portion of the site. Construction entrances located downhill on a site can require more maintenance as drainage from the site (precipitation/ watering for dust control) can accumulate sediment in the BMP. ✓
- ✓ 8. A fiber roll is an acceptable sediment BMP. However, some operators install silt fence instead, as it is usually required by the City's Fugitive Dust Permit.
- ✓ 9. Please add the note "When doing work in the City ROW (e.g. sidewalk, drive pads, utilities, etc...) prevent dirt from getting into the street. If dirt is present in the street, the street should be swept at the end of each day or during the day if rain is imminent or if the contractor introduces water into the street." ✓
- ✓ 10. Somewhere on the plan, most likely in the Title Block, add a title that this is an "Erosion and Sediment Control Plan" or similar.

If you have any questions, you can contact me at 924-3420.

Sincerely,

Curtis Cherne
