Jason,
Good afternoon.

Thanks for having CGI sweep up the street right away. Appreciate it.

Some other things to watch:

1. The gravel south of the knocks-box isn't holding up where it is being driven over. Improving (larger rock over fabric) this area should help with track-out.
2. The ESC plan specifies a sediment trap at the southeast corner. Looks like drainage will be diverted around the wall to the south by the grading that is there now. Draining to this area is a good idea by Superior.
3. The ESC Plan specifies a filter sock along Central. There isn't much dirt work going on there now, but when it does please place filter sock at bottom of silt fence.

Thanks,
